ENROLMENT REPORT 2010-11
ACTUAL AND PROJECTED ENROLMENT

Vice Provost Academic Operations
February 2011

ENROLMENT REPORT 2010-11

ACTUAL AND PROJECTED ENROLMENTS

A. Preamble

The Enrolment Report provides information for two purposes: it reports 2010-11 enrolments in various programs across the University, comparing actual results to enrolment plans; and it also lays out the enrolment projections for the period 2011-12 through to 2015-16. These projections form the basis for the revenue projections underlying the University's Long Range Budget Guidelines and the Budget Report.

B. Background

Enrolment planning has evolved significantly over the last two decades. In the late 1980s and 1990s it focused primarily on positioning the University's enrolment level within a funded enrolment "corridor" negotiated with the Ontario Government.

The Ontario Government negotiated enrolment funding levels for base operating grant with the Ontario Universities in 1989. This established a "corridor mid-point" for the University of Toronto that the University reached in 1990-91. At that point the University had the flexibility to allow its enrolment (expressed in BIUs) to fluctuate within a corridor of \pm 3% of its mid-point with no effect on the operating grant it received. The University's enrolment planning for 1992-93 through 1995-96 took advantage of this flexibility by reducing enrolment while remaining within its corridor, thereby increasing the funding per FTE.

Over the past fifteen years the University participated in several programs to increase enrolment levels beyond those defined in the corridor. In the late 1990s the Government introduced a series of targeted funding envelopes, which allowed the University to grow in the areas of BEd, MD, computer science and high-demand engineering (ATOP). In 2000-01, the Ontario Government engaged in discussions with the Ontario universities regarding enrolment expansion to meet the demands of the "double-cohort". Full average funding for eligible undergraduate growth has been provided between 2000-01 and 2010-11. The Council of Ontario Universities is advocating for a provincial commitment to full funding of all undergraduate growth beyond 2010-11.

Funding was provided to support limited graduate growth between 2000-01 and 2004-05. In May of 2005, the Ontario Budget allocated \$220M for a major initiative to expand graduate enrolment in the Province by 14,000 students over 2002-03 levels. This initiative presented an excellent opportunity for the University of Toronto to restore its graduate/undergraduate mix and strengthen its research enterprise. In 2008 the Province announced revisions to the graduate expansion program, bringing the total planned number of expansion spaces to 15,300.

Section C below provides enrolment details for 2010-11, with comparisons of actual enrolments to initial plans. It also provides some data on enrolment history. Projections based on current University plans are given in Section D.

Overall, the data presented in the following sections show that the University's recruitment and enrolment management strategies are enabling us to achieve our enrolment plans.

C. 2010-11 Enrolment: Overview

Table 1A provides overall headcount statistics from 2002-03 to 2015-16. There were 78,568 undergraduate and graduate students enrolled at the University of Toronto, including the Toronto School of Theology, in Fall 2010, an increase of 1,225 students over 2009-10.

Full-time-equivalent (FTE) numbers are provided in Table 1B, which includes a breakdown of undergraduate Arts & Science FTEs by field of study. Because many students graduate with specialists and/or majors in more than one field, this breakdown should not be viewed as a precise accounting. It is only indicative of broad trends.

Table 1B shows graduate professional masters FTEs by campus. Doctoral stream masters and PhD enrolments are totals across the three campuses. They are not displayed by campus because of the unitary administrative structure for these degree programs.

The University's enrolment history since 1977 is illustrated in Chart 1A. Over this period, enrolment has doubled from 33,389 to 66,611 FTEs. Chart 1B displays the undergraduate Arts & Science FTEs by campus and the graduate FTEs trends since 2000.

C.1.1. Undergraduate Enrolment: 2010-11

Undergraduate enrolment by division is given in Table 2A. In the first five years of the decade significant expansion took place while a much more modest increase has occurred since then, bringing the total student FTEs to 53,664 in 2010-11.

Student enrolment in 2010-11 is 297 FTEs (0.6%) above target. The number of undergraduate FTEs increased in almost all programs over 2009-10.

A significant number of students benefit from collaboration between the University of Toronto and other institutions. Table 2B shows that 2,018 (3.8%) of the University's undergraduate FTEs comprising 2,726 students study in programs offered jointly with external or affiliated institutions. In addition, 764 students came to the University of Toronto after studying at an Ontario College of Applied Arts and Technology.

Statistics for full-time new intake are provided in Table 3. Actual overall intake in Fall 2010 was 178 (1.2%) over planned levels.

Chart 2 shows the average grade for entering students in Arts & Science at the three campuses from 2006 to 2010. The average grade of the 2010-11 incoming class is 84.1%, which is slightly higher than the averages over the previous four years. Despite the significant increase in intake levels since 2002-03 (Table 3), the University has maintained the quality of its undergraduate Arts & Science student body.

C.1.2 Graduate Enrolment: 2010-11

Information on graduate student enrolment is contained in Tables 4A-H. As part of the 2005 Spring Budget, the Ontario Government announced that by 2009-10 an additional \$220M would be made available to expand graduate enrolment in Ontario universities. This funding was intended to support a system-wide growth of 14,000 graduate spaces over 2002-03 levels. Initially, 12,000 spaces were allocated in June 2006 for expansion to be achieved by 2007-08.

The Provincial program presented an excellent opportunity for the University of Toronto to increase the number of graduate students and strengthen its research enterprise. The University undertook an extensive planning process, the results of which are described in a document entitled *A Framework for Graduate Expansion 2004-05 to 2009-10*. These plans were approved by Governing Council on December 14, 2006.

In Phase 1, the University of Toronto received approval from the Ministry to increase enrolment by up to 2,134 eligible student FTEs by 2007-08 relative to 2004-05 (Table 4G). The expansion envisioned in the Framework document was based on this allocation and on the University's academic plans at that time as developed by the heads of various graduate units.

Phase 2 was announced in February 2009. The University was allocated 2,722 spaces relative to 2004-05, comprised of 1,709 Masters and 1,013 PhDs. It was also announced that funding would be phased-in to 2011-12 with an additional two years, if necessary, to achieve the end-state targets.

Subsequent to the Phase 2 allocations and in response to increased Master's demand, especially Professional Masters, the University continued to advocate to the Ministry for increased flexibility or "fungibility" between the Masters and PhD pools. After a mid-program review of the graduate expansion initiative, the Ministry announced in December 2009 that it would provide a one-time opportunity for institutions to convert up to 50% of their remaining spaces that had yet to be realized as of 2007-08 between the two pools on a grant-neutral basis. The University of Toronto received permission to convert 263 PhD spaces to 500 additional Master's spaces. End-state targets are now 7,031 Masters and 3,853 PhDs, which represents growth relative to 2004-05 of 2,209 Masters and 750 PhDs (Table 4G). Table 4H provides the detailed breakdowns by faculty and funding pool.

Table 4A shows planned enrolments for 2010-11 as well as actual and projected enrolments for domestic and international students to 2015-16. A breakdown by degree category is given in Table 4B.

Overall graduate enrolment reached 13,745 FTEs in 2010-11, an increase of 279 FTEs, or 2.1%, over 2009-10. Table 4G shows that 10,473 FTEs are eligible for funding in 2010-11, representing an increase of 2,548 spaces relative to 2004-05. Table 4H shows that the University is currently 412 eligible FTEs below its approved allocation, comprised of 461 Masters below and 49 PhDs above the respective targets. The corresponding increase relative to 2002-03 is 2,968 eligible FTEs, which will be the basis for determining the amount of capital funding to be received from the government.

Detailed FTE enrolment breakdowns by faculty and degree are provided in Tables 4C-4F, including the planned targets for 2011-12 and beyond.

Chart 3 illustrates changes in graduate enrolment for different degree categories. Since 2002-03, enrolment in graduate professional masters programs has increased by almost two-thirds (65%), and doctoral enrolment has grown by 32%. At the same time, doctoral-stream Masters enrolment has increased by 8%.

C.1.3 Geographic Origin of Incoming Students: 2010-11

Tables 5-9 address the geographic origin of incoming students. The composition of the student body by geographic origin and how it has changed since 2005-06 is given in Table 5A and Charts 4A & 4B. Table 5A shows that a large proportion of incoming undergraduate students, 66% in 2010-11, come from the Greater Toronto Area. Another 8% are from other areas in Ontario, 7% from other provinces in Canada and the remaining 19% from other countries. Of the incoming class of graduate students 63% is drawn from the GTA, 9% are from other areas in Ontario, 14% from other provinces in Canada, and 14% from other countries. Table 5B shows the Faculty/campus details.

C.1.4 International Enrolment: 2010-11

International enrolment statistics are summarized in Table 6 and Charts 5A & 5B. The number of international students has been growing steadily since 1997-98 when they represented only 3.8% of the total student population. Today, 11.8% of the University of Toronto's students come from outside Canada. International students represent 11.8% of the undergraduate population and 11.5% of graduate students.

Table 7 shows trends in full-time intake. The total number of international students admitted has been steadily increasing, but there are significant year-to-year fluctuations in percentage increases because the numbers are small. Also, intake statistics are influenced by international events and changes in government funding.

In 2010-11, total international intake increased by 4.9% relative to the previous year, with an increase of 13.8% in graduate and an increase of 2.8% in undergraduate admissions. The slight decline in graduate intake compared to 2006-07 levels is largely attributable to the current emphasis on graduate domestic enrolment expansion for which full government funding is available.

Table 8 and Chart 6 illustrate the distribution of international students by geographic region. The University draws most of its international students from Asia and the Americas.

Table 9 displays international student enrolments by country of citizenship, focusing on the top fifteen countries. The top countries for undergraduate students are China (41%), South Korea (10%), United States (4%) and India (4%). For graduate students, the top countries are the United States (21%), China (18%), India (8%) and Iran (8%). International undergraduate students came from 146 countries while international graduate students came from 108 countries.

D. Projected Enrolment: 2011-12 to 2015-16

D.1.1 Projected Undergraduate Enrolment

Table 1B gives projected enrolments over the next five years. The University's plan is to increase its undergraduate enrolment by 635, reaching 54,299 FTEs by 2015-16. This is a result of a reduction of 1,067 in Arts & Science at St. George offset by increases of 304 at UTSC and 958 at UTM. Applied Science and Engineering is projected to reduce its undergraduate enrolment by 324 FTEs as part of a plan to rebalance its undergraduate/graduate mix. The number of students in professional faculties is projected to increase by 591 FTEs to 8,887 FTEs due to increases within several Medicine programs and the introduction of a Bachelors program in Architecture. OISE's plans include a Ministry-mandated reduction to BEd levels over the next two years.

By 2015-16, St. George Arts & Science intake will decrease to 5,299 full-time students, in accordance with its updated December 2009 plans. Intake at UTSC will be increased by 110 to 2,594 full-time students per annum while UTM plans will admit 3,020 full-time students, 150 more than its 2010-11 intake. There are no significant planned intake changes for the undergraduate professional programs beyond the mandated BEd reductions (Table 3).

D.2.1 Projected Graduate Enrolment

The University's December 2006 *Framework for Graduate Expansion* envisioned an increase of 4,400 students relative to 2002-03, conditional on the availability of resources, including operating grant funding, capital funding and scholarships for student support. The end-state targets and enrolment projections in Tables 4A-4H have been updated to reflect the most recent review of divisional plans by the Provost.

Projections to 2015-16 (Tables 4A-4F) show that total FTE growth including international students is expected to continue to occur primarily within the professional masters and doctoral categories. The rapid growth in Professional Masters enrolments reflects the rising importance of these programs and the increased number of offerings at the University. The increase in doctoral students is indicative of the growing intensity of research and scholarship.

The University will continue to monitor funding availability to ensure that the quality of the graduate student experience is not affected due to lack of funding. Further adjustments to long-term enrolment plans will be made as necessary in order to ensure the above institutional end-state targets are met. The University and other institutions will continue advocacy efforts for the funding of a future Phase 3 of graduate enrolment expansion.

D. 3. Projected Undergraduate/Graduate Enrolment Balance

Chart 7 illustrates how the changes in enrolment described above affect the institutional enrolment balance between undergraduate and graduate programs. In 2002-03, undergraduate enrolment represented 80% of the total student body, rising slowly as the undergraduate double cohort progressed towards graduation, and then dropping back to

80% in 2010-11 as a result of graduate expansion. Graduate students are projected to increase to 21.8% of the student population over the next five years.

D. 4. Projected Domestic/International Mix

Table 10 shows actual and planned enrolments for domestic and international students. Total undergraduate student FTEs are projected to increase by 635 by 2015-16 relative to 2010-11. This is comprised of a planned decrease of 775 domestic students and an increase of 1,410 international students. Graduate student growth of 1,388 FTEs is planned to be primarily domestic, with a modest growth of 268 FTEs in international students. Overall international enrolment will increase from 12.3% of the total FTE student population in 2010-11 to 14.4% by 2015-16.

D. 5. Longer-term Enrolment Planning and Demand

In June 2007, the President initiated a visioning exercise to develop long-term plans for the Year 2030. Five task forces were established to examine all aspects of the University, including long-term enrolment patterns. Their deliberations extended into the spring of 2008 and the resulting reports informed and guided a *Synthesis Report* prepared by the President. The process then culminated in *Towards 2030: A Long-Term Planning Framework* which identified strategic directions for the University of Toronto based on the *Synthesis Report*.

The *Framework* will help guide future academic planning at the institutional, divisional, and departmental levels. Following are some excerpts from the *Framework* in the areas of enrolment planning, institutional balance, and student recruitment.

- No enrolment decisions will be taken without careful consideration of the long-term implications for the University's self-defined role and aspirations. Enrolment planning will also consider all relevant financial implications and potential impacts on both the quality of the student experience and the quality of working life for faculty and staff.
- The University's enrolment strategies will reinforce its unique strengths in research and scholarship, as well as our acknowledged leadership position in graduate and second-entry professional education provincially and nationally.
- The University will support the continued development of three differentiated campuses under a single University-wide administration.
- The University will focus on the re-development and enhancement of its three primary campuses and will not develop a fourth campus or major satellite operations.
- The University acknowledges the goal of modest reductions in undergraduate enrolment on the St. George campus, along with continued growth in graduate education.
- The University acknowledges that UTM and UTSC envisage growth in a range of professional masters programs, along with doctoral stream expansion in selected

- disciplines ... For undergraduate enrolment, the presumptive expansion across the two campuses combined is approximately 5000 places for students.
- The University affirms the importance of increasing its national and global presence by recruiting, respectively, more students from outside of the Toronto region and more students from abroad. These general goals ... will be balanced against the University's regional and provincial responsibilities.

D.6. Linking Enrolment Plans to Capital Plans

Both UTM and UTSC have experienced unprecedeted surges in enrolment over the last decade and are located in regions where significant future demand for growth is projected. The new KIP-funded Instructional buildings at each campus will begin to redress critical space shortages, however, further investments are required to accommodate future growth and improve outdated academic facilities. UTM is poised to grow to 13,000 and UTSC to 11,000 students by 2015-16. In the longer-term both campuses plan to grow to 21,000 students.

The St. George campus will increasingly reflect the shift in undergraduate demand towards engineering, sciences and specialized programs. The University also plans to expand its graduate enrolment further over the next five years to bring our total proportion of graduate students to a level more in line with other research-intensive international peers. With additional operating and capital funding from the Government the University could accommodate an additional 400 PhD and 750 masters spaces over the approved Phase 2 levels by 2015-16.

Concluding Remarks

The University of Toronto continues to attract a large number of very high-quality student applicants, both domestically and internationally, and to meet its enrolment targets. The enrolment report is intended to facilitate comprehensive monitoring of the University's progress towards its objectives.

Note 1: Arts & Science St. George and Seneca College's Liberal Arts Program initiated a transfer pilot project as of 2008-09, although once accepted at UoT these students are not being tracked separately within UoT's enrolment and revenue projection models. After-the-fact actuals can be reported using the enrolment count files.

Note 2: 2,726 students generated the 2,018 FTEs reported for external and affiliated institutions in 2010-11.

Note 3: An additional 764 students totalling 566 FTEs in 2010-11 applied from Ontario Colleges of Applied Arts & Technology and then registered in UoT-only programs.

Note 4: The Specialist in Visual Culture and Communications was previously reported under CCIT. Due to a reorganization, this program is now listed under Visual Studies. There has been no change in UTM's relationship with Sheridan CAAT.

Note 5: 2000-01 is prior to the start of the joint UTM/Sheridan CCIT program (2001-02) and the joint UTSC/Centennial College programs (2003-04).

Note 1: For direct-entry programs, the new intake numbers provided in the table include new intake into upper years. For professional programs, the table provides full-time Year 1 enrolment.

Note 2: 2003-04 was the primary year of accommodating the undergraduate "double cohort" from Ontario secondary schools.

Note 3: The Physician Assistant Education Program admits students in the Winter. Its revised planned intake for 2010-11 is 15 rising to 24 for 2011-12 onwards.

Note 4: Arts & Science St. George and Applied Science targets include students transferring from the prior year part-time International Foundation Programs (IFP) into full-time Year 1.

Total Undergrad & Graduate	12,777	1,682	1,648	3,468	19,575	65.3%	8.6%	8.4%	17.7%

* Students' geographic origin determined using "Home province", "County of Residence" and "Admissions Applicant Type" fields in ROSI.

Notes: 1) Undergraduate excludes TST, Transitional Year Program, Academic Bridging Program and Woodsworth diploma & certificate programs.
Intake data is not available for Postgraduate Medical Education.

- 2) Graduate data includes diplomas in Medicine and Music. Excludes TST.
- 3) 2005-06 was the third year of accommodating the "double cohort" from Ontario secondary schools.
- 4) Excludes Summer and Winter new intakes so programs that start especially in the summer such as DIFA, MBioTech, MMPA are understated.
- 5) Changes to the count program related to selection of permanent address information will contribute to lower GTA figures for 2009-10 onwards.
- 6) Other Countries includes all international students plus domestic students living abroad.

**Chart 1A: FTE Enrolment at the University of Toronto
1977-78 to 2015-16**

1989-90 to 1997-98 Enrolment Corridor Funding

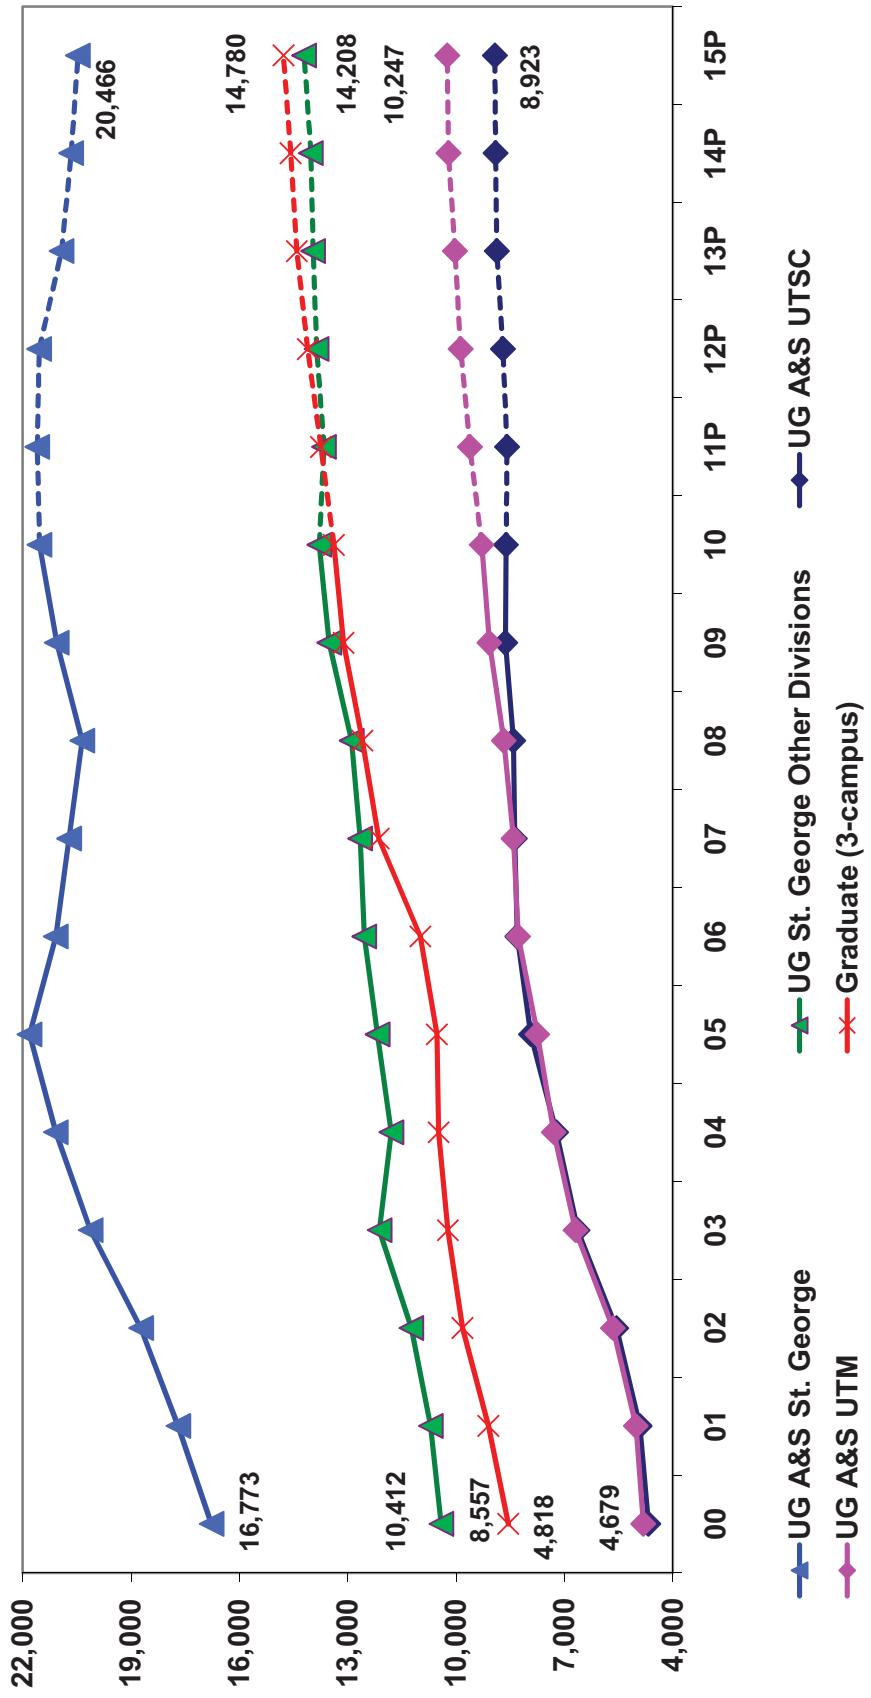

1998-99 to 2000-01 Expansion Funding in selected areas [Access to Opportunities Program (ATOP), BED, and MD]

2001-02 to 2004-05 Undergraduate Expansion including accommodation of the Ontario double cohort; Limited graduate expansion

2005-06 onwards: Continued undergraduate growth and significant graduate expansion

Note: FTE Enrolment excludes TST

**Chart 1B: FTE Enrollment at the University of Toronto
2000-01 to 2015-16**

1998-99 to 2000-01 Expansion Funding in selected areas [Access to Opportunities Program (ATOP), BED, and MD]
 2001-02 to 2004-05 Undergraduate Expansion including accommodation of the Ontario double cohort; Limited graduate expansion
 2005-06 onwards: Continued undergraduate growth and significant graduate expansion

Note: FTE Enrollment excludes TST

Chart 2: Entering Grade Averages: Arts & Science by Campus

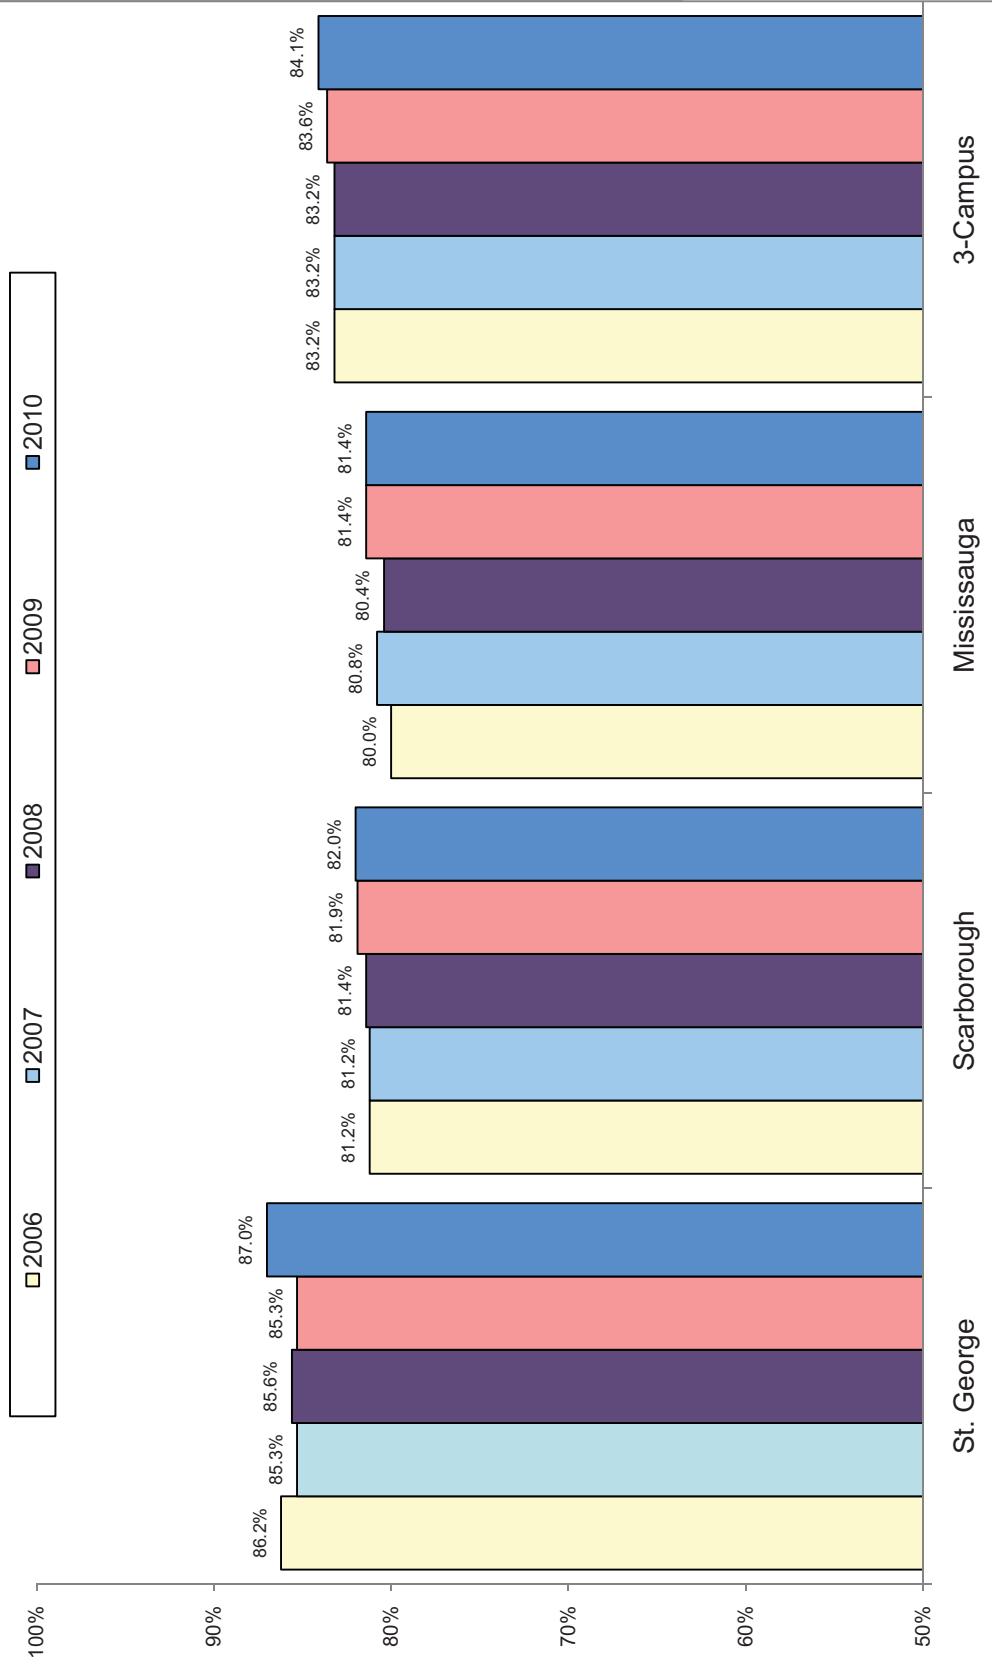

Chart 3: Graduate Enrolment Balance 2002-03 TO 2015-16

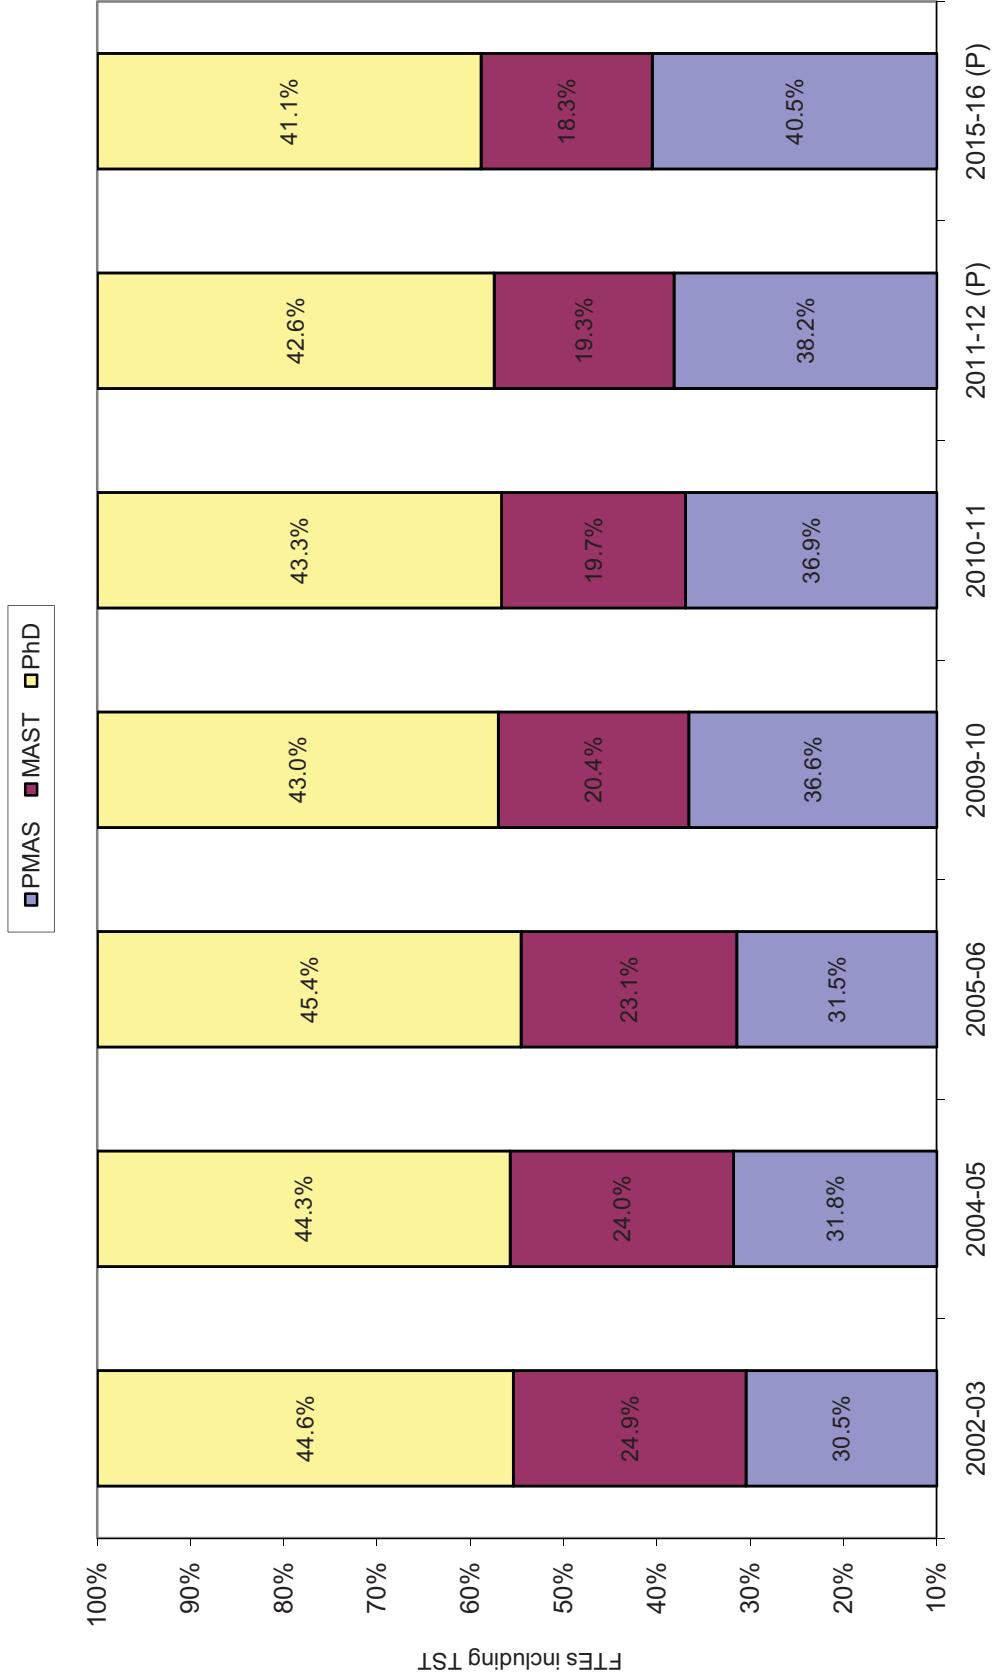

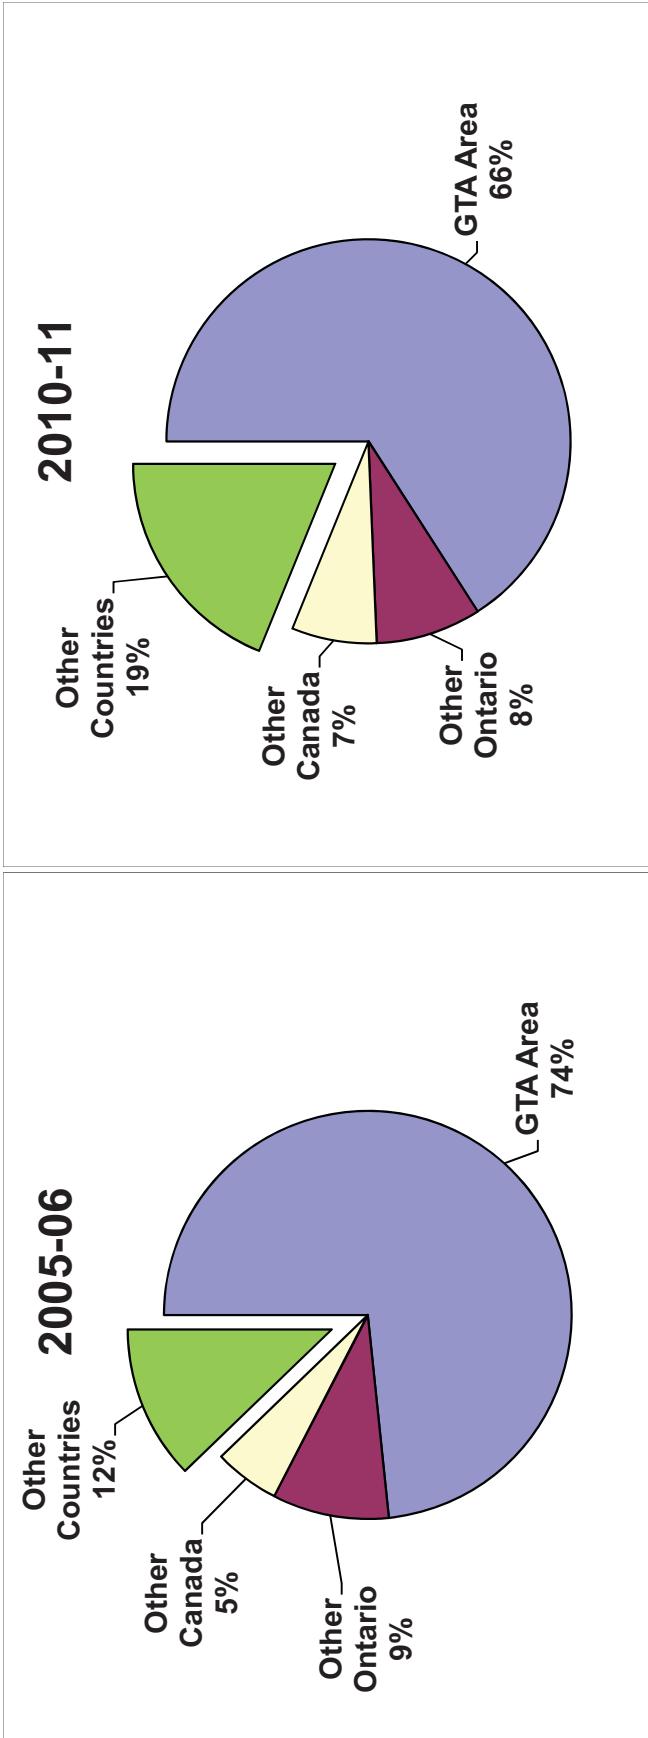

Chart 4A: Undergraduate Intake by Geographic Origin

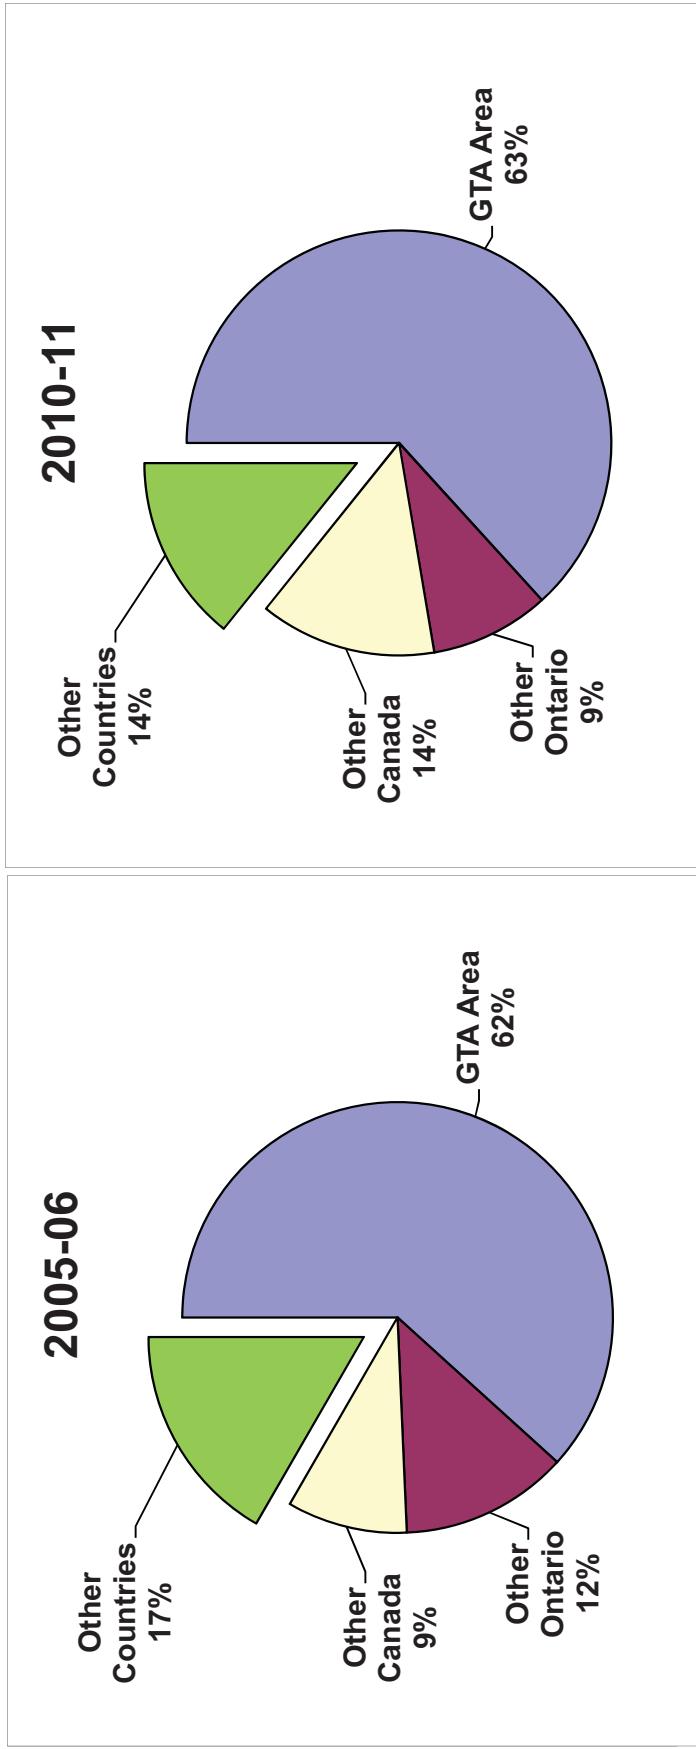

* Students' geographic origin determined using "Home province", "County of Residence" and "Admissions Applicant Type" fields in ROSI.

Notes:

- 1) Undergraduate excludes TST, Transitional Year Program and Woodsworth diploma & certificate programs.
- 2) Intake data is not available for Postgraduate Medical Education.
- 2) 2005-06 was the third year of accommodating the "double cohort" from Ontario secondary schools.
- 3) Changes to the count program related to selection of permanent address information will contribute to lower GTA figures for 2009-10 onwards.
- 4) Other Countries includes all international students plus domestic students living abroad.

Chart 4B: Graduate Intake by Geographic Origin

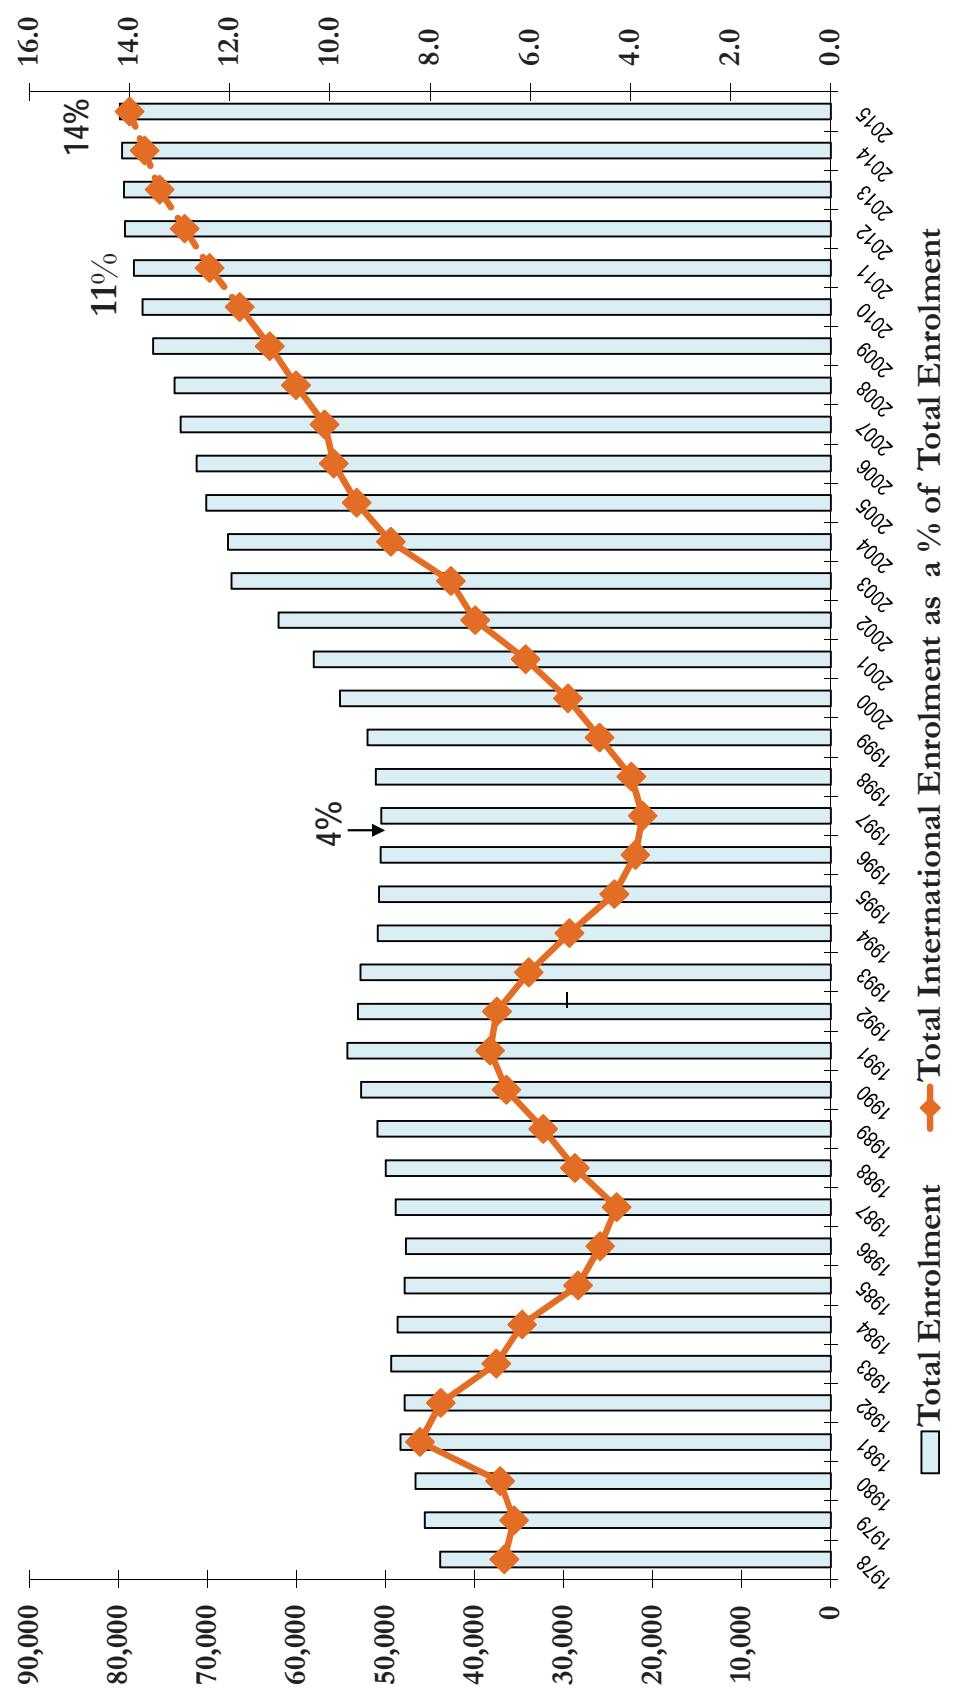

* Students' geographic origin determined using "Home province", "County of Residence" and "Admissions Applicant Type" fields in ROSI!

Notes:

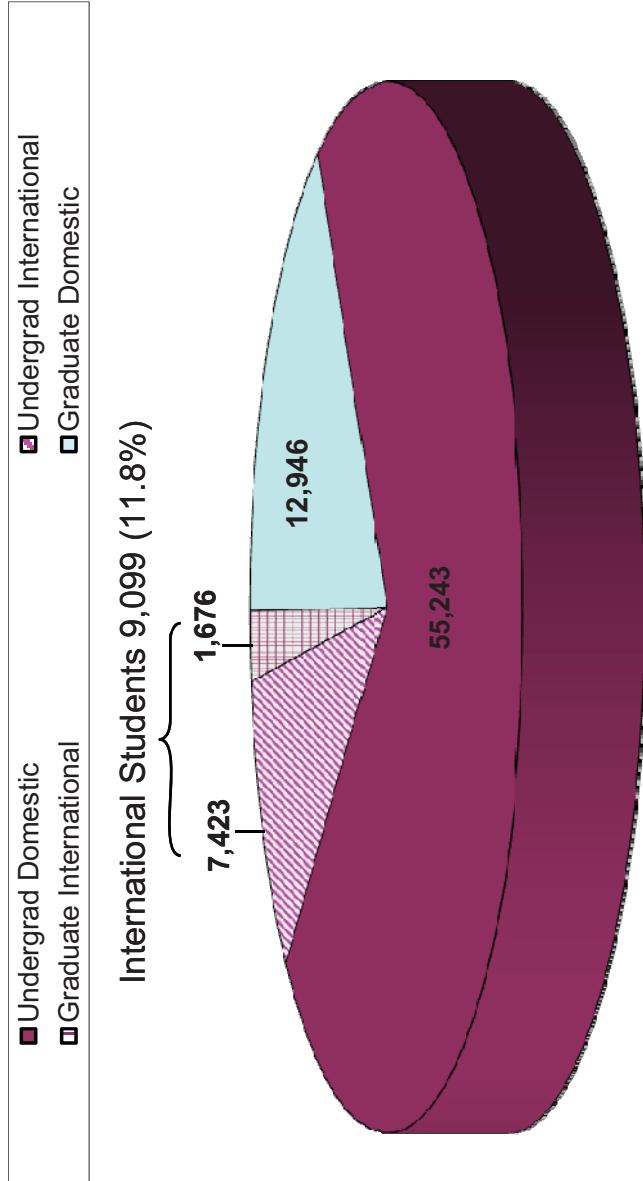

- 1) Graduate data includes diplomas in Medicine and Music. Excludes TST.
- 2) Excludes Summer and Winter new intakes so programs that start especially in the summer such as DIFA, MBioTech, MMPA are understated.
- 3) Changes to the count program related to selection of permanent address information will contribute to lower GTA figures for 2009-10 onwards.
- 4) Other Countries includes all international students plus domestic students living abroad.

Chart 5A: Total Enrolment and Proportion International Enrolment: 1978-79 to 2015-16

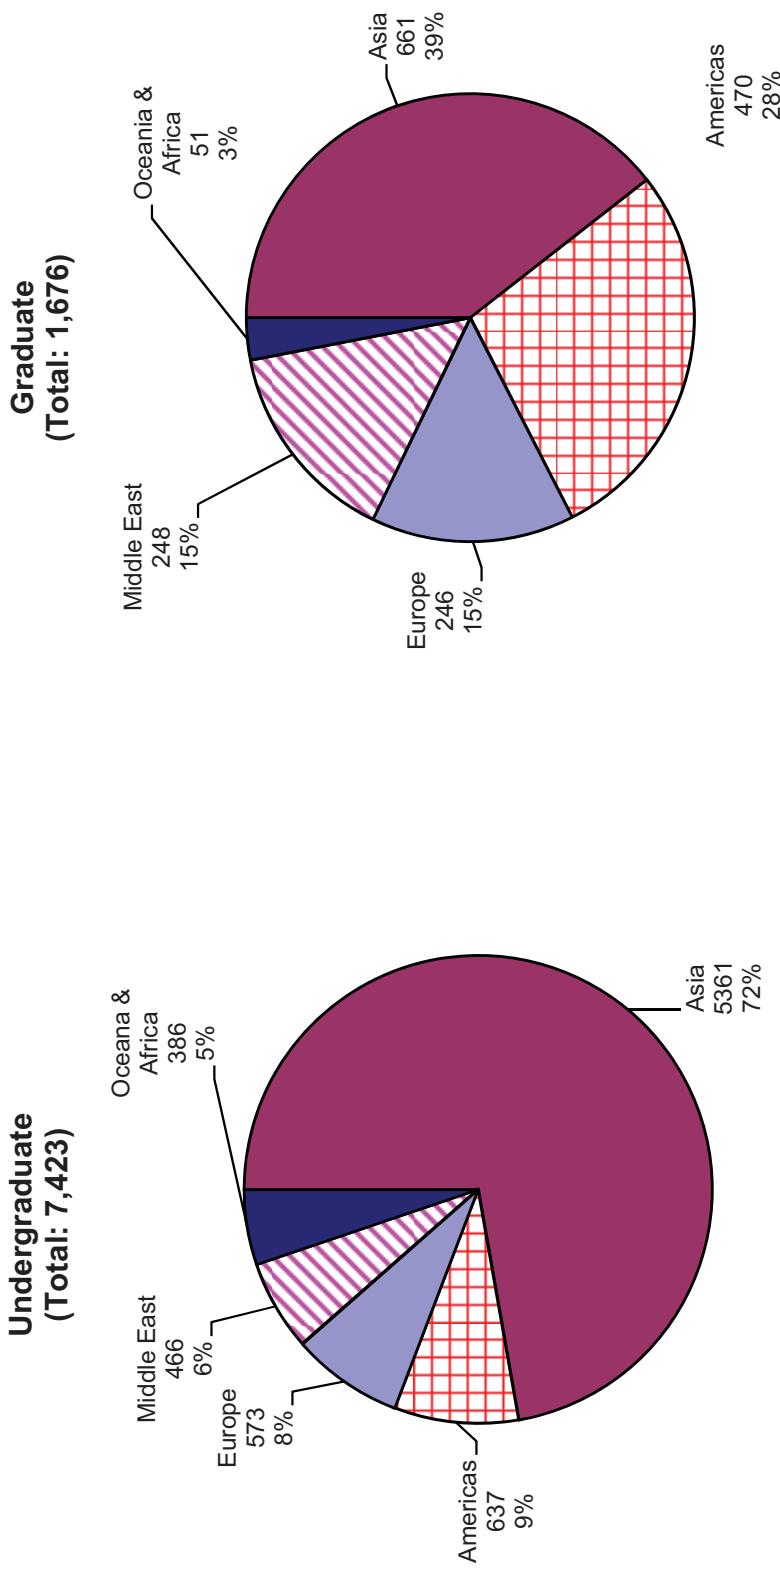

Note: Data excludes TST enrolments.

**Chart 5B: Domestic and International Student Enrollment
2010-11**

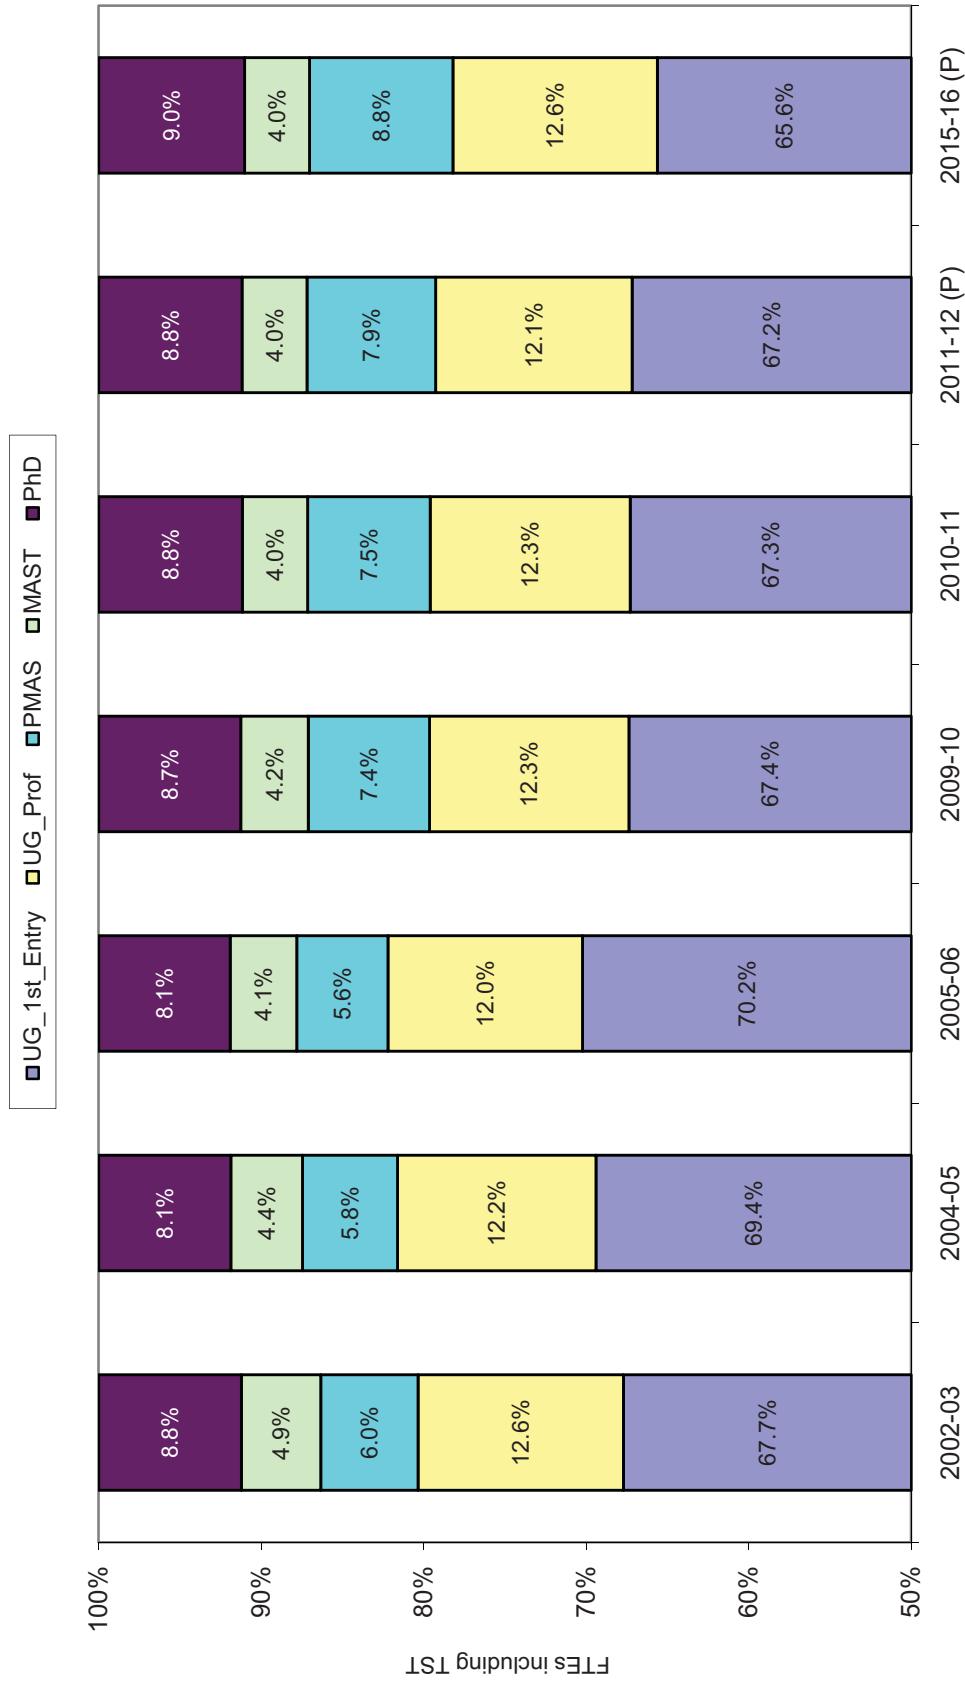

Note: Data excludes TST enrolments.

CHART 6: 2010-11 INTERNATIONAL STUDENTS BY GEOGRAPHIC REGION

Note: Geographic Region determined using "Country of Citizenship" field in ROSI.

Chart 7: Enrolment Balance 2002-03 TO 2015-16

Note: Includes TST. OISE graduate students included as of 2000-01. P = Projected. Architecture (98-99), and OT/PT (2001-02) programs converted to Professional Masters programs. Additional Qualification FTEs in 97-98 and 2002-03 excluded to provide a consistent time series.
