## Enrolment Context

---

The Enrolment Report provides information for two purposes: it reports 2012-13 enrolments in various programs across the University, comparing actual results to enrolment plans; and it also lays out the enrolment projections for the period 2013-14 through to 2017-18. These projections form the basis for planning and for the revenue projections underlying the University's Long Range Budget Guidelines 2013-14 to 2017-18 and the Budget Report 2013-14.

The University of Toronto has grown significantly in the last ten years from 63,000 students in 2002-03 to 82,000 students in 2012-13, an increase of 30%. Undergraduate growth has occurred across all three campuses, with the significant increase beginning when the double cohort entered the post-secondary system in 2003-04 as a result of Ontario eliminating Grade 13. Graduate expansion was enabled by the 2005 Ontario Budget, when the provincial government announced \$220 million to expand graduate enrolment by 14,000 spaces. In 2008 this was increased again to 15,300 spaces.

In the 2011 Ontario Budget the provincial government announced a commitment to fund a further 60,000 new spaces in post-secondary education over the five-year period spanning 2011-12 to 2015-16. The university system share is expected to be 41,000 spaces, including 35,000 undergraduate and 6,000 graduate spaces. The University has been actively engaged in planning across most academic divisions to ensure we participate in the opportunities provided by this next phase of enrolment expansion. Planning has been done in the context of the objectives outlined in *Towards 2030: A Third Century of Excellence at the University of Toronto* and the Strategic Mandate Agreement, submitted to the Ministry of Training, Colleges and Universities (MTCU) in the fall of 2012. The *Towards 2030* report called for undergraduate growth primarily at the University of Toronto Mississauga and the University of Toronto Scarborough, graduate growth across all three campuses and growth in international enrolment. To date, the Ministry has announced allocation details for only 600 of the 6000 graduate spaces. Specific details on allocation of the remaining 5,400 seats to individual universities are not currently available. The government has also extended the target for full expansion of the 6,000 spaces to 2017-18 in light of lower than expected graduate enrolment in 2011-12 in many universities and the province's fiscal circumstances.

This report provides enrolment details for 2012-13, with comparisons of actual enrolments to initial plans. It also provides some data on enrolment history. Projections based on current University plans are also provided. By 2017-18 the University projects to have over 90,000 students.

Overall, the data presented in the following sections demonstrate that the University's recruitment and enrolment management strategies are enabling us to achieve our enrolment plans. Graduate expansion in the research stream has been somewhat slower than originally anticipated, consistent with many other research intensive universities in Ontario. Expansion in the professional master's stream has been very successful, with continued growth planned across many existing and new programs. The University of Toronto continues to attract a large number of very high-quality student applicants, both domestically and internationally, and to meet its enrolment targets. The enrolment report is intended to facilitate comprehensive monitoring of the University's progress towards its objectives.

## An Overview of 2012-13 Enrolment

---

### *Total Enrolment 2012-13 (Tables and Charts 1 and 2)*

Enrolment is generally reported in one of two ways: headcount, which is a measure of the number of students enrolled, and full-time equivalent (FTE), which is a measure of course load activity of the students enrolled. A normal course load in Arts and Science is five full courses. A student taking a full course load of five courses is counted as one FTE. A student taking four full courses is counted as 0.8 FTE. In 2012 there are 82,078 students (71,045 FTE) enrolled at the University of Toronto, which is an increase of 1,796 students (2.2%) over 2011-12. There are 66,426 undergraduate students (56,547 FTE) and 15,652 graduate students (14,498 FTE). Our students are spread across three campuses and the Toronto School of Theology (TST): St. George has 50,702 FTE, the University of Toronto Mississauga (UTM) has 10,355 FTE, the University of Toronto Scarborough (UTSC) has 9,253 FTE and TST has 734 FTE. The Toronto School of Theology is an ecumenical group of seven colleges offering some of their programs conjointly with the University of Toronto. It should be noted that although the tables accompanying this report include a breakdown of undergraduate Arts and Science FTEs by field of study, because many students graduate with specialists and/or majors in more than one field, this breakdown should not be viewed as a precise accounting. It is only indicative of broad trends.

Professional Master's FTEs are reported by campus because these programs are campus-based programs. Doctoral stream Master's and PhD enrolments are reported on a tri-campus because of the unitary administrative structure for most of these degree programs.

### *Undergraduate Enrolment 2012-13 (Tables and Charts 3, 4, 5)*

The first five years of the previous decade were characterized by significant undergraduate expansion, followed by much more modest increases up to 2008-09, and a return to more significant growth since then, bringing total undergraduate student FTEs to 56,547 in 2012-13.

Student enrolment in 2012-13 is 756 FTEs (1.4%) above target. The number of undergraduate FTEs increased in most programs over 2011-12. Actual overall intake in Fall 2012 was 336 (2.1%) over planned levels. The average grade of the 2012-13 incoming Arts and Science class is 84.7%, which is slightly higher than the averages over the previous three years. Despite the significant increase in intake levels since 2002-03, the University has maintained the quality of its undergraduate Arts and Science student body.

A significant number of students benefit from collaboration between the University of Toronto and other institutions. A total of 2,045 (3.6%) of the University's undergraduate FTEs study in programs offered jointly with external or affiliated institutions. In addition, 813 students came to the University of Toronto after studying at an Ontario College of Applied Arts and Technology.

### *Graduate Enrolment: 2012-13 (Tables 6-13)*

As part of the 2005 Budget, the Ontario Government announced that by 2009-10 an additional \$220M would be made available to expand graduate enrolment in Ontario universities. This funding is

intended to support a system-wide growth of 14,000 graduate spaces over 2002-03 levels. Initially, 12,000 spaces were allocated in June 2006 for expansion to be achieved by 2007-08 (Phase 1).

The Provincial program presented an excellent opportunity for the University of Toronto to increase the number of graduate students and strengthen its research enterprise. The University undertook an extensive planning process, the results of which are described in a document entitled *A Framework for Graduate Expansion 2004-05 to 2009-10*. These plans were approved by Governing Council on December 14, 2006.

In Phase 1, the University of Toronto received approval from the Ministry to increase enrolment by up to 2,134 eligible student FTEs by 2007-08 relative to 2004-05. The expansion envisioned in the Framework document was based on this allocation and on the University's academic plans at that time as developed by the heads of various graduate units.

Phase 2 was announced in February 2009. The University was allocated 2,722 spaces relative to 2004-05, comprised of 1,709 Master's and 1,013 PhDs. It was also announced that funding would be phased-in to 2011-12 with an additional two years, if necessary, to achieve the end-state targets.

Subsequent to the Phase 2 allocations and in response to increased Master's demand, especially Professional Master's, the University continued to advocate to the Ministry for increased flexibility or "fungibility" between the Master's and PhD pools. After a mid-program review of the graduate expansion initiative, the Ministry announced in December 2009 that it would provide a one-time opportunity for institutions to convert up to 50% of their remaining spaces that had yet to be realized as of 2007-08 between the two pools on a grant-neutral basis. The University of Toronto received permission to convert 263 PhD spaces to 500 additional Master's spaces. End-state targets for Phase 2 were set at 7,031 Master's and 3,853 PhDs, which represents growth relative to 2004-05 of 2,209 Master's and 750 PhDs.

As a result of the Ministry announcement of the next phase of undergraduate and graduate expansion as part of the 2011 provincial budget, Phase 2 of graduate expansion was concluded in 2011. Expansion will continue under Phase 3. In June 2012, the provincial government allocated 600 of the 6,000 Phase 3 graduate spaces for 2012-13 with the remaining 5,400 spaces still to be allocated. The University has been allocated 7,074 Master's and 3,877 PhD spaces, which represents growth relative to 2004-05 of 2,252 Master's and 775 PhDs. The government has also extended the target for full expansion of the 6,000 spaces to 2017-18 in light of lower than expected graduate enrolment in 2011-12 and the province's fiscal circumstances. The University is 420 eligible FTEs below its approved allocation, comprised of 287 Master's below and 133 PhDs below the respective targets. The corresponding increase relative to 2002-03 is 3,447 eligible FTEs, which will be the basis for determining the amount of capital funding to be received from the government.

Since 2002-03, enrolment in graduate professional Master's programs has increased by almost 84%, and doctoral enrolment has grown by over 36%. At the same time, doctoral-stream Master's enrolment has increased by 8.1%.

### *Geographic Origin of Incoming Students 2012-13 (Tables and Charts 18-19)*

A large proportion of incoming undergraduate students, almost 61% in 2012-13, come from the Greater Toronto Area. Another 10% are from other areas in Ontario, 7% from other provinces in Canada and the remaining 22% from other countries. Of the incoming class of graduate students 52% is drawn from the GTA, 17% are from other areas in Ontario, 14% from other provinces in Canada, and 17% from other countries.

### *International Enrolment 2012-13 (Tables and Charts 14-19)*

The number of international students has been growing steadily since 1997-98 when they represented only 3.8% of the total student population. Today, 14% of the University of Toronto's students come from outside Canada. International students represent 14.1% of the undergraduate population and 13.6% of graduate students.

The total number of international students admitted has been steadily increasing, but there can be significant year-to-year fluctuations in percentage increases in smaller divisions where the numbers are small. Also, intake statistics are influenced by international events and changes in government funding.

In 2012-13, total international intake increased by 19.2% relative to the previous year, with an increase of 29.3% in graduate and an increase of 16.7% in undergraduate admissions.

The University draws many of its international students from Asia and the Americas. The top countries for undergraduate students are China (48%), South Korea (7%), India (4%) and the United States (3%). For graduate students, the top countries are China (27%), the United States (17%), India (10%) and Iran (8%). International undergraduate students came from 143 countries while international graduate students came from 109 countries.

## **Projected Enrolment 2013-14 to 2017-18**

---

### *Projected Undergraduate Enrolment (Tables and Charts 3, 4, 5)*

The University's plan is to increase its undergraduate enrolment by 4,118, reaching 60,665 FTEs by 2017-18. This is a result of a reduction of 801 in Arts and Science at St. George offset by increases of 1,698 at UTSC and 2,376 at UTM. The introduction of a Bachelor of Arts program in Architecture is projected to add 227 FTEs by 2017-18. Applied Science and Engineering is projected to reduce its undergraduate enrolment by 110 FTEs as part of a plan to rebalance its undergraduate/graduate mix. Kinesiology and Physical Education will increase by 112 FTEs while Music will grow by 24 FTEs by 2017-18.

The number of students in professional faculties is projected to increase by 617 FTEs to 8,842 FTEs primarily due to increases within several Medicine programs. OISE's plans reflect the Ministry-mandated reduction to its 3-term BEd levels to be reached by 2012-13 and then maintained.

By 2017-18, St. George Arts and Science intake will be held constant to 5,899 full-time students, in accordance with its updated December 2011 plans. Intake at UTSC will be increased by 198 to 3,329 full-time students per annum while UTM plans will admit 3,692 full-time students, 587 more than its 2012-13 intake plans. Applied Science and Engineering will reduce its full-time intake target by about 66 relative to its average intake over the last three years. Architecture will increase its intakes by 45 relative to its 2012-13 plans. Kinesiology and Physical Education will maintain its current planned intake level of 250 full-time students per annum while Music will reach and then maintain a full-time intake of 155 students per annum as of 2014-15. There are no significant planned intake changes for the other undergraduate professional programs.

### *Projected Graduate Enrolment (Tables 6-13)*

The University of Toronto currently educates 23% of Masters students and 32% of PhD students in Ontario. Our plans are to significantly expand on this.

The University's December 2006 *Framework for Graduate Expansion* envisioned an increase of 4,400 students relative to 2002-03, conditional on the availability of resources, including operating grant, capital, and student support funding. This was reinforced in the *Towards 2030* plan. End-state targets and enrolment projections have been updated to reflect the most recent review of divisional plans by the Provost within the context of the Phase 3 graduate expansion strategy. As mentioned above, final allocations from the Ministry have not yet been received.

Projections to 2017-18 show that total FTE growth including international students is expected to continue to occur primarily within the professional Master's and doctoral categories. The rapid growth in Professional Master's enrolments reflects the rising importance of these programs and the increased number of offerings at the University. The increase in doctoral students is indicative of the growing intensity of research and scholarship.

The University will continue to monitor funding availability to ensure that the quality of the graduate student experience is not affected due to lack of funding. Further adjustments to long-term enrolment plans will be made as necessary in order to ensure the institutional end-state targets are met and to stay within the Phase 3 allocations once these are determined.

### *Projected Undergraduate/Graduate Enrolment Balance (Chart 2c)*

In 2002-03, undergraduate enrolment represented 80% of the total student body, rising slowly as the undergraduate double cohort progressed towards graduation, and then dropping back to 79.6% in 2012-13 as a result of graduate expansion. Graduate students are projected to increase to 22.3% of the student population over the next five years. At the St. George campus, graduate students are projected to increase from 27.6% to 31.3% (based on counting all doctoral stream students as St. George students; this will modify slightly as UTM and UTSC develop more campus-based doctoral stream programs).

### *Projected Domestic/International Mix (Table 15)*

Total undergraduate student FTEs are projected to increase by 4,118 by 2017-18 relative to 2012-13. This is comprised of planned increases of 2,328 domestic students and 1,790 international students.

Graduate student growth of 2,882 FTEs is planned to be primarily domestic, with a modest growth of 313 FTEs in international students. Overall international enrolment will increase from 14.6% of the total FTE student population in 2012-13 to 15.9% by 2017-18. Undergraduate enrolment will increase from 14.4% to 16.4%. This will be driven primarily by significantly higher international intake targets in Arts and Science (18-20%), UTM (16-17%), UTSC (17.5-17.8%) and Applied Science and Engineering (25%)

### *Longer-term Enrolment Planning and Demand*

In June 2007, the President initiated a visioning exercise to develop long-term plans for the Year 2030. Five task forces were established to examine all aspects of the University, including long-term enrolment patterns. Their deliberations extended into the spring of 2008 and the resulting reports informed and guided a *Synthesis Report* prepared by the President. The process then culminated in *Towards 2030: A Long-Term Planning Framework* which identified strategic directions for the University of Toronto based on the *Synthesis Report*. The *Framework* will help guide future academic planning at the institutional, divisional, and departmental levels. Following are some excerpts from the *Framework* in the areas of enrolment planning, institutional balance, and student recruitment.

- No enrolment decisions will be taken without careful consideration of the long-term implications for the University's self-defined role and aspirations. Enrolment planning will also consider all relevant financial implications and potential impacts on both the quality of the student experience and the quality of working life for faculty and staff.
- The University's enrolment strategies will reinforce its unique strengths in research and scholarship, as well as our acknowledged leadership position in graduate and second-entry professional education provincially and nationally.
- The University will support the continued development of three differentiated campuses under a single University-wide administration.
- The University will focus on the re-development and enhancement of its three primary campuses and will not develop a fourth campus or major satellite operations.
- The University acknowledges the goal of modest reductions in undergraduate enrolment on the St. George campus, along with continued growth in graduate education.
- The University acknowledges that UTM and UTSC envisage growth in a range of professional Master's programs, along with doctoral stream expansion in selected disciplines ... For undergraduate enrolment, the presumptive expansion across the two campuses combined is approximately 5000 places for students.
- The University affirms the importance of increasing its national and global presence by recruiting, respectively, more students from outside of the Toronto region and more students from abroad. These general goals will be balanced against the University's regional and provincial responsibilities.

### *Linking Enrolment Plans to Capital Plans*

Both UTM and UTSC have experienced unprecedented surges in enrolment over the last decade and are located in regions where significant future demand for growth is projected. The new Instructional buildings at each campus and the \$52.5 million of capital funding announced for the North Building and Davis Laboratory renovation projects at UTM have begun to redress critical space shortages. Further investments are planned to accommodate future growth and improve outdated academic facilities. UTM is also planning an extensive renovation of the Kaneff centre to help accommodate growth to 15,229 undergraduate students by 2017-18. Plans are underway at UTSC for an Advanced Science Institute building to help accommodate their growth to 13,061 undergraduate students by 2017-18. In the longer-term both campuses plan to grow to over 21,000 total students. The St. George campus will increasingly reflect the shift in undergraduate demand towards engineering, sciences and specialized programs. The University also plans to expand its graduate enrolment further over the next five years to bring our total proportion of graduate students to a level more in line with other research-intensive international peers. These shifts will need to be considered carefully as space plans are developed.

<b>TOTAL FULL-TIME YEAR 1/NEW INTAKE</b>	<b>13,719</b>	<b>15,466</b>	<b>14,464</b>	<b>15,724</b>	<b>16,068</b>	<b>16,404</b>	<b>336</b>	<b>680</b>	<b>16,616</b>	<b>16,893</b>	<b>17,005</b>	<b>17,057</b>	<b>17,098</b>

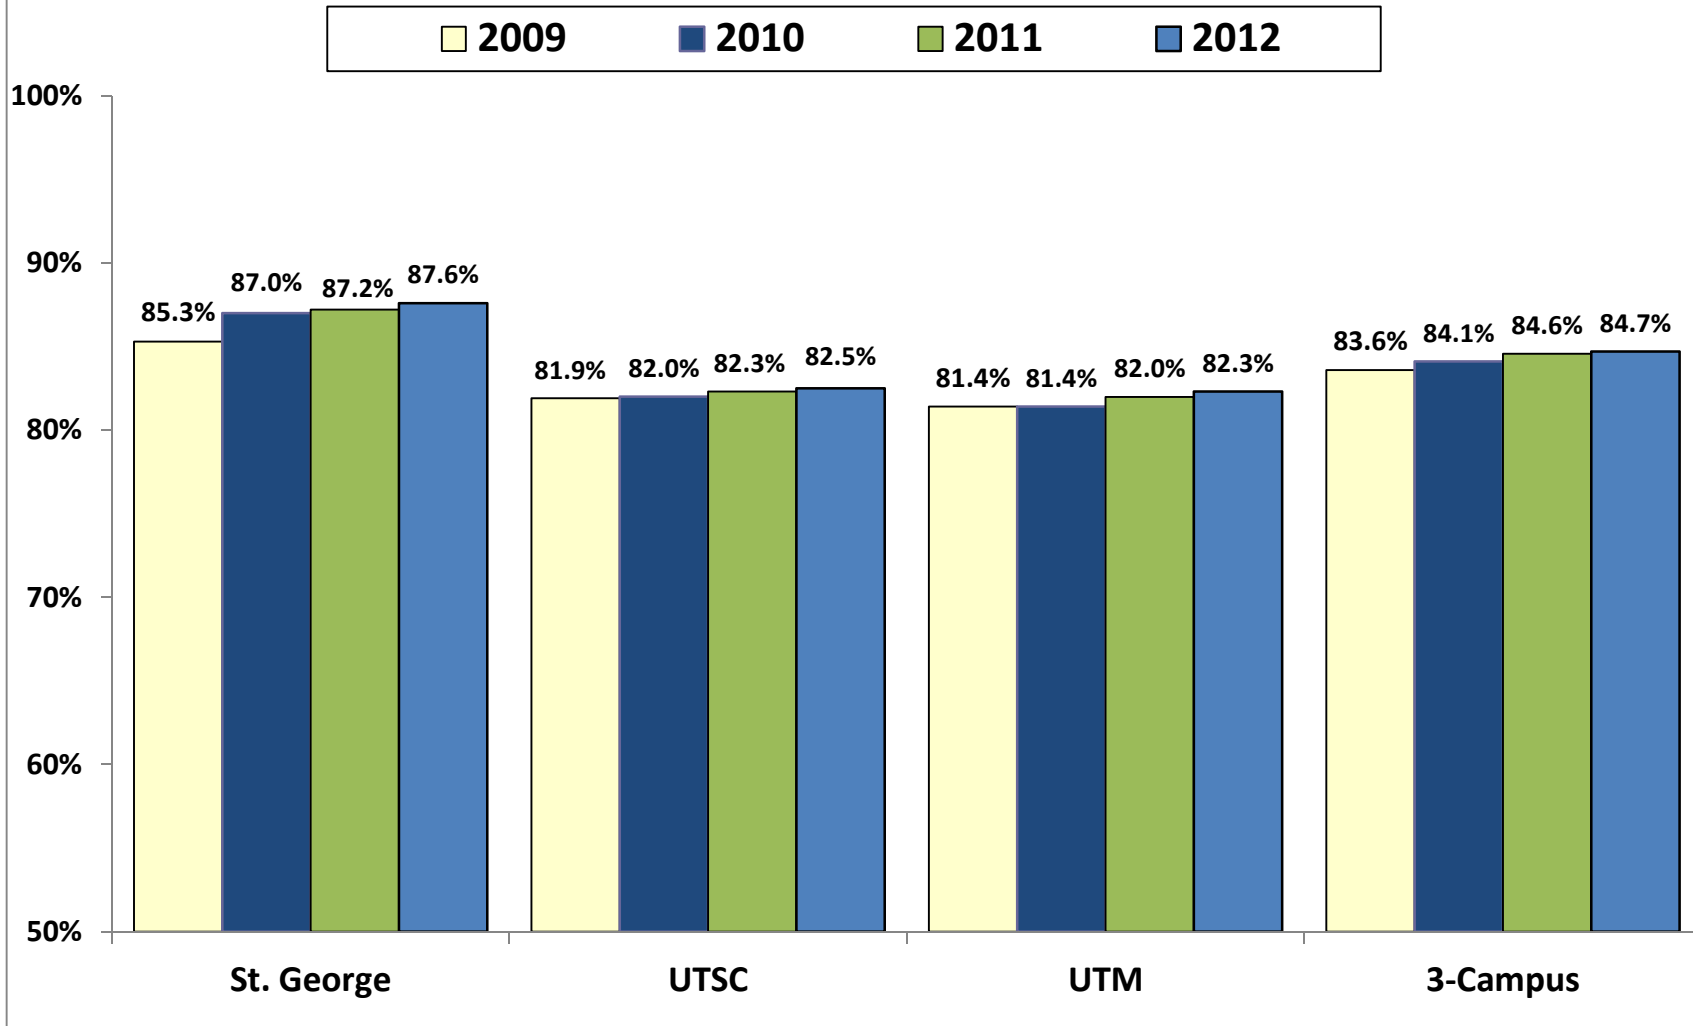

Note 1: For direct-entry programs, the new intake figures include new intake into upper years and non-degree/special students. For professional programs, full-time Year 1 enrolment is provided.

Note 2: 2003-04 was the primary year of accommodating the undergraduate "double cohort" from Ontario secondary schools.

Note 3: The Physician Assistant Program has been and will continue to be a Winter-start program up to January 2014, but then might switch to a Fall-start program as of September 2014 onwards.

Note 4: Arts & Science St. George and Applied Science targets include students transferring from the prior year part-time International Foundation Programs (IFP) into full-time Year 1.

Note 1: Arts & Science St. George and Seneca College's Liberal Arts Program was initiated in 2008-09, although once accepted at UofT these students are not being tracked separately

After-the-fact actuals can be reported using the enrolment count files.

Note 2: 2,700 students generated the 2,045 FTEs reported for external and affiliated institutions in 2012-13.

Note 3: An additional 813 students totalling 609 FTEs in 2012-13 applied from Ontario Colleges of Applied Arts & Technology and then registered in UofT-only programs.

Note 4: 2000-01 is prior to the start of the joint UTM/Sheridan CCIT program (2001-02) and the joint UTSC/Centennial College programs (2003-04).

\* Students' geographic origin determined using "Home province", "County of Residence" and "Admissions Applicant Type" fields in ROSI.

Notes: 1) Undergraduate excludes TST, Transitional Year Program, Academic Bridging Program and Woodsworth diploma & certificate programs.

Graduate data includes diplomas in Medicine and Music. Excludes TST.

2) 2006-07 was the fourth year of accommodating the "double cohort" from Ontario secondary schools.

3) Intake data is not available for Postgraduate medical programs that start especially in the summer such as DIFA, MBIotech, MMPA are understated.

4) Changes to the count program related to selection of permanent address information will contribute to lower GTA figures for 2009-10 onwards.

5) Other Countries includes all international students plus domestic students living abroad.

6)
