Re: Appraisal Report, Proposed new MSc in Sustainability Management

Dear Amy,

I am very pleased by the extremely positive appraisal of the proposed MSc in Sustainability Management. Your administrative response to the appraisal nicely summarizes the report and highlights the specific suggestions made by the reviewers for consideration. I note in particular that you have changed the name of the program in response to the suggestion of the reviewers from Sustainable Management to Sustainability Management; made a slight change to an existing course; and created a new course in environmental ethics. Your thoughtful response to the appraisal report helps to underline the usefulness of conducting the appraisal prior to taking a new program through governance.

I was particularly pleased that the reviewers emphasized the outstanding credentials of faculty participating in the program and commented that the program is well positioned to leverage the physical human (intellectual), and technological resources available at all three campuses of the University of Toronto. I will be very happy to recommend this new professional Master's program to governance for approval once the program has been endorsed by the Erindale College Council.

Sincerely,

Cheryl Regehr  
Vice-Provost, Academic Programs
