DATE: February 14, 2014 for March 3, 2014

AGENDA ITEM: 1 (d.)

ITEM IDENTIFICATION:

Enrolment Report, 2013-14

JURISDICTIONAL INFORMATION:

According to Section 4.1 of the Planning & Budget Committee Terms of Reference, the Committee is responsible for policy on planning. Enrolment plans and policies are among the specific areas in which recommendations are made to the Academic Board.

The Business Board receives the annual enrolment report as context for its consideration of the tuition fee schedules.

GOVERNANCE PATH:

1. Planning and Budget Committee (February 26, 2014)
2. Academic Board (March 20, 2014)
3. **Business Board (March 3, 2014)**

PREVIOUS ACTION TAKEN:

The *Enrolment Report, 2012-13* was reviewed by the Planning & Budget Committee at its February 27, 2013 meeting and by the Academic Board at its March 21, 2013 meeting.

It was received for information by the Business Board at its March 4, 2013 meeting.

HIGHLIGHTS:

The *Enrolment Report* provides information for two purposes: it reports 2013-14 enrolments comparing actual results to enrolment plans and it lays out the enrolment projections for the

period 2014-15 through to 2018-19. These projections form the basis for planning and for the revenue projections underlying the University's Long Range Budget Guidelines 2014-15 to 2018-19 and the Budget Report 2014-15.

In 2013-14, a total of 83,012 students are enrolled at the University of Toronto, 75,331 full-time and 7,681 part-time. In terms of full-time equivalents (FTEs), the 2013-14 enrolment level of 72,370 FTEs represents a more than doubling of enrolment since 1977 and a 2.9% increase over 2011-12.

The University continues to see an increase in international student enrolment. In 2013-14, international enrolment increased by 1,298 students to 12,607, consisting of 10,276 undergraduate students and 2,331 graduate students. International students now represent 15.3% of undergraduate and 14.7% of graduate students. Overall international enrolment will increase from 15.2% of the University's total student population in 2013-14 to 16.6% by 2018-19. This will be driven primarily by higher undergraduate international intake targets in Arts and Science, the University of Toronto Mississauga (UTM), University of Toronto Scarborough (UTSC), and Applied Science and Engineering.

In the 2011 Ontario Budget the provincial government announced a commitment to fund 60,000 new spaces in post-secondary education over the five-year period spanning 2011-12 to 2015-16. The graduate expansion window was later extended to 2017-18. Of the 60,000 new spaces, the university system share is expected to be 41,000 spaces, including 35,000 undergraduate and 6,000 graduate spaces. The University has been actively engaged in planning across most academic divisions to ensure we participate in the opportunities provided by this next phase of enrolment expansion. Planning has been done in the context of the objectives outlined in *Towards 2030: A Third Century of Excellence at the University of Toronto* and the Strategic Mandate Agreement (SMA) submission provided to MTCU in 2012, and then updated in December 2013, in response to MTCU's new postsecondary funding framework entitled *Ontario's Differentiation Policy Framework for Postsecondary Education*. The framework was accompanied by the Ministry's capital planning document: *Major Capacity Expansion Policy Framework* which will govern future undergraduate expansion in the postsecondary sector either through the creation of new campuses or through major expansion at existing campuses. The University will forward a submission for consideration when the Ministry releases its formal call for proposals in 2014.

Undergraduate growth is planned at UTM and UTSC and to a lesser extent in professional undergraduate programs on the St. George campus. Growth in professional master's and doctoral stream graduate programs is planned across most divisions. Additional capital funding to support space requirements for the planned growth is critical and divisions are working on space plans in conjunction with enrolment plans.

FINANCIAL IMPLICATIONS:

Enrolment projections underlie the University's *Long Range Budget Guidelines 2014-15 to 2018-19 and Budget report 2014-15*.

RECOMMENDATION:

For information.

DOCUMENTATION PROVIDED:

Enrolment Context

The Enrolment Report provides information for two purposes: it reports 2013-14 enrolments comparing actual results to enrolment plans and it lays out the enrolment projections for the period 2014-15 through to 2018-19. These projections form the basis for planning and for the revenue projections underlying the University's Long Range Budget Guidelines 2014-15 to 2018-19 and the Budget Report 2014-15.

The University of Toronto has grown significantly since 2002-03 from 63,000 students to over 84,000 students in 2013-14, an increase of 33%. Undergraduate growth has occurred across all three campuses. Graduate expansion was enabled by the 2005 Ontario Budget, when the provincial government announced \$220 million to expand graduate enrolment by 14,000 spaces, later increased to 15,300 spaces. This report will often use 2002-03 as the baseline for measuring growth, consistent with the baseline used by the Ministry of Training, Colleges and Universities (MTCU) for tracking growth for capital purposes; operating funding for graduate growth is measured over 2004-05.

In the 2011 Ontario Budget the provincial government announced a commitment to fund a further 60,000 new spaces in post-secondary education over the five-year period spanning 2011-12 to 2015-16. The graduate expansion window was later extended to 2017-18. Of the 60,000 new spaces, the university system share is expected to be 41,000 spaces, including 35,000 undergraduate and 6,000 graduate spaces. The University has been actively engaged in planning across most academic divisions to ensure we participate in the opportunities provided by this next phase of enrolment expansion. Planning has been done in the context of the objectives outlined in *Towards 2030: A Third Century of Excellence at the University of Toronto* and the Strategic Mandate Agreement (SMA) submission provided to MTCU in 2012 and then updated in December 2013 in response to MTCU's new postsecondary funding framework entitled *Ontario's Differentiation Policy Framework for Postsecondary Education*. The framework was accompanied by the Ministry's capital planning framework.

The *Towards 2030* report and the SMA submission call for undergraduate growth primarily at the University of Toronto Mississauga and the University of Toronto Scarborough, graduate growth across all three campuses and growth in international enrolment. To date, the Ministry has announced allocation details for only 1,590 of the 6,000 graduate spaces; the remaining spaces will be allocated as part of the SMA process. MTCU has not yet announced undergraduate enrolment allocations however all undergraduate spaces have been funded at the full per student rate so far.

Overall, the data presented in the following sections demonstrate that the University's recruitment and enrolment management strategies are enabling us to achieve our enrolment plans. Graduate expansion in the research stream has been somewhat slower than originally anticipated, consistent with many other research intensive universities in Ontario. Expansion in the professional master's stream has been very successful, with continued growth planned across many existing and new programs. The University of Toronto continues to attract a large number of very high-quality applicants, both domestically and internationally, and to meet its enrolment targets.

An Overview of 2013-14 Enrolment

Total Enrolment 2013-14 (Tables and Charts 1 and 2)

Enrolment is generally reported in one of two ways: headcount, which is a measure of the number of students enrolled, and full-time equivalent (FTE), which is a measure of course load activity of the students enrolled. A normal course load in Arts and Science is five full courses. A student taking a full course load of five courses is counted as one FTE. A student taking four full courses is counted as 0.8 FTE. Students eligible for provincial operating funding are described as “eligible FTEs” in this report. Generally speaking eligible students are domestic students; graduate students remain eligible for a set period of time, beyond which they become “ineligible”.

In 2013-14 there are 84,140 students (73,079 FTE) enrolled at the University of Toronto, which is an increase of 2,062 students (2.5%) over 2012-13. There are 67,926 undergraduate students (56,547 FTE) and 16,214 graduate students (15,160 FTE). Our students are spread across three campuses and the Toronto School of Theology (TST): St. George has 51,666 FTE, the University of Toronto Mississauga (UTM) has 10,950 FTE, the University of Toronto Scarborough (UTSC) has 9,754 FTE and TST has 709 FTE. The Toronto School of Theology is an ecumenical group of seven colleges offering some of their programs conjointly with the University of Toronto. It should be noted that although the tables accompanying this report include a breakdown of undergraduate Arts and Science FTEs by field of study, because many students graduate with specialists and/or majors in more than one field, this breakdown should not be viewed as a precise accounting. It is only indicative of broad trends.

Professional Master’s FTEs are reported by campus because these programs are campus-based programs. Doctoral stream Master’s and PhD enrolments are reported on a tri-campus basis because of the unitary administrative structure for most of these degree programs.

Undergraduate Enrolment 2013-14 (Tables and Charts 3, 4, 5)

Total undergraduate student FTEs is 57,919 in 2013-14, 296 FTEs (0.5%) above target. The number of undergraduate FTEs increased in most programs over 2012-13. Actual overall intake excluding OISE in Fall 2013 was 70 (0.5%) over planned levels. OISE agreed after its initial intake target was established for 2013-14 to reduce its combined undergraduate intake levels by over 200 students in response to the Ministry seeking further assistance in reducing the number of future teaching graduates. The average grade of the 2013-14 incoming tri-campus Arts and Science class is 84.8% which is slightly higher than the averages over the previous three years. Despite the significant increase in intake levels since 2002-03, the University has maintained the quality of its undergraduate Arts and Science student body. The average grade of the 2013-14 incoming Engineering class is 91.7% which is also higher than the averages over the three previous years.

A significant number of students benefit from collaboration between the University of Toronto and other institutions; 2,758 (4.1%) of the University’s undergraduate students study in programs offered jointly with external or affiliated institutions and 773 (1.1%) students came to the University of Toronto after studying at an Ontario College of Applied Arts and Technology. A new UTSC-Seneca College

transfer program commenced in 2013-14. There were also 4,429 (6.5%) students registered in 2013-14 who came from another Canadian university, CEGEP, or non-Ontario college.

Graduate Enrolment: 2013-14 (Tables 6-13)

The Provincial graduate expansion program presented an excellent opportunity for the University of Toronto to increase the number of graduate students and strengthen its research enterprise. The University undertook an extensive planning process, the results of which are described in a document entitled *A Framework for Graduate Expansion 2004-05 to 2009-10*. These plans were approved by Governing Council on December 14, 2006. Graduate expansion has unfolded in three phases, described below.

In Phase 1, the University of Toronto received approval from the Ministry to increase enrolment by to 2,134 eligible FTEs by 2007-08 relative to 2004-05. This brought Phase 1 totals to 6,192 Masters and 3,867 PhD funded spaces.

Phase 2 was announced in 2009 and the University was allocated an additional 39 Master's and 249 PhDs. Subsequently, the University of Toronto received permission to convert 263 PhD spaces to 500 additional Master's spaces. End-state targets for Phase 2 were set at 7,031 Master's and 3,853 PhDs, which represents growth relative to 2004-05 of 2,209 Master's and 750 PhDs. Phase 2 of graduate expansion was concluded in 2011.

Expansion will continue under Phase 3. To date MTCU has allocated 1,590 of the 6,000 Phase 3 graduate growth spaces. To date the University has been allocated a total 7,074 Master's and 3,877 PhD spaces, which represents growth over 2004-05 of 2,252 Master's and 775 PhDs. The government has also extended the target for full expansion of the 6,000 spaces to 2017-18 in light of lower than expected graduate enrolment in 2011-12 and the province's fiscal circumstances. The University is 34 eligible Master's FTEs over and 209 PhDs below its approved 2013-14 allocations. The University has been allocated a preliminary share of 215 out of the 770 additional Masters spaces available for 2014-15. The process for the remaining Phase 3 spaces will be tied to the SMA process.

Since 2002-03, enrolment in graduate professional Master's programs has almost doubled, and doctoral enrolment has grown by over 38%. At the same time, doctoral-stream Master's enrolment has increased by 13%.

International Enrolment 2013-14 (Tables and Charts 14-19)

The number of international students has been growing steadily since 2002-03 when they represented only 6.5% of the total student population. Today, 15.2% of the University of Toronto's students come from outside Canada. International students represent 15.3% of the undergraduate population and 14.7% of graduate students.

The total number of international students admitted has been steadily increasing, but there can be significant year-to-year fluctuations in percentage increases in divisions where the numbers are small. Also, intake statistics are influenced by international events and changes in government funding. In 2013-14, total international intake increased by 9.3% relative to the previous year, with an increase of 6.3% in graduate and an increase of 10.2% in undergraduate admissions.

The University draws many of its international students from Asia and the Americas. The top countries for undergraduate students are China (52%), South Korea (6%), India (4%) and the United States (3%). For graduate students, the top countries are China (29%), the United States (15%), India (11%) and Iran (7%). International undergraduate students came from 146 countries while international graduate students came from 114 countries.

A large proportion of incoming undergraduate students, 59% in 2013-14, come from the Greater Toronto Area. Another 10% are from other areas in Ontario, 7% from other provinces in Canada and the remaining 24% from other countries including domestic students who were living abroad. Of the incoming class of graduate students 53% is drawn from the GTA, 16% are from other areas in Ontario, 14% from other provinces in Canada, and 17% from other countries including domestic students who were living abroad.

Projected Enrolment 2014-15 to 2018-19

Projected Undergraduate Enrolment (Tables and Charts 3, 4, 5)

The University's plan is to increase its undergraduate enrolment by 3,893 FTEs, reaching 61,812 FTEs by 2018-19. This is primarily the result of increases of 242 in Arts and Science at St. George, 1,859 at UTSC and 2,200 at UTM. The introduction of Bachelor of Arts programs in Architecture is projected to add 321 FTEs by 2018-19. Applied Science and Engineering is projected to reduce its undergraduate enrolment by 210 FTEs as part of a plan to rebalance its undergraduate/graduate mix. Kinesiology and Physical Education will increase by 61 FTEs while Music will grow by 17 FTEs by 2018-19.

The number of students in professional faculties is projected to decrease by 586 FTEs to 7,625 FTEs by 2018-19 primarily due to changes in undergraduate teacher education programs and the Ministry's requests for Ontario institutions to extend the length of their teacher education programs and to reduce the number of future graduates from accredited programs. Increases in FTEs are planned within several Medicine programs and Dentistry's DDS program.

Projected Graduate Enrolment (Tables 6-13)

The University of Toronto currently educates 23% of Masters students and 32% of PhD students in Ontario compared to 25% of Masters students and 42% of PhD students in 2012-13. Our plans are to significantly expand on this. By 2018-19 the University plans for 6,837 FTEs in doctoral programs, 2,984 FTEs in doctoral stream masters programs and 8,125 FTEs in professional masters programs. The University will continue to monitor funding available to students in the doctoral stream programs to ensure that the quality of the graduate student experience is maintained.

Divisional plans are based on academic priorities for each division. In some cases divisions plan to increase enrolment beyond what is currently estimated to be funded by MTCU. Divisional plans will be re-calibrated, if necessary, once the final Phase 3 allocations are known. The rapid growth in Professional Master's enrolments reflects the rising importance of these programs and the increased

number of offerings at the University. The increase in doctoral students is indicative of the growing intensity of research and scholarship. The ability to increase the number of international doctoral students is severely limited by the lack of provincial operating funding to support these students; the University continues to advocate for a change in this policy.

Undergraduate/Graduate Enrolment Balance (Chart 2c)

In 2002-03, undergraduate enrolment represented 80% of the total student body, rising slowly as the undergraduate double cohort progressed towards graduation, and then dropping back to 79.2% in 2013-14 as a result of graduate expansion. Graduate students are projected to increase to 22.5% of the student population over the next five years. At the St. George campus, graduate students are projected to increase from 28.2% to 31.8% (based on counting all doctoral stream students as St. George students. This will modify slightly as UTM and UTSC develop more campus-based doctoral stream programs

Domestic/International Mix (Tables 14-15)

Total undergraduate student FTEs are projected to increase by 3,893 by 2018-19 relative to 2013-14. This is comprised of planned increases of 1,816 domestic students and 2,077 international students. Graduate student growth of 2,787 FTEs is planned to be primarily domestic, with a modest growth of 94 FTEs in international students.

Overall international enrolment will increase from 15.2% of the University of Toronto's total student population in 2013-14 to 16.6% by 2018-19. The proportion of international students in undergraduate programs will increase from 15.3% to 17.5%. This will be driven primarily by higher international intake targets in Arts and Science, UTM, UTSC and Applied Science and Engineering.

Linking Enrolment Plans to Capital Plans

The Province released the *Major Capacity Expansion Policy Framework* in 2013 to govern future undergraduate expansion in the postsecondary sector either through the creation of new campuses or through major expansion at existing campuses. The University of Toronto is well situated to take advantage of the Framework and will forward a submission for consideration when the Ministry releases its formal call for proposals in 2014. The Framework calls for growth focused on long-term domestic full-time postsecondary students, either through expansion of existing campuses or the establishment of new campuses. In particular, the Framework is looking for initiatives that will accommodate short-term growth of ~1000 students and longer-term growth of 5,000-10,000 students. The University SMA proposals are consistent with these provincial objectives.

Both UTM and UTSC have experienced enormous growth over the last decade and significant growth is planned over the next decade. In the longer-term both campuses plan to grow to over 21,000 total students. The campuses are located in regions where significant future demand for growth is projected. In order to accommodate the planned expansion there is a critical need for new space on both campuses, including space for teaching and research, student services, residences and parking.

In 2011 the Province announced \$52.5 million of capital funding for the North Building and Davis Laboratory renovation projects at UTM; these projects have begun to redress critical space shortages

at UTM. Further investments are planned to accommodate future growth to 15,362 undergraduate students by 2018-19 and to improve outdated academic facilities. Projects include expanded student centre space, additional parking, library renovations, teaching and research labs and greenhouses and the North Building phase 2 project. It is anticipated that funding will be provided through a combination of capital from the Province, operating fund reserves, fundraising and long-term borrowing.

Planning is also underway at UTSC to accommodate growth to 13,800 undergraduate students by 2018-19. The first project will be the Environmental Science and Chemistry building, followed by extensive renovations to the R Wing and Andrews buildings. As with UTM, it is anticipated that funding will be provided through a combination of capital from the Province, operating fund reserves, fundraising and long-term borrowing. UTSC is also currently building an aquatic centre and field house for the Pan Am 2015 games, with funding provided by the Province, the City of Toronto and the University.

The St. George campus is also experiencing capital renewal with a new building for the Faculty of Law, renovations of the historic 1 Spadina for the Faculty of Architecture and Landscape Design, the new Centre for Engineering Innovation and Entrepreneurship for the Faculty of Applied Science and Engineering, and many other projects in the planning stages. Divisions have been very successful at fundraising for these three buildings; however continued support from the Province is essential to ensure that the University of Toronto continues to fulfill its mandate of providing a world-class teaching and research environment for its faculty and students.

Note 1: For direct-entry programs, figures include new intake into upper years and non-degree/special students except for Science w/o Borders. For professional programs, full-time Year 1 provided.

Note 2: 2003-04 was the primary year of accommodating the undergraduate "double cohort" from Ontario secondary schools.

Note 3: The Physician Assistant Program has been and will continue to be a Winter-start program up to January 2014, but will then switch to a Fall-start program as of September 2014 onwards.

Note 4: Arts & Science St. George and Applied Science targets include students transferring from the prior year part-time International Foundation Programs (IFP) into full-time Year 1.

Note 1: Arts & Science St. George and Seneca College's Liberal Arts Program was initiated in 2008-09. UTSC and Seneca College commenced a formal transfer program in 2013-14. Once accepted at UofT these students are not being tracked separately within UofT's enrolment and revenue projection models. Only after-the-fact actuals can be reported using the enrolment count files.

Note 2: 2000-01 is prior to the start of the joint UTM/Sheridan CCIT program (2001-02) and the joint UTSC/Centennial College programs (2003-04).

Graduate	3,042	702	439	601	4,784	63.6%	14.7%	9.2%	12.6%
Total Undergrad & Graduate	12,716	2,184	1,296	2,772	18,968	67.0%	11.5%	6.8%	14.6%

2012-13									
Undergraduate	9,779	1,676	1,123	3,620	16,198	60.4%	10.3%	6.9%	22.3%
Graduate	2,748	877	722	911	5,258	52.3%	16.7%	13.7%	17.3%
Total Undergrad & Graduate	12,527	2,553	1,845	4,531	21,456	58.4%	11.9%	8.6%	21.1%

2013-14									
Undergraduate	9,529	1,598	1,075	3,941	16,143	59.0%	9.9%	6.7%	24.4%
Graduate	3,028	918	774	972	5,692	53.2%	16.1%	13.6%	17.1%
Total Undergrad & Graduate	12,557	2,516	1,849	4,913	21,835	57.5%	11.5%	8.5%	22.5%

* Students' geographic origin determined using "Home province", "County of Residence" and "Admissions Applicant Type" fields in ROSI.

Notes: 1) Undergraduate excludes TST, Transitional Year Program, Academic Bridging Program and Woodsworth diploma & certificate programs.

Intake data is not available for Postgraduate Medical Education.

- 2) Graduate data includes diplomas in Medicine and Music. Excludes TST.
- 3) Excludes Summer and Winter new intakes so programs that start especially in the summer such as DIFA, MBIotech, MMPA are understated.
- 4) Changes to the count program related to selection of permanent address information will contribute to lower GTA figures for 2009-10 onwards.
- 5) Other Countries includes all international students plus domestic students living abroad.

TABLE 19 - Undergraduate and Graduate Intake by Geographic Origin* By Division
