#### PLANNING AND BUDGET OFFICE

TO: Planning and Budget Committee

SPONSOR: Safwat Zaky, Vice-Provost Planning & Budget CONTACT INFO: (416) 978-7116, safwat.zaky@utoronto.ca

DATE: March 5, 2004 for meeting on March 16, 2004

AGENDA ITEM: 5

#### **ITEM IDENTIFICATION:**

• Enrolment Projections Report for 2004-05

#### JURISDICTIONAL INFORMATION:

Excerpt from the terms of reference for the Planning and Budget Committee:

3., 4.1. The Committee is responsible for policy and planning and for monitoring planning activities. Specific areas in which recommendations are made to the Academic Board include enrolment plans and policies.

#### **OTHER ACTION TAKEN:**

N/A

### **HIGHLIGHTS:**

The attached report provides projections for enrolments in undergraduate and graduate programs 2004-05, which is the third and final year of the double cohort in Ontario. Total enrolment will continue to grow, following the plans originally prepared in 2000-01.

Overall, the University expects to admit 14,083 students in all undergraduate programs in September 2004. This includes 10,340 high-school students, which is 444 less than September 2003. Total undergraduate enrolment is projected to increase from 44,099 FTEs in 2003-04 to 46,711 in 2004-05. The increase is partially a result of the flow through of larger intake numbers and partially due to the elimination of the three-year degree in Arts and Science.

Despite the need for growth in Graduate enrolment only a modest increase is planned because of the cap on funding of graduate students by the Government. Graduate enrolment is projected to increase from 10,105 to 10,601 FTEs.

#### FINANCIAL AND/OR PLANNING IMPLICATIONS:

Government has committed to full funding of increased undergraduate enrolments above 2000-01. Exact details are the subject of a new Enrolment Target Agreement, which is currently being negotiated with the Government. Changes in graduate numbers do not affect the University's operating grant because we are already above the cap imposed by the Government.

### **RECOMMENDATION:**

For information only.

#### **ENROLMENT PROJECTION REPORT FOR 2004-05**

## 1. Background

The current decade in Ontario has been characterized by significant increases in demand for university education due to the combined effects of demographic shifts, increased participation rates and changing work place requirements. The impact of these pressures has been exacerbated by the shift from a five-year to four-year high school curriculum, the brunt of which was felt in fall 2003.

In 1999, to prepare for increased demand, the University of Toronto released a *Discussion Paper on Expanding Enrolment* which framed the issues facing the University. Building upon this paper, a *Framework for Enrolment Expansion at the University of Toronto* was developed and approved by Governing Council in April 2000. The *Framework* document provided a policy structure which has informed the University's response to the opportunities and pressures for enrolment expansion over the past three years.

In July 2000, Ontario universities were asked by the Ministry of Training, Colleges and Universities (MTCU) to submit institutional enrolment growth plans for the period 2001-02 through 2005-06. Submissions were made in September 2000 and revisions were requested in January 2001. Revised plans were submitted in 2001 to accommodate the increased demand (compared to original projections) by Ontario applicants in 2003-04 and 2004-05. In response to the Ministry's request, the revised submission also included projections for international student enrolments. The May 2001 Ontario Budget contained an announcement for full average operating grant funding for the projected enrolment increases through to 2003-04. The announcement provided for \$25.8M in 2001-02 increasing to \$200M in 2003-04.

In June 2001, the Provost struck a Working Group on Enrolment Expansion to guide the detailed planning associated with the expansion. The Working Group's efforts resulted in the report *Update on Enrolment Expansion*, *April 2002*. Guided by the *Framework for Enrolment Expansion* and building on earlier MTCU submissions, the *Update* called for Full-time Equivalent (FTE) growth, in steady state, of 6,907 at the undergraduate level and 1,374 at the graduate level. Most of this increase was planned for the University of Toronto at Mississauga and the University of Toronto at Scarborough, with total growth on the St. George campus limited to 3,313.

The University's expansion plans incorporated enrolment changes from various sources:

- program re-structuring;
- growth encouraged by special provincial funding envelopes;
- changes proposed in *Raising Our Sights* plans which could now be funded from the (MTCU) enrolment expansion operating grant;
- growth in direct entry programs to meet increased demand; and
- increases in doctoral stream programs to maintain enrolment balance among the different levels of study.

In June 2002, Governing Council approved the enrolment expansion and the principles for allocating resources for expansion as outlined in the report. In August, MTCU asked all universities to sign an Enrolment Target Agreement (ETA). The ETA defined enrolment targets in terms of undergraduate enrolments (intake and total) eligible for operating grant funding.

A revised enrolment expansion plan, *Update on Enrolment Expansion, December 2002*, reflected the University's 2002-03 ETA. The major revisions from the April update were a steady state increase in Arts and Science enrolment on all campuses of 3,551 and an increase of 500 doctoral stream enrolments. The undergraduate increase was in response to MTCU's upward revision of student demand projections. Discussions with MTCU on graduate student funding, the need for additional teaching assistants to help accommodate larger numbers of direct entry students, and the need to both replace retiring professors and expand the professoriate underlay the upward revision in doctoral stream enrolments. As a result, steady state growth targets were revised to 10,714 undergraduates and 1,874 graduates, for a total increase of 12,588. Of this, 4,899 would occur on the St. George campus. Governing Council approved the revised expansion plan in April 2003.

The University's 2003-04 ETA was finalized in May 2003. It incorporated the flow-through of actual 2002-03 intakes and projected increases in fall 2003 intakes. The increases were in response to MTCU's desire to accommodate a strong demand signaled by a 47% increase in Ontario secondary school applicants for first year places in fall 2003 over fall 2002. As reported to the Planning and Budget Committee on February 3<sup>rd</sup>, 2004, the estimated-actual 2003-04 ETA enrolment expressed in Basic Income Units (BIUs) is less than 1% below its target. Hence, the University will receive full operating grant funding for undergraduate expansion.

## 2. Planned Enrolments for 2004-05

In June 2003, the Working Group on Enrolment Expansion was replaced by the Enrolment Management Committee. The Committee's purpose, according to its Terms of Reference is "...to plan and co-ordinate University activities in regard to enrolment management across all levels of programs, and Divisions and campuses." The Committee met in the spring and fall of 2003 and hosted a Principals and Deans Retreat on Enrolment Management in February 2004. Based on discussions with Faculty representatives prior to the retreat, discussions at the retreat and subsequent feedback to date, enrolment targets for 2004-05 have been established. These targets are fully in concordance with previously approved plans. The enrolment targets for 2004-05 are detailed in Tables 1 and 2. Table 1 gives projected full-time enrolments by incoming/Year 1 students, upper year and special students and total part-time enrolments. Table 2 provides a comparison of projected full-time, part-time and FTE enrolments with actual 2003-04 levels.

## **Undergraduate Direct Entry**

The numbers of secondary school applicants for the Ontario system and the University of Toronto have declined by 30% compared to a year ago, as most of the double cohort has

been accommodated in fall 2003. At the same time, the number of other applicants (those who are not applying directly from Ontario high schools) has increased significantly. Data from the Ontario Universities Application Centre (OUAC) indicate that approximately 12,000 of these applicants are in the category "Prior Year Ontario Secondary School". This is a significant increase in this category, showing that many students who completed high school last year decided to wait for one year before applying to university. In response to this change, two Divisions, UTM and Applied Science and Engineering, have already decided to alter the mix of their intake targets, shifting some enrolments from the secondary to the non-secondary category. Other Divisions will probably make similar adjustments as the admission process progresses. All divisions have expressed confidence that they will be able to meet their enrolment targets without compromising quality.

Significant growth is planned for Arts and Science on all campuses. FTE growth of 726, 799 and 851 is planned for UTM, UTSc and St. George respectively. However, most of the increase on the St. George campus is in Year 4 enrolment due to the disestablishment of the 3-year program starting in 2001-02. All students admitted in fall 2001 are enrolled in a 4-year program and will be proceeding to Year 4 in the fall of 2004.

The growth of 43 FTEs in Applied Science and Engineering reflects the flow-through of elevated intake in 2003. While undergraduate growth targets under the MTCU Access to Opportunities Program (ATOP) have been achieved, certain programs in Engineering must continue to meet required enrolment levels. Physical Education and Health, which agreed to enrolment increases beginning fall 2003, is slated to increase by 26 FTEs. Music enrolments are scheduled to decline by 17 due to a return to pre-double cohort intake levels.

## Second Entry Undergraduate

An increase of 130 FTEs across the three Radiation Science streams reflects the phase-in of Year 3 in the restructured program. The BSc in Dental Hygiene, offered jointly with George Brown College, is a new program scheduled to begin in fall 2004, with a Year 1 enrolment of 80 students.

Intake in B.Sc. Pharmacy increased from 140 in 2000-01 to 180 2001-02. As a result, an increase of 35 FTEs is projected for Year 4 in 2004-05.

Enrolment plans in the MD, BScN and BEd programs are governed by agreements with MTCU that cover enrolment levels and funding from special envelopes. Post-graduate Medicine totals are set at a rolling three year average of actual experience. Law and DDS enrolments are stable with minor variations due to flow through of actual enrolments from fall 2003.

## **Graduate Programs**

Growth is projected in some professional masters programs, either because new programs are still ramping up to planned steady state levels or because of the flow through of high intake levels achieved in previous years. The MScOT and MScPT in the Faculty of

Medicine fall into the first category and the masters programs in the Faculty of Architecture, Landscape Architecture, and Design fall into the second one. Growth in the MN program is covered by an agreement with MTCU to fund increases under a special funding envelope.

The FTE growth of 363 in doctoral stream programs reflects the growth plan in this category included in the enrolment expansion plan, *Update on Enrolment Expansion*, *December 2002*. The projected growth in Arts and Science on all three campuses is a result of the availability of supervisory capacity and the need for additional teaching assistants. The planned reduction in OISE/UT graduate enrolments reflects an earlier decision to lower the PhD intake to 85 per annum beginning 2003-04.

It should be noted that balancing of graduate and undergraduate enrolment requires that we increase graduate enrolment beyond the projections for 2004-05. This is needed to provide a sufficient number teaching assistants and to support the research of the new faculty being hired as a result of expansion at the undergraduate level. However, plans for growth at the graduate level have been put on hold because of the cap on grant funding of graduate students that is currently in place.

## 3. Proposed ETA for 2004-05

Discussions are about to begin with the Ontario Government to prepare a new Enrolment Target Agreement for 2004-05. However, no significant changes are anticipated from the planned numbers that were included in the 2003-04 agreement, as the Government has announced its intention to continue to fully fund the enrolment increases resulting from the double cohort.

It should be noted that the ETA covers only a subset of the University's enrolment. It is limited to that portion of the undergraduate enrolment that is eligible for operating grant funding. As such, it excludes high-fee paying international students and students in self-funded programs. The ETA targets are expressed either as full-time enrolments or as BIUs.

Table 3 provides actual full-time intakes from Ontario secondary schools (101 registrants) and non-secondary schools (105 registrants). It shows the full-time total enrolments for 2000-01, which is the base year for measuring growth, through 2003-04 and planned enrolments for 2004-05. There is a break in the continuity of the full-time enrolment data between 2002-03 and 2003-04 due to the change in the definition for full-time students in undergraduate Arts and Science on all three campuses. Starting in 2003-04, students carrying 60% of a normal load are considered to be full-time students, compared to 80% in previous years. This change in definition does affect the number of BIUs, which is based on the number of courses in which students are enrolled. The University's undergraduate BIUs are adjusted for enrolments funded through special envelopes to produce a net number to be funded by MTCU through its Undergraduate Accessibility Envelope.
