

ENROLMENT REPORT 2007-08:

ACTUAL AND PROJECTED ENROLMENT

February 2008

Office of the Vice-Provost Planning and Budget

ENROLMENT REPORT 2007-08:

ACTUAL AND PROJECTED ENROLMENTS

A. Preamble

The Enrolment Report describes enrolments in various programs across the university in 2007-08 and compares achieved levels to enrolment plans as they appeared in last year's report. It also includes enrolment projections for the period 2008-09 through to 2012-13. These enrolment projections are the basis for the revenue projections used in the university's long-range budget guidelines and the Budget Report.

B. Background

Enrolment planning in the late 1980s and 1990s focused primarily on positioning the University's enrolment level within a funded enrolment "corridor" negotiated with the Ontario Government. Over the past decade the University participated in several programs to increase enrolment levels beyond those defined in the corridor. In the late 1990s the Government introduced a series of targeted funding envelopes, which allowed the University to grow in the areas of BEd, MD, computer science and high-demand engineering. In 2000-01, the Ontario Government engaged in discussions with the Ontario universities regarding enrolment expansion to meet the demands of the "double-cohort". Full average funding for eligible undergraduate growth over 2000-01 levels was provided between 2000-01 and 2005-06. Funding was also provided to support limited graduate growth between 2000-01 and 2004-05.

In May of 2005, the Ontario Budget allocated \$220M for a major initiative to expand graduate enrolment in the Province by 14,000 students over 2002-03 levels. This initiative presented an excellent opportunity for the University of Toronto to restore graduate/undergraduate mix and strengthen its research enterprise.

Section C below provides enrolment details for 2007-08, with comparisons of actual enrolments to initial plans. It also provides some data on enrolment history. Projections based on current University plans are given in Section D.

Overall, the data presented in the following sections show that the University's recruitment and enrolment management strategies are enabling us to stay very close to plans.

C. 2007-08 Enrolment: Composition of the Student Body

Tables 1A provides overall headcount statistics from 2002-03 to 2012-13. There were 74,233 undergraduate and graduate students enrolled at the University of Toronto in Fall 2007, an increase of 1,739 students over 2006-07.

Full-time-equivalent (FTE) numbers are provided in Table 1B, which includes a breakdown of undergraduate Arts & Science FTEs by field of study. As many students

graduate with majors in more than one field, this breakdown should not be viewed as a precise accounting. It is only indicative of broad trends.

Table 1B shows graduate professional masters FTEs by campus. Doctoral stream masters and PhD enrolments are totals across the three campuses. They cannot be displayed by campus because of the unitary administrative structure for these degrees.

The University's enrolment history since 1973 is illustrated in Chart 1. Over this period, enrolment has almost doubled, from 32,036 to 62,301 FTEs.

C.1.1. Undergraduate Enrolment: 2007-08

Significant expansion in undergraduate enrolment took place during the first five years of the decade, as can be seen in Table 2. Enrolment reached 50,127 FTEs in 2005-06, compared to 41,620 in 2002-03 — an increase of 20%.

A much more modest increase of 564 FTEs took place in 2006-07 followed by a reduction of 90 FTEs in 2007-08, bringing the total student FTEs to 50,600. This is within 518 FTEs, or 1%, of the plan of 50,082 FTEs. The number of undergraduate students in Arts & Science has decreased on the St. George campus and increased at UTM and UTSc. Enrolments increased slightly over 2006-07 in most professional programs.

The reduction in new intake following the end of the double cohort can be clearly seen in the statistics given in Table 3. The number of full-time students admitted into first-entry programs in 2007-08 was 397 lower than in 2003-04. Intake into Year 1 of second-entry professional programs was very close to planned levels.

The average grade of the 2007-08 incoming class is 83.2, the same as last year. Chart 2 shows the average grade for entering students in Arts & Science at the three campuses from 2001 to 2007. Despite significant fluctuations in applicant demand through the double-cohort period, the University has maintained the quality of its undergraduate student body.

C.1.2 Graduate Enrolment: 2007-08

As part of the 2005 Spring Budget, the Ontario Government announced that by 2009-10 an additional \$220M will be made available to expand graduate enrolment in Ontario universities. This funding is intended to support a system-wide growth of 14,000 graduate spaces over 2002-03 levels. Of these, 12,000 spaces were allocated in June 2006 for expansion to be achieved by 2007-08. The remaining 2,000 spaces are expected to be allocated this year for expansion by 2009-10.

The Provincial program presented an excellent opportunity for the University of Toronto to increase the number of graduate students and strengthen its research enterprise. The University undertook an extensive planning process, the results of which are described in a document entitled *A Framework for Graduate Expansion 2004-05 to 2009-10*. These plans were approved by Governing Council on December 14, 2006.

The University received approval from the Ministry to increase enrolment by up to 2,107 eligible domestic student FTEs by 2007-08 relative to 2004-05. The expansion

envisioned in the Framework document is based on this allocation and on the University's academic plans as developed by the heads of various graduate units.

Fall Enrolments

Table 4A shows planned enrolments for 2007-08 as well as actual and projected enrolments for domestic and international students to 2012-13. A breakdown by degree category is given in Table 4B. Overall graduate enrolment reached 12,473 FTEs in 2007-08, an increase of 1,167 FTEs or 10.3% over 2006-07. Of these, Table 4C shows that 9,238 FTEs are eligible for funding under the graduate expansion program, representing an increase of 1,524 relative to 2004-05. The corresponding increase relative to 2002-03 is 1,891 FTEs, which will be the basis for determining capital funding from the government. Nursing students are excluded from the eligible count because they are funded under a different program.

Detailed enrolment breakdowns by faculty and degree are provided in Tables 4D-4G. Table 4D, which shows the planned targets for 2007-08 and beyond, includes a "buffer" in the last row. This is the number of students who have not yet been included in the academic plans of any division, because funding is not assured.

Chart 3 illustrates changes in graduate enrolment for different degree categories. Since 1997-98, enrolment in graduate professional masters programs has more than doubled (110% increase), and doctoral enrolment has grown by 38%. At the same time, doctoral-stream Masters students have increased by about 19%. Projections to 2012-13 show that relative growth is expected to follow a similar pattern.

The rapid growth in Professional Masters enrolments reflects the rising importance of these programs and the increased number of offerings at the University. The increase in doctoral students is indicative of the growing intensity of research and scholarship.

C.1.3 Geographic Origin of In-coming Students: 2007-08

Table 5 shows that a large proportion of incoming undergraduate students, 71% in 2007-08, come from the Greater Toronto Area. Another 11% are from other areas in Ontario, 5% from other provinces in Canada and the remaining 13% from other countries. In contrast, only 63% of the incoming class of graduate students is drawn from the GTA. About 15% are from other areas in Ontario, 10% from other provinces in Canada, and 12% from other countries.

C.1.4 International Enrolment: 2007-08

International enrolment statistics are summarized in Table 6 and Charts 4 & 5. The number of international students combined has been growing steadily since 1997-98 when they represented only 3.8% of the total student population. Today, 10.1% of the University of Toronto's students come from outside Canada. International students represent 9.5% of the undergraduate population and 12.8% of graduate students.

Table 7 shows trends in full-time intake. The total number of international students admitted has been steadily increasing, but there are significant year-to-year fluctuations in percentage increases because the numbers are small. Also, intake statistics are

influenced by international events such as those of September 11, 2001 and changes in government funding. In 2007-08, total international intake increased by 2.8% relative to the previous year, with a decline of 12.1% in graduate and an increase of 8.8% for undergraduate students. The decline in graduate intake is largely attributable to the current emphasis on graduate domestic enrolment expansion for whom full funding is available from the government.

Charts 6A and 6B illustrate the distribution of international students by geographic origin. We draw most of our international students from Asia and the United States. The top three countries of origin for undergraduate students are China & Hong Kong (31%), South Korea (13%) and the United States (7%). For graduate students, the top countries are the United States (22%), China & Hong Kong (17%), and India (7%).

D. Projected Enrolment: 2008-09 to 2012-13

D.1. 1 Projected Undergraduate Enrolment

Over the next five years, the University's plan is to increase its undergraduate enrolment by about 100 student FTEs relative to 2007-08 (see Table 1B). Arts & Science at St. George is planning to reduce by 394 FTEs to 20,320 FTEs. This will be more than offset by increases of 980 FTEs at UTM and 11 FTEs at UTSc, which will result in 9,391 FTEs and 8,388 FTEs respectively. Applied Science is projected to reduce its undergraduate enrolment level by approximately 500 FTEs to 3,820 as part of a plan to rebalance its undergraduate/graduate mix. The number of students in professional faculties is projected to decline slightly to 7,113 FTEs. UTSc is currently engaged in an academic planning process, and enrolment projections will be updated when this process is completed.

There are no significant planned changes in intake in undergraduate professional programs in 2008-09. OISE/UT BEd intakes will be reduced in future years as the Concurrent BEd (CTEP) program, which commenced in 2007-08, ramps up.

By 2012-13, St. George Arts & Science intake will decrease slightly to 5,323 full-time students, in accordance with recently updated plans. UTSc's intake will drop by 79 to 2,484 full-time students, and UTM plans to admit 2,739 full-time students, 17 more than planned for 2007-08.

D. 2.1 Projected Graduate Enrolment

The Framework for Graduate Expansion envisioned an increase of 4,400 students relative to 2002-03, conditional on the availability of resources, including operating grant funding, capital funding and scholarships for student support. The enrolment projections in Table 4A continue to reflect these plans. At the same time, the University continues to monitor funding availability to ensure that the quality of graduate student experience is not affected due to lack of funding. Adjustments to long-term plans may be made after the allocations for phase 2 of the Province's graduate expansion program are announced.

Both the short-term and long-term graduate enrolment targets described above are quite ambitious. They have been set based on the academic plans of individual faculties and on the expansion places that have been allocated by the Ontario Government for 2007-08. Graduate enrolment targets should not be regarded as precise numbers but rather viewed as estimates of how graduate units across the University will respond to the opportunities available to them.

D. 3. Projected Undergraduate/Graduate Enrolment Balance

Chart 7 illustrates how the changes in enrolment described above, past and future, affect the enrolment balance among undergraduate and graduate programs. In 1997-98, undergraduate enrolment represented 80% of the total student body, rising slowly to 82% in 2005-06. As a result of graduate expansion, this percentage is expected to drop to 78% in 2008-09. If the funding environment enables graduate expansion to continue as projected, graduate students would increase to about a quarter of the student population over the next five or six years.

D. 4. Projected Domestic/International Mix

Table 8 shows actual and planned enrolments for domestic and international students. The anticipated increase of 90 undergraduate FTEs over 2007-08 levels is a result of a planned decrease of 1,100 domestic students offset by an increase of 1,190 international students. Graduate student growth is planned to be accomplished largely through increases in domestic students, with a modest growth of about 510 FTEs in international students. Overall international enrolment will increase from 10.8% of the total FTE student population in 2007-08 to 12.7% by 2012-13.

D. 5. Longer-term Enrolment Demand

Population projections for the university age population over the next fifteen years indicate significant enrolment pressure, particularly in the GTA. Ontario's 18-21 year old population is expected to grow on the order of 50,000 by 2014, with most of this growth occurring in the GTA. Participation rates are also expected to increase, leading to a further increase in demand.

The University is currently engaged in discussions with the Ministry and with sister universities to assist in the development of plans to meet the anticipated demand. As the projections in this report show, there are no current plans to increase undergraduate enrolment at the University of Toronto.

Last fall, the President initiated a visioning exercise to develop long term plans for the Year 2030. Task forces have been established to examine all aspects of the University, including long-term enrolment patterns. This process is expected to be completed in the spring and its outcome will undoubtedly influence future changes to enrolment targets on the three campuses.

APPENDIX A

Background: Enrolment Planning and Growth to 2005-06

A.1. “Corridor” Funding to 2000-01

The Ontario Government negotiated enrolment funding levels for base operating grant with the Ontario Universities in 1989. This established a “corridor mid-point” for the University of Toronto that the University reached in 1990-91. At that point the University had the flexibility to allow its enrolment (expressed in BIUs) to fluctuate within a corridor of ± 3% of its mid-point with no effect on the operating grant it received. The University’s enrolment planning for 1992-93 through 1995-96 took advantage of this flexibility by reducing enrolment while remaining within its corridor, thereby increasing the funding per FTE.

Starting in 1996-97, OISE’s Additional Qualification program was no longer eligible for BIU funding. This reduced the BIU count by 2,245 and brought the University close to the bottom of its enrolment corridor. The University made a strategic decision to increase enrolment to just above the corridor mid-point. Growth in 1998-99, 1999-00 and 2000-01 improved the University’s position. The 2000-01 BIU count for the University was 3.6% above the corridor mid-point.

The announcements of the Access to Opportunities Program (ATOP) in 1998 and the BEd and MD expansions in 1999 and 2000 enabled the University to increase enrolments in selected areas. Government funding for these programs was provided from special envelopes and they were not considered to be part of the corridor.

A.2. Enrolment Planning 1999-00 to 2005-06

The current decade in Ontario has been characterized by significant increases in demand for university education due to the combined effects of demographic shifts, increased participation rates and changing work place requirements. The impact of these pressures has been exacerbated by the shift from a five-year to four-year high school curriculum leading to the so-called “double cohort”, the brunt of which was felt in fall 2003.

In 1999, to prepare for increased demand, the University of Toronto released a *Discussion Paper on Expanding Enrolment* which framed the issues facing the University. Building upon this paper, a *Framework for Enrolment Expansion at the University of Toronto* was developed and approved by Governing Council in April 2000. The *Framework* document provided a policy structure which has informed the University’s response to the opportunities and pressures for enrolment expansion over the past five years.

In July 2000, Ontario universities were asked by the Ministry of Training, Colleges and Universities (MTCU) to submit institutional enrolment growth plans for the period 2001-02 through 2005-06. The May 2001 Ontario Budget contained an announcement for full average operating grant funding for the projected enrolment increases through to 2003-04. The announcement provided for \$25.8M in 2001-02 increasing to \$200M in 2003-04.

In June 2001, the Provost struck a Working Group on Enrolment Expansion to guide the detailed planning associated with the expansion. The Working Group's efforts resulted in the report *Update on Enrolment Expansion, April 2002*. Guided by the *Framework for Enrolment Expansion* and building on earlier MTCU submissions, the *Update* called for Full-time Equivalent (FTE) growth, in steady state, of 6,907 at the undergraduate level and 1,374 at the graduate level. Most of this increase was planned for the University of Toronto at Mississauga and the University of Toronto at Scarborough, with total growth on the St. George campus limited to 3,313.

In June 2002, Governing Council approved the enrolment expansion and the principles for allocating resources as outlined in the report. In September 2003, an Enrolment Target Agreement (ETA) was signed with the Ministry of Training, Colleges and Universities which defined the specific undergraduate targets. A revised enrolment expansion plan, *Update on Enrolment Expansion, December 2002*, reflected the University's 2002-03 ETA. The major revisions from the April update were a steady state increase in Arts and Science enrolment on all campuses of 3,551.

No significant changes in enrolment plans were made for 2004-05 and 2005-06. The Enrolment Projections Reports in 2004 and 2005 reflected the flow-through of actual enrolments. They also included some adjustments in the international/domestic mix in Arts & Science divisions following recommendations from the Dean of Arts & Science and the Principals of UTSc and UTM.

A.3. Enrolment Growth 2001-02 to 2005-06

A.3.1 Enrolment Growth 2001-02

In 2001-02, \$20M was made available by the Ontario Government to support enrolment growth in first-entry undergraduate programs and \$5.8M for second-entry professional and graduate programs. The distribution of the first-entry undergraduate funding was based on the positive year-over-year change in a university's eligible enrolment between 2000-01 and 2001-02. The University of Toronto's growth in first-entry undergraduate programs was 1,390 FTEs and its share of the funding was 15%. Funding distribution for second-entry and graduate programs was based on each university's share of BIUs in these programs in 2000-01. This yielded \$1.9M of new funding to the University of Toronto.

A.3.2 Undergraduate Enrolment Growth: 2002-03 to 2005-06

Between 2002 and 2004, the University signed an Enrolment Target Agreements (ETA) with the Ministry of Colleges and Universities (MTCU) which were to define the undergraduate enrolment growth that would be funded. In each of these years the University received full operating grant support for its year-over-year growth in eligible undergraduate enrolment.

As indicated in Table 2, undergraduate enrolment grew 9,079 FTEs during this period and the University received \$61.1M in funding for its 2002-03, 2003-04 and 2004-05 eligible undergraduate growth.

In 2005-06, undergraduate enrolment increased by a further 2,249 FTEs (4.7%) reaching a level of 50,127 FTEs. Total enrolment levels in first-entry programs continued to grow as a result of the flow-through from the double-cohort years and higher intake levels in 2005-06.

A.3.3 Graduate Enrolment Growth: 2002-03 to 2005-06

In 2002, the Government created a separate envelop for “graduate accessibility” to fund limited growth in graduate enrolment for the period 2002-03 to 2004-05. In these years, the University of Toronto received funding for graduate growth based on the “COU Consensus Methodology”¹ which provided a share of funding to each institution based on its performance on 5 indicators.

Between 2002-03 and 2004-05, the University’s graduate enrolment growth exceeded its calculated COU Consensus share. As indicated in Table 4, the University’s total graduate enrolment grew 1,970 FTEs between 2000-01 and 2004-05, from 8,814 FTEs to 10,782 FTEs. The University received a total of \$12.9M for this enrolment growth.

Between 2002-03 and 2005-06 enrolment in graduate programs increased by 1,968 FTEs (22%). In 2005-06, graduate program enrolment grew marginally. As indicated in Table 4, the University’s 2005-06 total graduate enrolment level was 10,846 FTEs, representing an increase of 65 FTEs over previous year’s levels.

¹ COU Consensus Methodology is based on the Universities’ performance on the following five (equally weighted) indicators: Graduate FTEs, Graduate BIUs, Graduate Degrees Awarded, SSHRC, NSERC and CHIR Funding, Graduate Scholarships and awards. The resulting share is applied to the available funding and compared to the growth in graduate BIUs since 2000-01. The University is funded based on the lesser of the two.

2007-08**

Note:⁴⁰Data excludes TST students.

CHART 6A: 2007-08 INTERNATIONAL STUDENTS BY GEOGRAPHIC ORIGIN*

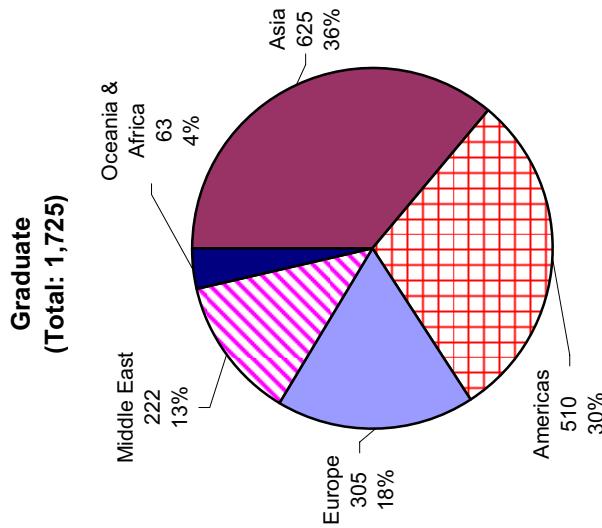

Note: i) In 2007-08, the largest percentage of undergraduate international students were from China including Hong Kong (30.7%) followed by South Korea (12.6%).

ii) Geographic Origin determined using "Country of Citizenship" field in ROSI.

Top 3 Countries in each Region		
	Country	% of Undergraduate
Americas	U.S.A	371
	Trinidad & Tobago	63
	Brazil	41
Asia	China & Hong Kong	1,736
	South Korea	711
	India	293
Europe	United Kingdom	133
	France	56
	Irish Republic	52
Middle East	Saudi Arabia	106
	Israel	53
	Turkey	33
Oceania & Africa	Nigeria	64
	Australia	61
	Kenya	34

CHART 6B: 2007-08 INTERNATIONAL STUDENTS BY GEOGRAPHIC ORIGIN*

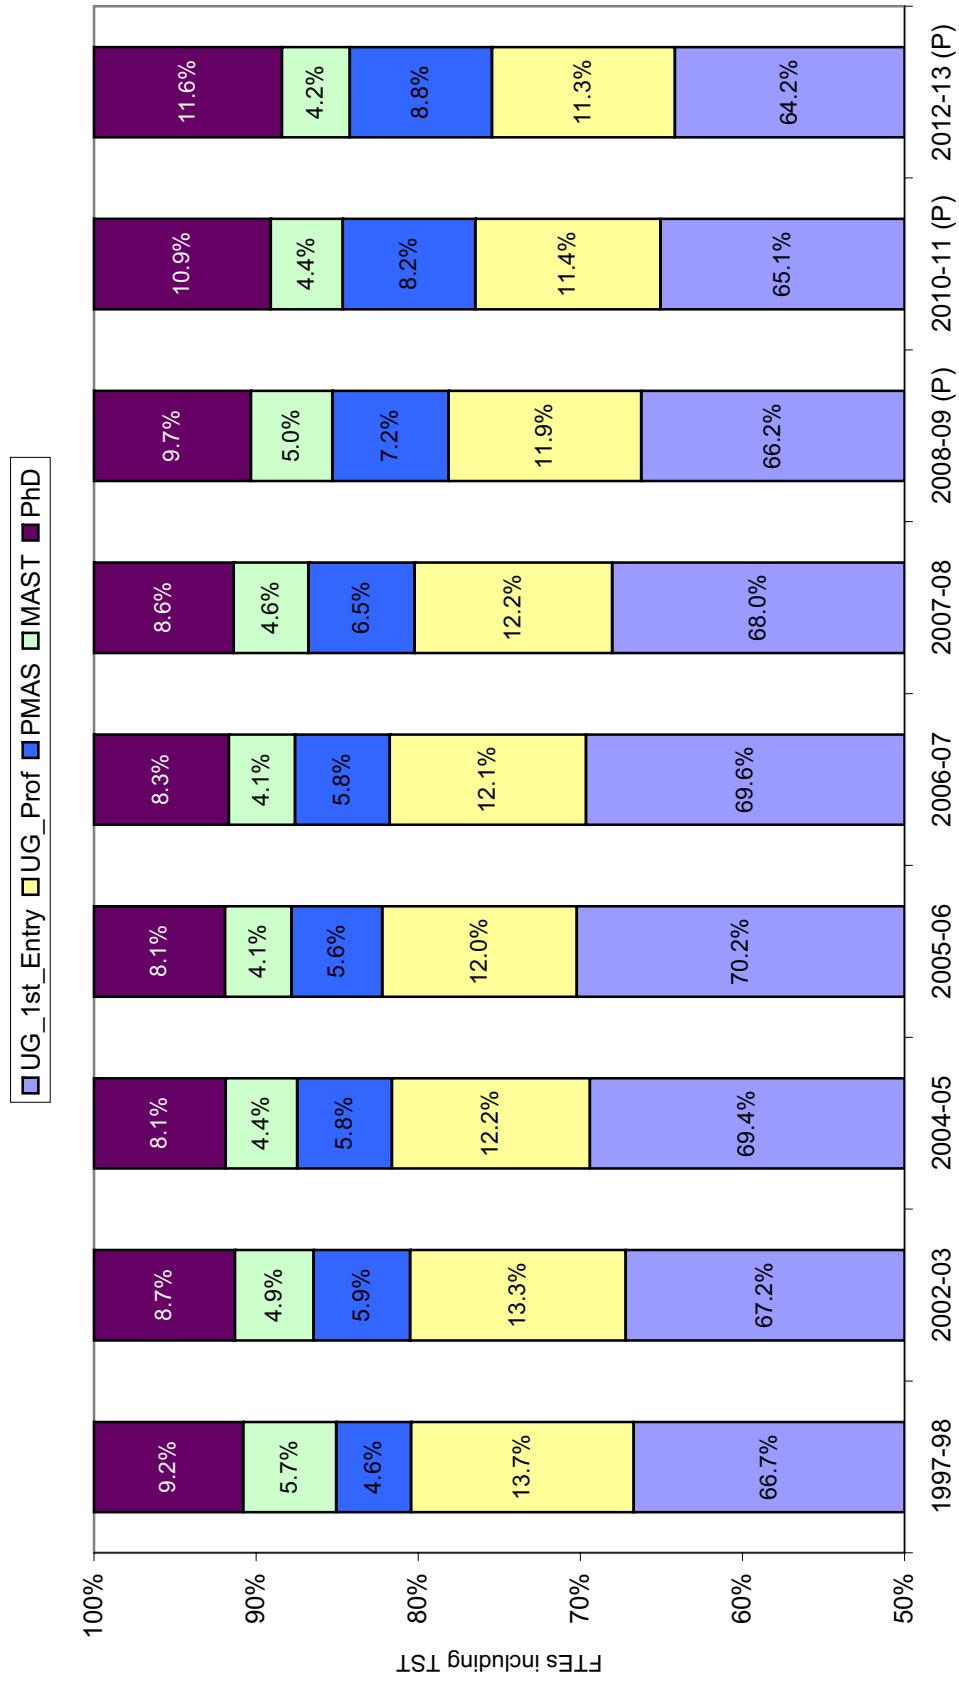

Top 3 Countries in each Region			
	Country	Count	% of Graduate
Americas	U.S.A.	383	22.2%
	Mexico	42	2.4%
	Brazil	27	1.6%
Asia	China & Hong Kong	291	16.9%
	India	123	7.1%
	Japan	43	2.5%
Europe	Germany	65	3.8%
	United Kingdom	37	2.1%
	Greece	31	1.8%
Middle East	Iran	98	5.7%
	Israel	33	1.9%
	Turkey	27	1.6%
Oceania & Africa	Australia	20	1.2%
	New Zealand	12	0.7%
	Ghana	7	0.4%

Note: i) In 2007-08, the largest percentage of graduate international students were from the USA (22.2%) followed by China including Hong Kong (16.9%).

ii) Geographic Origin determined using "Country of Citizenship" field in ROSI.

Chart 7: Enrolment Balance 1997-98 TO 2012-13

Note: Data includes TST students. OISE graduate students are included starting in 2000-01. P = Projected. Architecture (1998-99), and OT/PT (2001-02) programs converted to Professional Masters programs . Reporting of Additional Qualification enrolments ceased in 2004-05.
