DATE: February 8, 2017 for February 27, 2017

AGENDA ITEM: 1(d)

ITEM IDENTIFICATION:

Enrolment Report for 2016-17

JURISDICTIONAL INFORMATION:

According to Section 4.1 of the Planning & Budget Committee Terms of Reference, the Committee is responsible for policy on planning. Enrolment plans and policies are among the specific areas in which recommendations are made to the Academic Board.

The Business Board receives the annual enrolment report as context for its consideration of the tuition fee schedules.

GOVERNANCE PATH:

1. **Business Board [for information] (February 27, 2017)**
2. Planning and Budget Committee [for information] (March 1, 2017)
3. Academic Board [for information] (March 16, 2017)

PREVIOUS ACTION TAKEN:

The *Enrolment Report, 2015-16* was reviewed by the Planning & Budget Committee at its March 2, 2016 meeting and by the Academic Board at its March 17, 2016 meeting.

It was received for information by the Business Board at its February 29, 2016 meeting.

HIGHLIGHTS:

Enrolment drives the largest portion of University operating revenue; in 2017-18, 88% of the budgeted \$2.5 billion in revenue is tied directly to students through provincial operating grants and student fees. It is because of this that the Enrolment Report is a key source of information that accompanies the annual Long Range Budget Guidelines. The Enrolment Report provides information on 2016-17 enrolments,

comparing actual results to enrolment plans and it lays out the enrolment projections for the period 2017-18 through to 2021-22.

Enrolment planning at the University of Toronto is driven by institutional and divisional academic plans. Over the last several years, enrolment plans have been guided by the University's strategic plan as outlined in *Towards 2030: A Third Century of Excellence at the University of Toronto*, the *President's Three Priorities* and the Strategic Mandate Agreement (SMA1, 2014-17) signed by the Province and the University in 2014. The next round of SMA negotiations for the 2017-2020 period (SMA2) will occur in spring 2017.

The University of Toronto has grown significantly over the last two decades to just under 89,000 students in 2016-17. Undergraduate and graduate growth has occurred across all three campuses. Towards 2030 and divisional plans call for further undergraduate growth primarily at the University of Toronto Mississauga (6% growth planned) and the University of Toronto Scarborough (9% growth planned) by 2021-22.

The University of Toronto's graduate enrolment plans are based on the rolled-up plans and academic priorities of the divisions. The rapid growth in professional master's enrolments reflects the rising importance of these programs, the increased demand from students and the increased number of offerings at the University. Twenty-six new professional master's offerings have been introduced since 2006-07. The increase in doctoral students over the last decade is indicative of the growing intensity of research and scholarship.

There are 17,029 graduate students at the University in 2016-17 (measured in Fall FTE). Aligned with *Towards 2030* and our current SMA, the provincial graduate expansion program presents an excellent opportunity for the University of Toronto to increase the number of graduate students and strengthen its research enterprise.

Consistent with the University of Toronto's ranking amongst the world's top 25 universities, internationalization has been an academic goal pursued across many divisions; most divisions are now close to their long term goals. In 2016-17, 19.7% of all students were international students and plans are to grow slightly to 20.1% by 2021-22. There is a higher proportion of international students in undergraduate programs (20.5%) than there is in graduate programs (16.5%). Over the last few years there have also been efforts to attract more students from across Canada; students from other provinces have increased from 8.6% of total enrolment in 2011-12 to 9.9% in 2016-17.

Overall, the data presented in this report demonstrate solid progress toward our long-term enrolment goals. The University of Toronto continues to attract a large number of high-quality students, both domestically and internationally.

FINANCIAL IMPLICATIONS:

Enrolment projections underlie the University's *Long Range Budget Guidelines 2017-18 to 2021-22 and Budget Report 2017-18*.

RECOMMENDATION:

For information only.

DOCUMENTATION PROVIDED:

Enrolment Context and Overview

Enrolment drives the largest portion of University operating revenue; in 2017-18, 88% of the budgeted \$2.5 billion in revenue is tied directly to students through provincial operating grants and student fees. It is because of this that the Enrolment Report is a key source of information that accompanies the annual Long Range Budget Guidelines. The Enrolment Report provides information on 2016-17 enrolments, comparing actual results to enrolment plans and lays out the enrolment projections for the period 2017-18 through to 2021-22.

Enrolment is generally reported in one of two ways: headcount (HC), which is a measure of the number of students enrolled, and full-time equivalent (FTE), which is a measure of course load activity of the students enrolled. A normal course load in Arts & Science is five full courses. A student taking a full course load of five courses is counted as one FTE. A student taking four full courses is counted as 0.8 FTE. Students eligible for provincial operating funding are described as “eligible FTE” in this report. Generally speaking eligible students are domestic students; domestic graduate students remain eligible for a set period of time (generally equivalent to five years of graduate study), beyond which they become “ineligible”.

Enrolment at the University of Toronto is grouped into five broad categories. The tables and charts included in this report often report enrolment data in these categories.

1. Direct-entry undergraduate

- Arts & Science at St. George, UTM and UTSC – Bachelor’s degrees
- Applied Science & Engineering – BASc
- Architecture, Landscape & Design – HBA
- Kinesiology & Physical Education – BKIN, BPHE
- Music – BMus, ACP, DOP
- Transitional Year Program – non-degree programs

2. Second-entry undergraduate

- Dentistry – DDS
- Law – JD
- Medicine – MD, Physician Assistant and Radiation Sciences
- Nursing – BScN
- Pharmacy – PharmD
- Woodsworth – certificates in TESOL and HRM

3. Graduate professional master’s

- There are over 60 professional master’s programs at the University of Toronto. Examples include MBA, MEnvSc, MMI. Professional master’s are generally, but not always, a terminal degree.

4. Graduate doctoral stream master's

- These are master's programs in the research stream that lead into a doctoral program.

5. Doctoral: (sometimes just referred to as PhD as PhDs make up by far the largest portion)

- PhD
- DMA
- DMin
- EdD
- SJD
- ThD

The tables in this report generally include one year of historical data (2015-16), data for the current year (2016-17) and projections to 2021-22. The charts included in this report focus on a longer timeline and present data 5 years prior to the current year (back to 2011-12) and projections for 5 years forward to 2021-22, where appropriate.

Enrolment planning at the University of Toronto is driven by institutional and divisional academic plans. Over the last several years, enrolment plans have been guided by the University's strategic plan as outlined in *Towards 2030: A Third Century of Excellence at the University of Toronto* and the *President's Three Priorities*. Looking ahead, enrolment plans will continue to be guided by these strategic plans as well as our Strategic Mandate Agreements with the Province.

The University of Toronto has grown significantly over the last two decades to just under 89,000 students in 2016-17. Undergraduate and graduate growth has occurred across all three campuses. *Towards 2030* and divisional plans call for further undergraduate growth primarily at the University of Toronto Mississauga (UTM) with 6% growth planned and the University of Toronto Scarborough (UTSC) with 9% growth planned by 2021-22. Plans are also underway for increased graduate intensification, with the overall graduate portion of students increasing from 21.8% of total FTE enrolment in 2016-17 to 23.2% over the next five years. At the St. George campus specifically, the proportion of graduate students has already grown from 26.7% in 2011-12 to 29.4% in 2016-17, and is projected to increase further to almost 32% by 2021-22. It should be noted that professional master's FTEs are reported by campus because these programs are campus-based. Doctoral stream master's and PhD enrolments in the Arts & Science divisions are generally reported on a tri-campus basis because of the unitary administrative structure for most of these degree programs. It is recognized that faculty members at UTSC and UTM also supervise graduate students on the St. George campus; these numbers are not reflected above as these data are not available from the student information system.

Consistent with the University of Toronto's ranking amongst the world's top 25 universities, internationalization has been an academic goal pursued across many divisions; most divisions are now close to their long term goals. In 2016-17, 19.7% of all students were international students and plans are to grow slightly to 20.1% by 2021-22. There is a higher proportion of international students in

undergraduate programs (20.5%) than there is in graduate programs (16.5%). As Canada's most highly ranked university, there have also been efforts to attract more students from across Canada; students from other provinces have increased from 8.6% of total intake in 2011-12 to 9.9% in 2016-17.

Overall, the data presented in this report demonstrate progress toward our long-term enrolment goals. The University of Toronto continues to attract a large number of high-quality students, both domestically and internationally.

It should be noted that data in this report for 2014-15 and subsequent years include students in Toronto School of Theology (TST) conjoint programs, unless otherwise noted. The TST is an ecumenical group of seven colleges offering some of their programs conjointly with the University of Toronto.

Undergraduate Enrolment

In 2016-17, the University of Toronto has 70,728 undergraduate students, an increase of 302 students over 2015-16. Most of the University's growth over last year occurred at UTM (509 FTE), UTSC (261 FTE) and the Daniels Faculty of Architecture, Landscape & Design (112 FTE). Enrolment in second-entry undergraduate programs such as Medicine MD, Dentistry DDS, Pharmacy PharmD, Law JD and Nursing BScN has remained fairly flat year-over-year, in accordance with academic plans and provincial funding agreements. Enrolment in the Faculty of Applied Science & Engineering declined modestly by 162 FTE, as planned, and in Arts & Science by 343.

It should be noted that although the tables accompanying this report include a breakdown of undergraduate Arts & Science FTE by field of study, many students graduate with specialists and/or majors in more than one field so this breakdown should not be viewed as a precise accounting. It is only indicative of broad trends, such as a gradual shift over the last five years towards the Sciences on all three campuses.

In 2013 the Ministry of Advanced Education and Skills Development (MAESD) and the Ministry of Education jointly announced changes in Ontario's initial teacher education program (BEd). Changes included doubling the length of the undergraduate program to two years, while maintaining the number of enrolment spaces currently available in the system, thus reducing the number graduates entering the teaching profession by about half. In response to these changes the University of Toronto negotiated an agreement with the Province, as part of the Strategic Mandate Agreement (SMA1), to end the undergraduate teacher education program and focus on teacher education at the graduate level, in line with OISE's position as a leader in research-intensive teaching and learning. OISE is in the process of converting its 1,167 B.Ed spaces into approximately 500 graduate spaces, and is building on its existing Master of Teaching (MT) and Master of Arts, Child Study & Education (MA-CSE) programs.

The University's plan is to increase undergraduate enrolment by 1,152 FTE (2%) over the next five years.

The following are a few highlights regarding undergraduate enrolment:

- Overall the University essentially met its 2016-17 enrolment target (-0.2% variance on 61,413 target);
- UTSC plans to increase by just under 1000 FTE (9%) by 2021-22;
- UTM plans to increase by just under 700 FTE (6%) by 2021-22;
- An overall reduction of about 500 FTE (-1%) at the St. George campus is planned by 2021-22;
- The Faculty of Arts & Science St. George came in slightly below its undergraduate enrolment target in 2016-17 (570 students or 2%); outer year plans have been adjusted slightly downward with a steady state target of just under 24,000 FTE;
- The Faculty of Applied Science & Engineering plans to reduce undergraduate enrolment over 5 years by about 300 FTE (-6%) as part of a graduate intensification plan.
- The Daniels Faculty of Architecture, Landscape & Design is very close to reaching its steady state target of 900 FTE by 2021-22
- The Faculty of Music is essentially at its steady state target of just under 600 FTE;
- The Faculty of Kinesiology & Physical Education will maintain a steady-state target of just over 900 FTE;
- The number of students in professional faculties is projected to remain relatively constant by 2021-22, at just over 7,000 FTE. Domestic enrolment in some of these programs is regulated by separate funding agreements with the Province (MD and BScN)
- OISE will decline by a further 134 FTEs as the phase-out of the Concurrent Teacher Education program is completed
- Over half of incoming undergraduate students, 54.1% in 2016-17, come from the Greater Toronto Area (GTA) and another 8.4% are from other areas in Ontario.
- Comments on international enrolment are included in the section below.

The University has maintained the quality of its undergraduate Arts & Science student body as measured by entering averages over the last five years. Entering averages continue to increase across all three campuses: in the Faculty of Arts & Science St. George from 87.2% to 89.4%, at UTSC from 82.3% to 84.5%, at UTM from 82% to 83.3% and in the Faculty of Applied Science & Engineering from 90.4% to 93.1%.

Aligned with the current SMA, the University of Toronto provides a variety of pathways for students and opportunities for students to participate in programs in collaboration with other institutions. In 2016-17, 3,092 (4.4%) of the University's undergraduate students study in programs offered jointly with external or affiliated institutions and 808 (1.1%) students came to the University of Toronto after studying at an Ontario College of Applied Arts and Technology. There were also 4,352 (6.2%) students registered in 2016-17 who came from another Canadian university, CEGEP, or non-Ontario college.

Graduate Enrolment

As Canada's leading research intensive university, strong graduate programs are critical to institutional and divisional plans. Even with significant graduate expansion in many Ontario universities over the last decade, the University of Toronto continues to enrol almost 30% of all provincial doctoral students and 23% of master's students.

Over a decade ago, the University undertook an extensive planning process, the results of which are described in a document entitled *A Framework for Graduate Expansion 2004-05 to 2009-10*. These plans were approved by Governing Council in 2006. Graduate expansion has unfolded in three phases, described below.

Phase 1 began in 2004 when the University of Toronto received approval from the MAESD to increase enrolment to 6,192 master's and 3,867 PhD funded spaces.

Phase 2 was announced in 2009 when our allocations were revised to 7,031 master's and 3,853 PhDs funded spaces. The slight decrease in the number of PhD spaces was the result of our request to convert some PhD spaces into master's spaces to keep pace with the rapid growth in master's level enrolment. Phase 2 of graduate expansion was concluded in 2011.

Expansion is continuing under the Strategic Mandate Agreement process with 7,925 master's and 3,925 PhD approved provincially-funded spaces in 2016-17.

The University has achieved strong master's growth this year which now puts us 66 spaces above our 2016-17 SMA1 allocation, reaching a total of 8,471 eligible FTE. The University of Toronto is one of four institutions in Ontario that exceeded its SMA1 master's target, which sets the stage for the upcoming SMA2 negotiations in spring 2017. The SMA1 master's allocation of graduate spaces is accompanied by a gradual, revenue-neutral conversion of OISE's undergraduate teacher education (BEd) spaces into 502 additional graduate Master of Teaching (MT) and Child Study & Education (MA-CSE) spaces by 2019-20. Rapid growth in professional master's enrolment reflects the rising importance of these programs, the increased demand from students and the increased number of program offerings at the University. Twenty-six new professional master's offerings have been introduced since 2006-07. Divisional plans call for almost another 1,000 funded master's spaces over the next five years; this will be discussed as part of the SMA2 and SMA3 negotiations. It is important to note that the Ministry considers professional master's and research master's spaces as one category for funding purposes.

After a period of rapid expansion, recent growth in eligible (BIU-funded) doctoral enrolment has been more challenging, with a decline of 25 spaces over the prior year to 3,727 eligible FTE in 2016-17, 198 spaces short of our allocation; this challenge is consistent with other Ontario universities. Overall, the Ontario system has 1,400 unfilled graduate spaces in 2016-17. We plan to request permission to retain

the 198 unfilled spaces in SMA2, and to seek further spaces in SMA3, as divisions have growth plans of about 500 eligible spaces over the next five years.

The Province retains 2,000 spaces (over and above the 1,400 unused spaces) from the 2011 Ontario Budget allocation. For revenue planning purposes, the budget assumes the University will retain its normal share of this pool.

The Ontario Government announced last year that it would allow universities to claim a limited number of international doctoral level graduate students for provincial funding. Starting in 2015-16, the University of Toronto was deemed eligible to claim up to 38 International doctoral students towards our graduate expansion targets. While the number of spaces is relatively small, this represents a significant policy shift for the Government and is the result of substantial advocacy work by the University and a number of our peers. Further discussion on international graduate enrolment is included in the section below.

Divisional plans will be re-calibrated, if necessary, once the final MAESD allocations are known. The University continues to monitor funding available to students in doctoral stream programs to ensure that the quality of the graduate student experience is maintained. Several divisions have recently increased funding for graduate students in the “funded cohort”; in Arts & Science base funding packages were raised by \$1,500 in 2016, and packages will go up again in 2017 and 2018.

International Enrolment

The number of international students at the University of Toronto has grown steadily over the last decade, reaching 17,452 FTE in 2016-17, which is 19.7% of total enrolment. International students make up 20.5% of the undergraduate population and 16.5% of the graduate population. The University has essentially reached its undergraduate long term goal of 21% by 2021-22. The proportion of international students in graduate programs is projected to remain at just under 17% by 2021-22, however there would be significant demand for more international doctoral students if additional funding were available from the Province. The University will continue its advocacy efforts for increased flexibility to fund additional international PhD spaces through the SMA negotiation process.

The University’s reputation attracts **students from 165 countries and regions**. The top 5 countries for undergraduate students are China (63%), India (4%), South Korea (3%), the United States (2%) and Hong Kong (2%). Brazil has fallen out of the undergraduate top 15 as the Science without Borders program draws to a close. For graduate students, the top 5 countries are China (35%), the United States (12%), India (11%), Iran (4%) and South Korea (3%). Divisions are pursuing recruitment strategies to attract international students from more diverse source countries. The introduction of the new Lester B. Pearson Scholarship program has been launched to attract outstanding students from around the world, including international students studying at Canadian high schools. The scholarship will cover tuition,

books, incidental fees, and full residence support for four years. Each year approximately 37 students will be named Lester B. Pearson Scholars, reaching 150 scholarships by 2020.

Linking Enrolment Plans to Capital Plans

Both UTM and UTSC have experienced enormous growth over the last decade, reaching about 12,000 and 11,000 FTE respectively. Moderate growth is planned over the next five years and in the longer-term both campuses plan to grow to over 21,000 total students each. The campuses are located in regions where significant future demand for growth is projected. In order to accommodate the planned expansion there is a critical need for new space on both campuses, including space for teaching and research, student services, residences and parking.

In 2011 the Province announced \$52.5 million of capital funding for the new Deerfield Hall (North Building replacement phase 1) and Davis Laboratory renovation projects at UTM. These projects have begun to redress critical space shortages at that campus. Further investments are planned to accommodate growth to 15,000 undergraduate students by 2021-22 and to improve outdated academic facilities. Projects include a new Science Building expansion to house the recently announced Centre for Medicinal Chemistry, the North Building phase 2 project, expanded student centre space, teaching and research labs, and additional parking.

Capital expansion is also underway at UTSC to accommodate growth to just over 14,000 undergraduate students by 2021-22. The new Environmental Science and Chemistry building, opened in January 2016, adds substantial teaching and research space to the campus. Construction has started for the new Highland Hall and renovations to the Andrews building. Planning is underway for a 750-bed residence on the north campus and a second instructional centre. In 2015 UTSC also completed the world class Toronto Pan Am Sports Centre jointly funded by the Province, the City of Toronto and the University.

The Province released the Major Capacity Expansion Policy Framework in 2013 to inform future large scale expansions of undergraduate capacity at Ontario universities. This framework applies to capital projects that will accommodate short-term growth of approximately 1,000 students and longer-term growth of 5,000-10,000 students, both at existing and potential new satellite campuses. Under this framework, the Province subsequently released a call for proposals in 2014 for projects that would add significant undergraduate capacity. The University of Toronto submitted proposals for planned projects at UTSC and UTM. In May 2015, the Province announced that York University's proposal to create a satellite campus in Markham with Seneca College was successful in obtaining provincial funding support under this program. No further allocations have been announced as of the writing of this report. The City of Toronto released last year a revised transit plan that proposes an LRT line to UTSC. This would be a welcome addition to the already significant transit options at the campus.

Over the next two years, the recently announced Lab Innovation for Toronto (LIFT) project will upgrade almost half of the University's research labs across the three campuses representing a \$190 million effort with \$84 million coming from the Federal Government's Post-Secondary Institutions Strategic Investment Fund (SIF), \$14.3 million contributed by the Province and \$92 million by divisions. The St. George campus is experiencing additional capital renewal with opening of the Jackman Law building this year, and the renovation and expansion of the 1 Spadina building for the Daniels Faculty of Architecture, Landscape & Design. The Centre for Engineering Innovation and Entrepreneurship for the Faculty of Applied Science & Engineering is currently under construction while construction will begin soon on Robarts Common, a five-floor free-standing addition to expand Robarts Library study spaces by 25% and offer modern collaboration spaces. Many other projects are in the planning stages including the Centre for Civilizations and Cultures on the site of the decommissioned McLaughlin Planetarium, the renewal of the historic University College building, and the revitalization of King's College Circle and Hart House Circle as part of the Landmark of Landscape Quality project. While the University has been very successful at fundraising for capital projects, continued support from the Province is essential to ensure that the University of Toronto continues to fulfill its mandate of providing a world-class teaching and research environment for its faculty and students.

Notes: 1. Intake in Table 5 is defined as follows:

- For all divisions, only full-time students are included. The data exclude all TST programs.
- Tricampus Arts & Science data include new students in all years and non-degree students (except Science without Borders); returning students are excluded.
- Other direct-entry programs include new & returning students in year 1 only; non-degree students and new students in upper years are excluded.
- Arts & Science St. George and Applied Science & Engineering include students transferring from the prior year part-time International Foundation Program into full-time year 1.
- For second-entry professional programs, data include new intake into all years and exclude non-degree students.

2. OISE undergraduate programs do not have any new intake.

- Notes: 1. Arts & Science St. George and Seneca College's Liberal Arts Program was initiated in 2008-09. UTSC and Seneca College commenced a formal transfer program in 2013-14. Once accepted at UofT these students are not being tracked separately within UofT's enrolment and revenue projection models. Only after-the-fact actuals can be reported using enrolment count files.
2. There are additional students who have experience in Ontario Colleges, but only those who applied from Ontario Colleges are identified above.
3. Data include TST Conjoint programs only.

Source: University of Toronto Performance Indicators 2016; COU Enrolment Data.

Chart F: Undergraduate & Graduate Professional Programs

Source: Data per Table 2.

- Notes:
1. UG second-entry professional includes Dentistry, Law, Medicine, Nursing, OISE, Pharmacy, and Woodsworth
 2. Excludes all TST programs.

**Chart G: Graduate FTE Enrolment vs. Selected AAU Peer Institutions
Fall 2015**

Source: AAU Data Exchange, Fall 2015.

Note: FTE methodology changes as of Fall 2014. Therefore data above are not comparable to Fall 2013 data.

Chart H: St. George Campus - Graduate FTE and % of Total FTE

Source: Data from UT Business Intelligence Enrolment Cube.

- Notes:
1. Data up to 2012-13 exclude all TST programs; from 2013-14 onwards, data include TST Conjoint programs.
 2. Data exclude doctoral-stream students who self-declare as UTM or UTSC students.

TABLE 15 International Enrolment
(Fall Headcount)

	International Student Enrolment			Annual Percent Change		Percent Distribution		International Undergraduate as a % of Total Undergraduate Enrolment	International Graduate as a % of Total Graduate Enrolment	Total International Enrolment as a % of Total Enrolment

Graduate	3,447	943	819	1,113	6,322	54.5%	14.9%	13.0%	17.6%
Total Undergraduate & Graduate	13,397	2,409	2,187	5,931	23,924	56.0%	10.1%	9.1%	24.8%
2016-17									
Undergraduate	8,948	1,390	1,415	4,795	16,548	54.1%	8.4%	8.6%	29.0%
Graduate	3,585	1,006	877	1,252	6,720	53.3%	15.0%	13.1%	18.6%
Total Undergraduate & Graduate	12,533	2,396	2,292	6,047	23,268	53.9%	10.3%	9.9%	26.0%

- Notes:
- Intake in Tables 18 and 19 is defined as follows:
 - Includes full-time and part-time students.
 - Includes all years of new intake and new non-degree students.
 - Excludes students in TST, Transitional Year Program, Academic Bridging and Woodsworth programs.
 - Students' geographic origin determined using 'Home province', 'County of Residence' and 'Admission Applicant Type' fields in ROSI.
 - Data are presented in 5-year intervals to demonstrate long-term, gradual trends. Last year's actuals are also provided for short-term comparisons.
 - Graduate data include diplomas in Medicine and Music. Intake data are not available for Postgraduate Medical Education.
 - Data exclude Summer and Winter new intakes; consequently, programs that start in the summer are understated (e.g., DIFA, MBIotech, MMPA).
 - 'Other Countries' includes all international students plus domestic students living abroad.
