TORONTO
SCARBOROUGH

Mainstreaming Sustainability *at UTSC*

Presentation to: Campus Council

April 21st 2021

Maclellan\Miller (2021)

OUTLINE: Mainstreaming Sustainability at UTSC

1. *OLD SCHOOL* AGENCY
2. UTSC STRATEGIC PLAN
3. FUNCTIONAL CONSIDERATIONS
 - Research
 - Teaching
 - Knowledge Events
 - Knowledge Application
4. FOUNDATIONAL CASE STUDIES
5. CONCLUSION
 - Our Niche?
 - Transparency and a Functional Language

Internal operating environment; within the control of the organization:

- *Labour*
- *Materials*
- *Facilities*
- *Financial Capital*
- *Management*

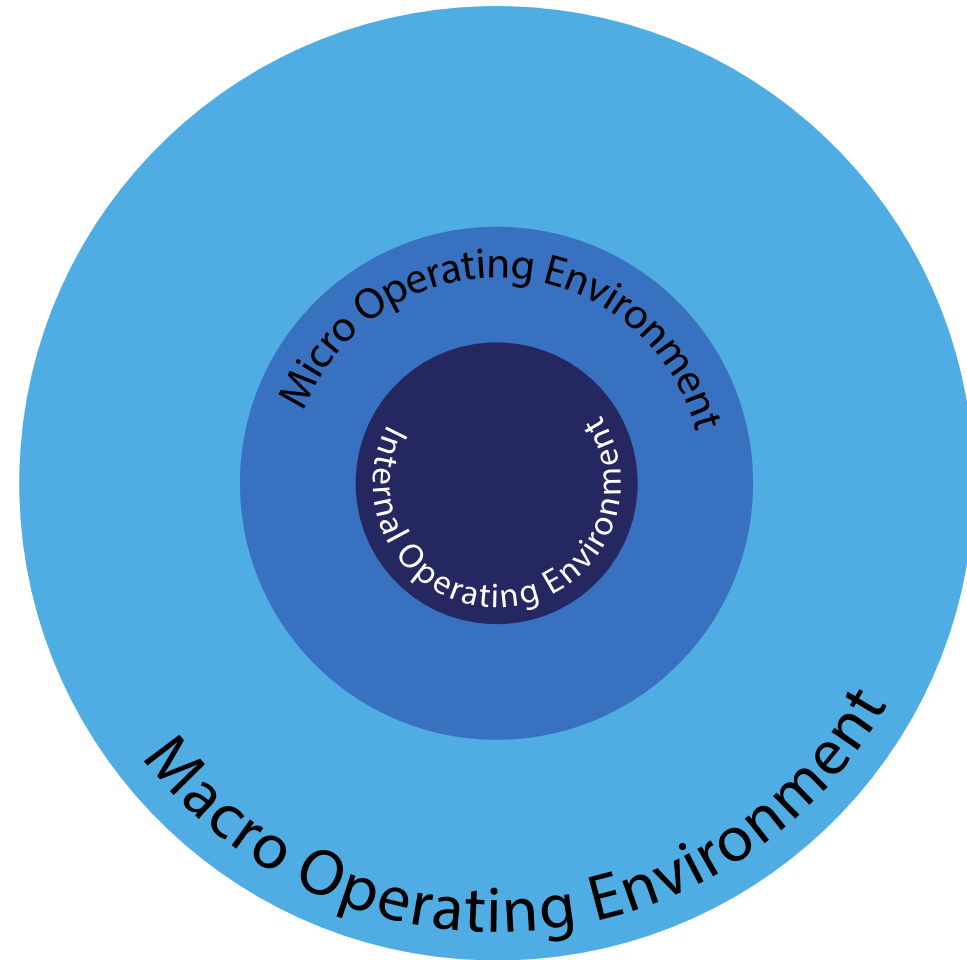

External *micro* operating environment; outside the control of the organization:

- *Partners*
- *Future Students, Faculty and Staff*
- *Sector Peers*
- *Vendors, partners and support*
- *Local Public/community*

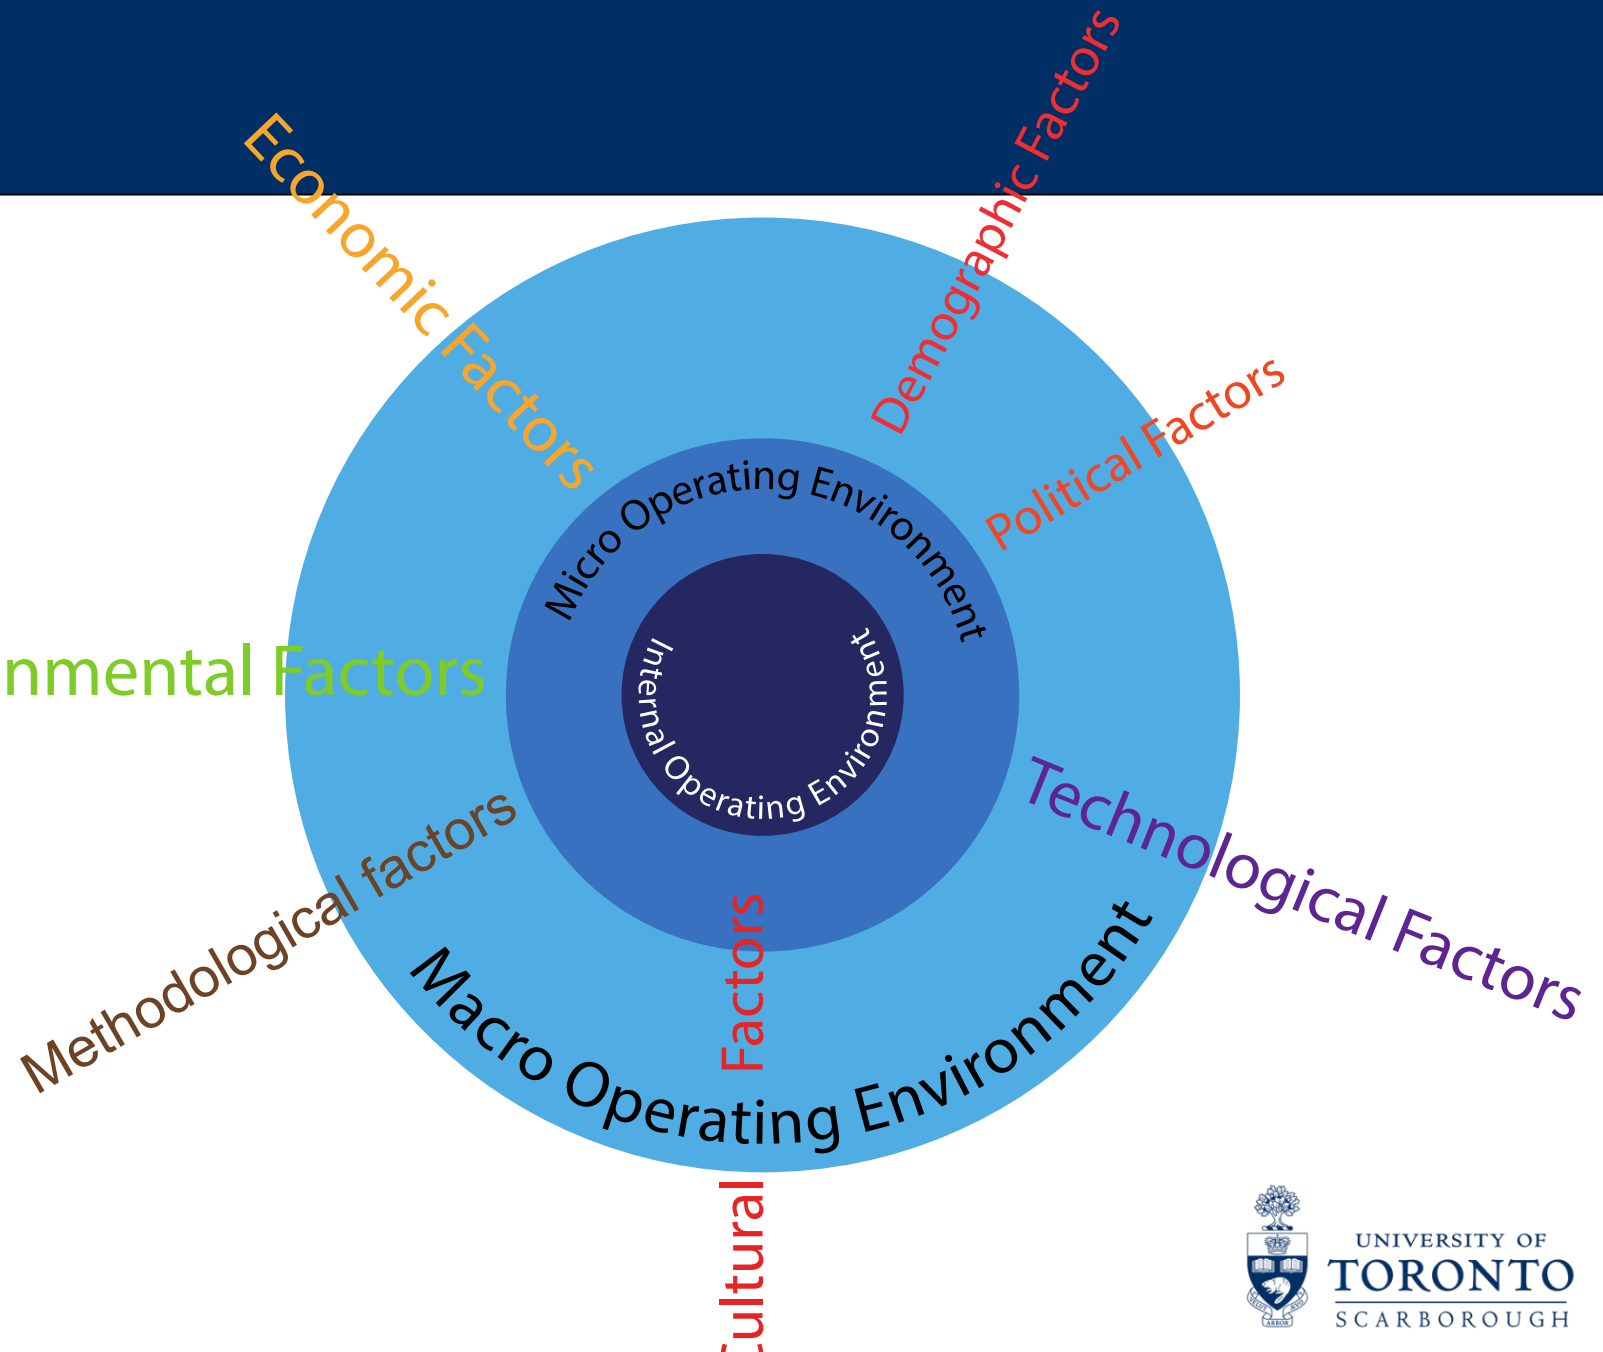

External *macro* operating environment; outside the control of the organization:

- Political Environment
- Cultural environment
- Technological environment
- *Natural environment*
- Demographic environment
- International environment

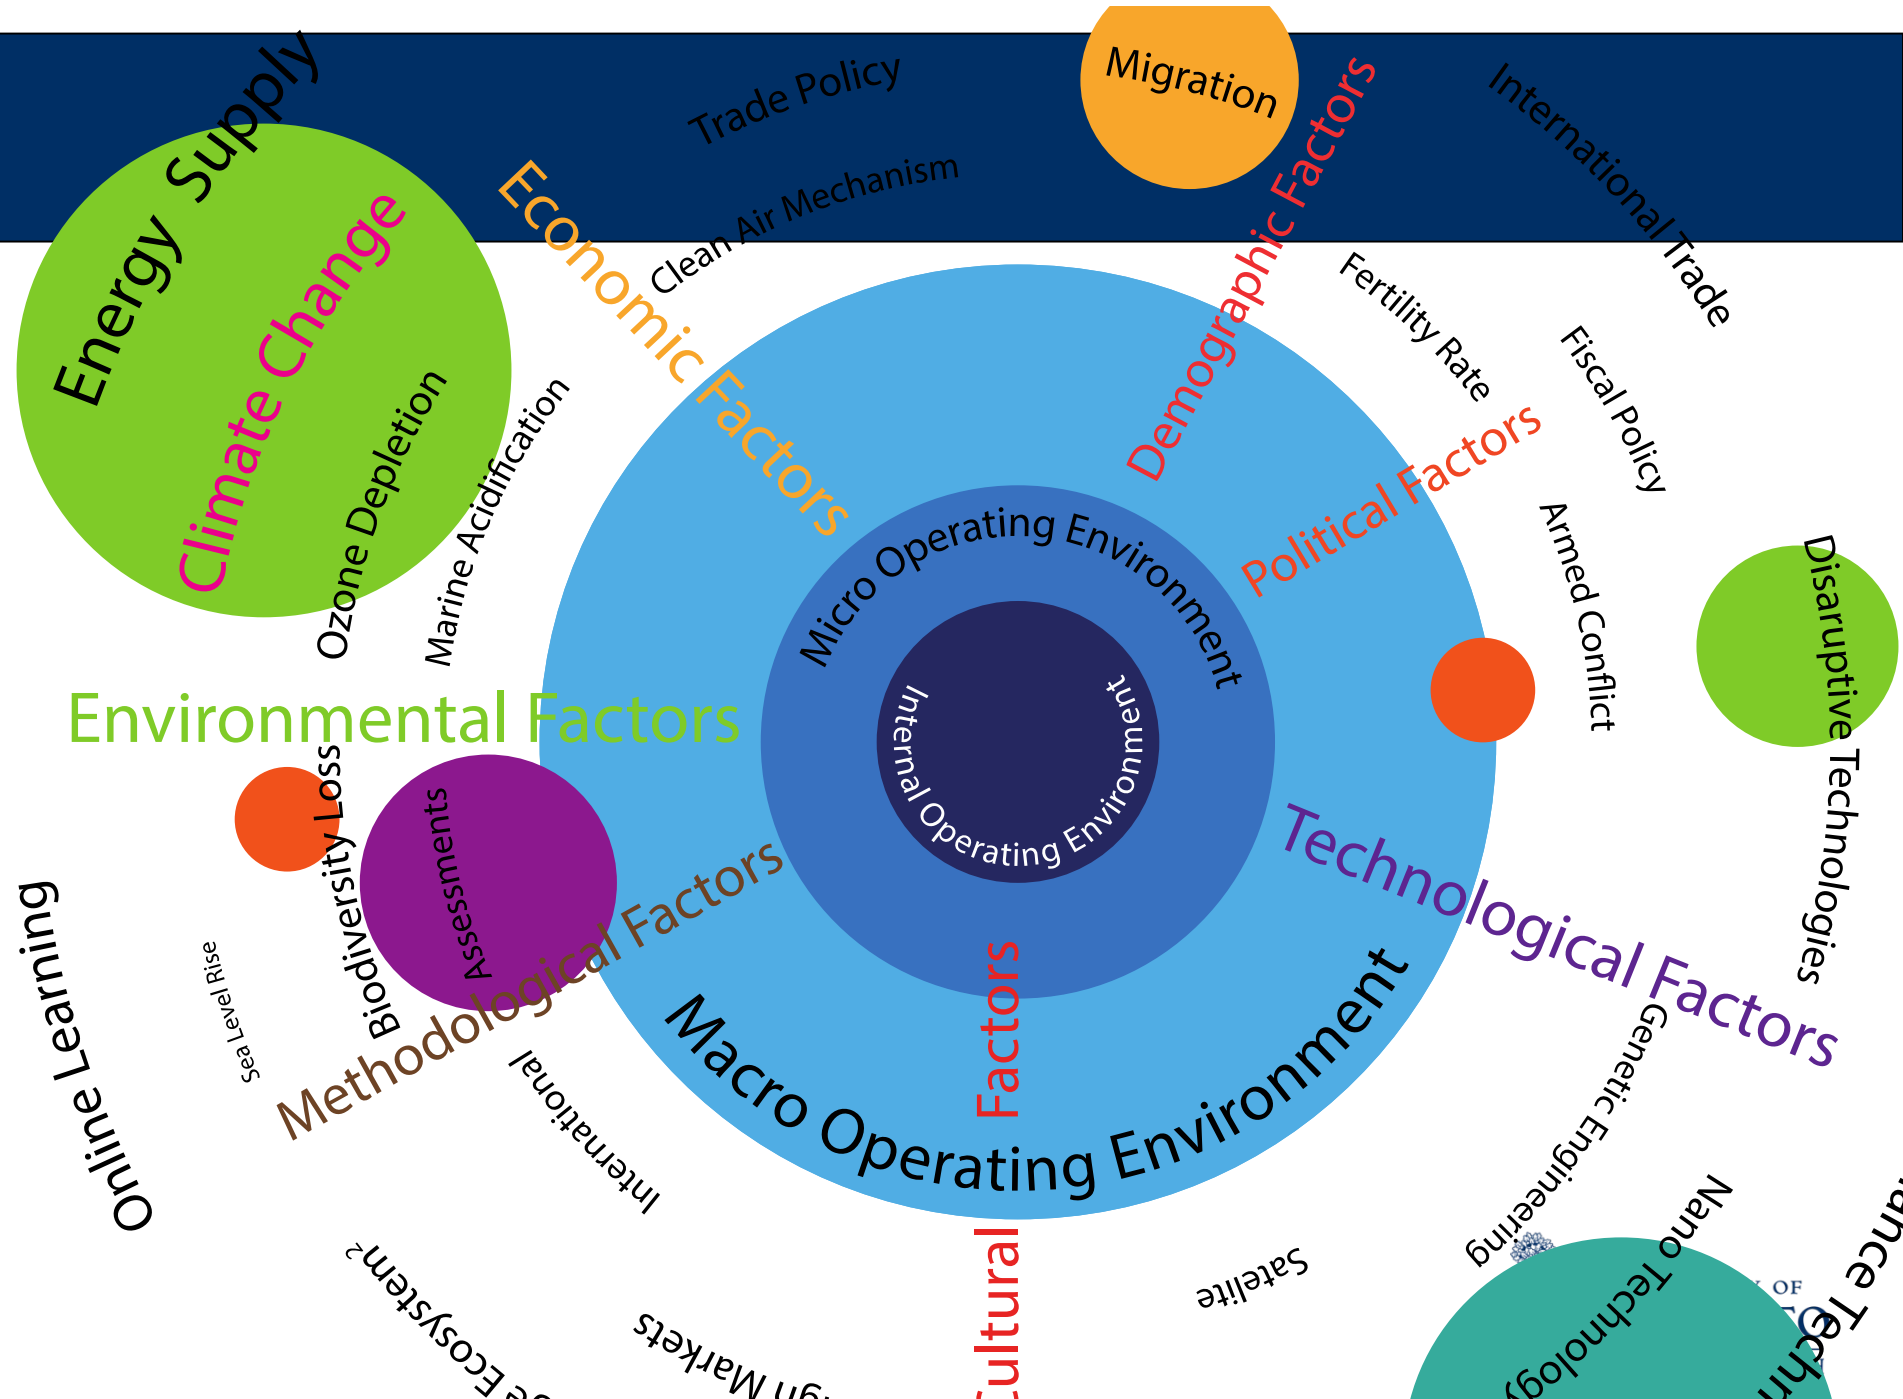

An 'old school' approach passively interprets external change as beyond its' control'.
Alternatively, the institutional actor can rely upon the expertise of others to 'keep it in the game.'

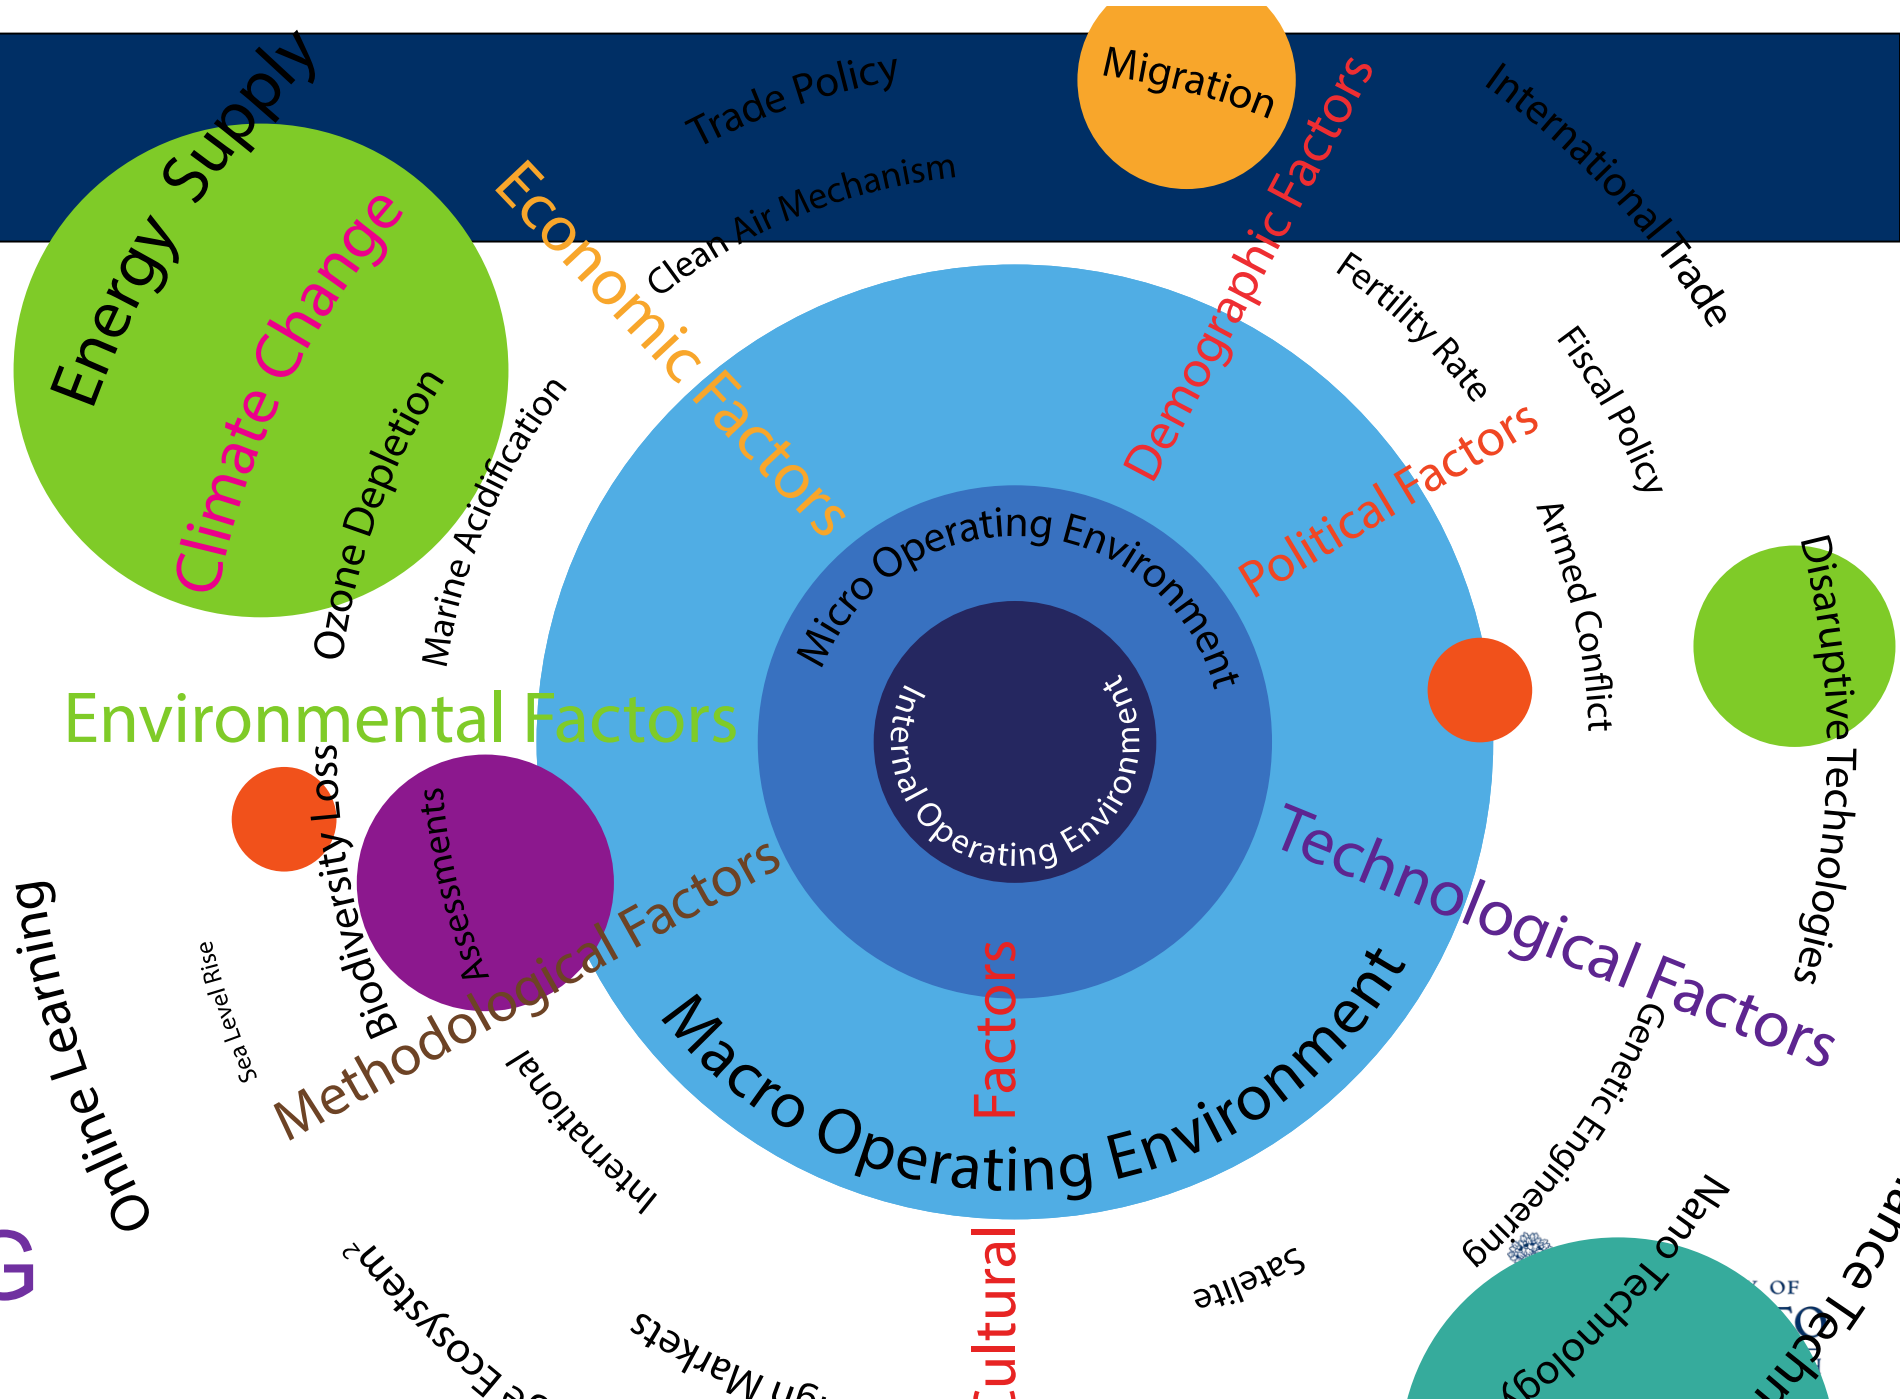

Environmental Factors

What makes universities special though, is that while we can access the various knowledge domains as they pertain to our *sustainability* needs, we also actively participate in developing these external knowledge domains.

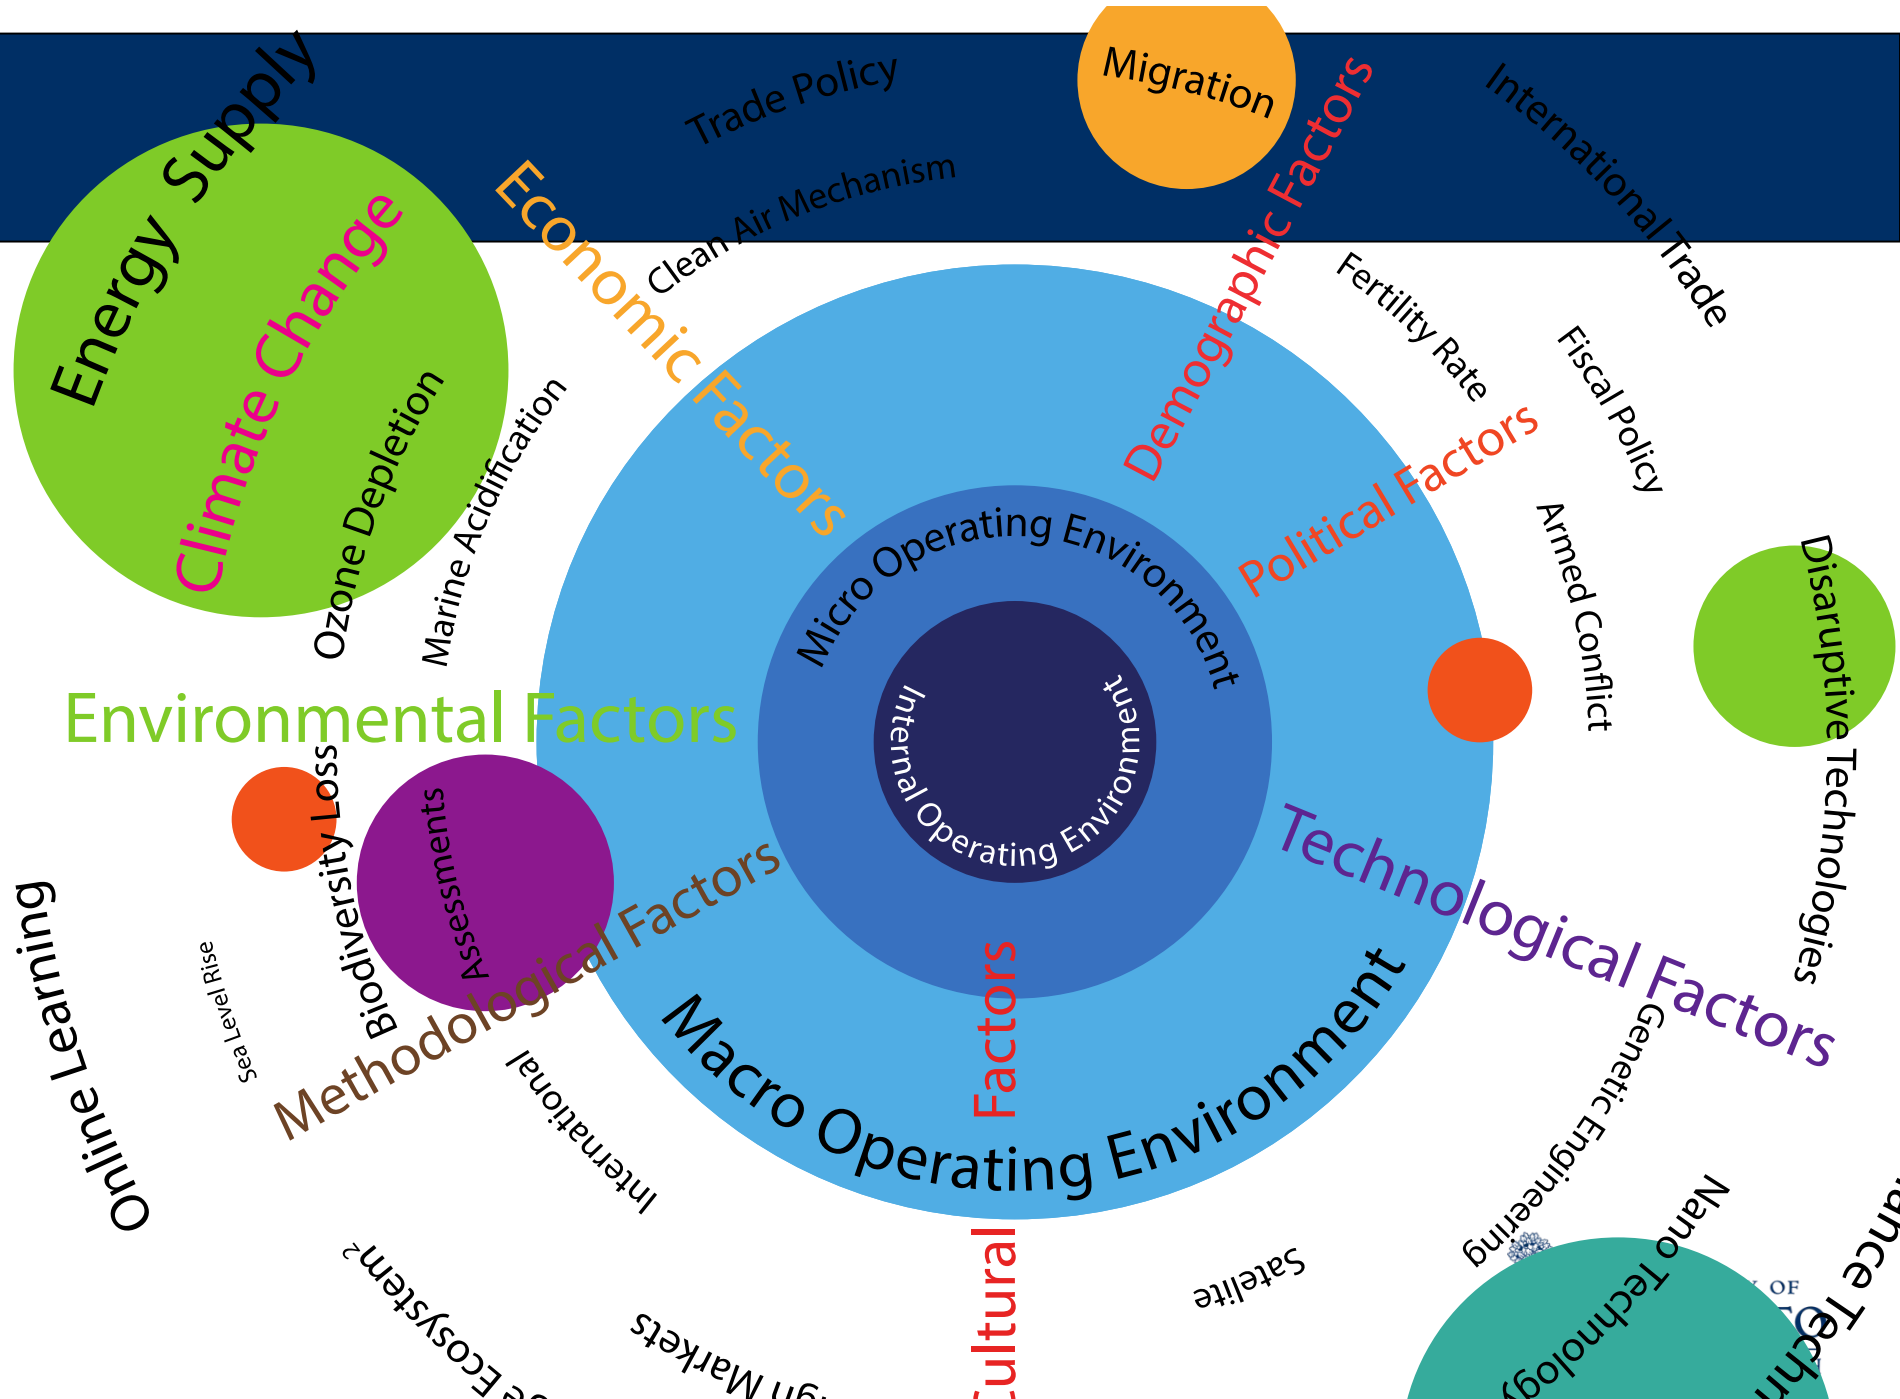

BUT WE
CAN'T DO
EVERYTHING

TWO QUESTIONS:

- How do we define ourselves (*niche*), given our limited resources and capacity.
- How do we *relate* different domains that exist within our campus?

But let's not get ahead of ourselves →

- Do we actually have control over our internal operating environment? What does it look like?
- And what about our relationship with St George Campus ...? Mississauga Campus?

INNER OPERATING ENVIRONMENT?

The **UTSC Strategic Plan** has been developed as a dynamic vehicle to proactively incorporate consultation, inclusion and implementation ... towards the attainment of agreed upon, institutional goals.

UTSC STRATEGIC PLAN

The plan commits to: *“evolve our processes and planning to enable the talented members of our community to develop their fullest potential. These actions are to be rooted in a comprehensive and intentional set of commitments, as follows (UTSC 2020):*

- *to embed our values of equity, diversity, inclusion and accountable stewardship into our teaching, learning, scholarship, daily routines and structures;*
- *to give pride of place to Indigenous initiatives that reflect our values and are intrinsically embedded in those practices and systems; and*
- *to ensure that we champion sustainable livelihoods, cultures, and ecosystems that have local and global relevance and resonance.*

Values of the UTSC Strategic Plan

INTENTIONAL INCLUSION

Only by genuinely embracing and understanding different experiences, backgrounds, perspectives, and identities can we sustain our vibrant intellectual community and address our global challenges. We take pride in the diversity of our community, but it is only meaningful in a culture of equity and inclusion that flows from active and intentional action to ensure that every voice is heard and everyone feels a strong sense of belonging.

STUDENTS AS PARTNERS

Students are active participants and partners in the educational process. From curriculum development to cutting-edge scholarship to community service that produces global leaders to shaping our values, our students play a critical role as valued partners in enriching our academic and community activities.

RECIPROCITY

We are defined by collaborative, fair, and reciprocal partnerships for the mutual benefit of colleagues, students, alumni, Indigenous communities, neighbours, and global networks. As an anchor institution in the eastern GTA, we are committed to shared leadership and will work with our local partners to ensure that we remain responsive, relevant, accountable, and accessible to our communities in the pursuit of our common goals while engaging the world.

ACCOUNTABLE STEWARDSHIP

We continually challenge the status quo in order to be more effective stewards of our resources and to exemplify individual and collective accountability. We make efficient use of our fiscal resources, promote transparent and participatory decision-making, and facilitate effective administrative processes that ensure continuous improvement in all that we provide to the internal and external communities that we serve.

We commit to respecting Indigenous traditions, lands, and ways of knowing; and to protecting the ecosystems that sustain us and which we hold in trust for future generations.

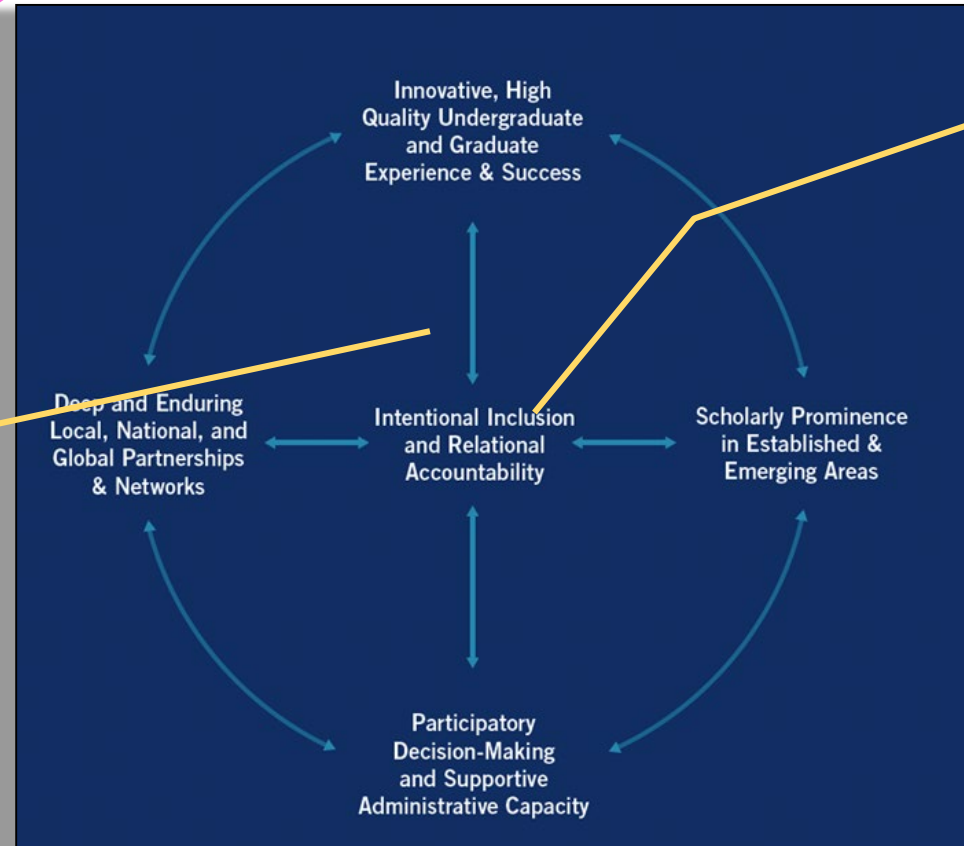

TRANSACTIONAL

TRANSFORMATIONAL

Using a classic, hierarchical, structure (*old school*) is hard enough ... but we will require something much more to *transform*.

The most obvious requirement is to identify: *'Who these people are, and what they do.'*

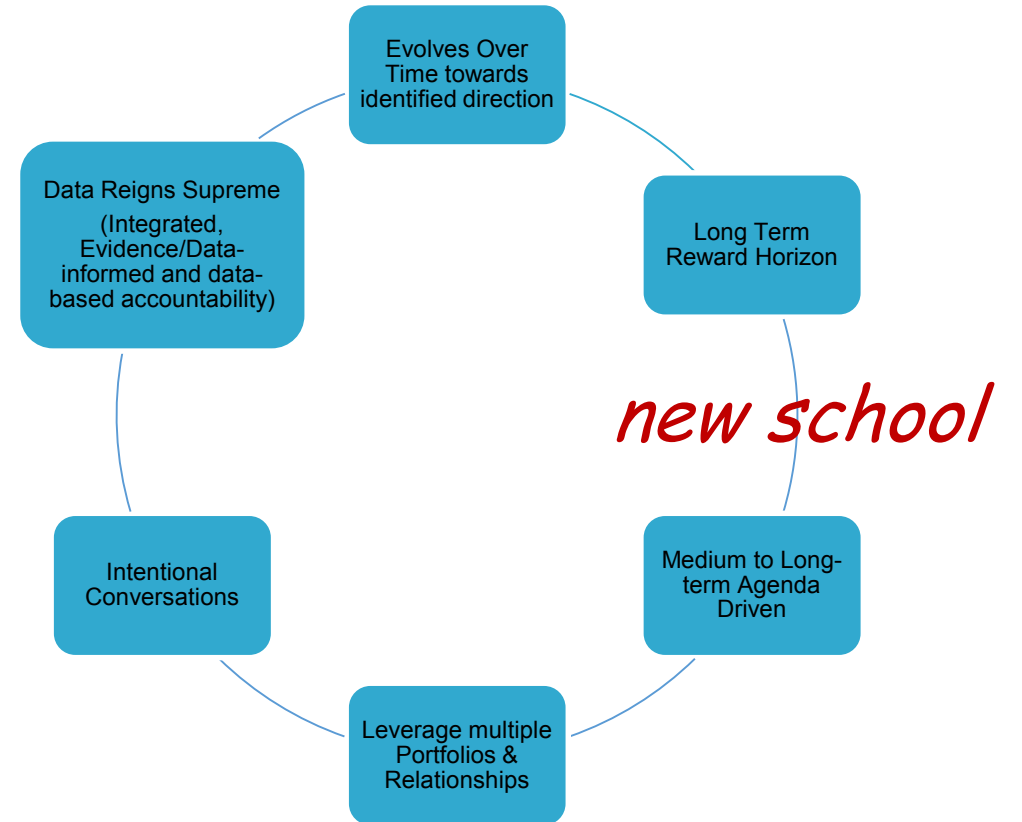

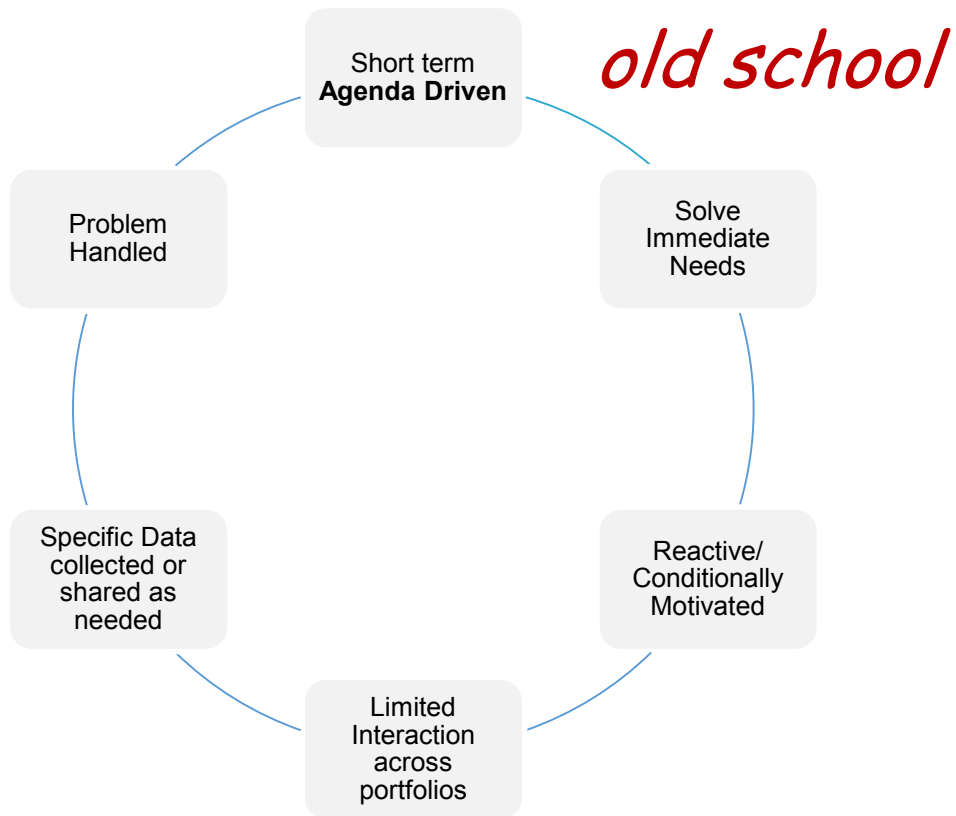

And ... *'How do we communicate between these varied knowledge domains\ functional processes?'*

We can start by asking: *'What' are the minimum requirements to implement this vision?'*

TRANSACTIONAL

TRANSFORMATIONAL

SIMPLE TRANSPARENCY ...

1. RESEARCH

- UTSC Bibliometric analysis (2015).
- DPES external review ... research
- RIISQ Author Network gap analysis
- NRCAN National Assessment(s)
- *ICIMOD, A Gendered Perspective ...*

SIMPLE TRANSPARENCY ...

1. RESEARCH

- UTSC Bibliometric analysis (2015).
- DPES external review ... research
- RIISQ Author Network gap analysis
- NRCAN National Assessment(s)
- *ICIMOD, A Gendered Perspective ...*

There are major caveats in using this sort of data, but if we augment such analysis ... we can start to pull together a broader perspective.

2. CURRICULUM
3. KNOWLEDGE EVENTS
 - Conferences
 - Workshops
 - Seminars
 - ADAMS Sustainability Celebrations (CECCS)

Three typical functional categories for universities!

¹Reflexive Analytics as a Precondition for Climate Services. (2016) 50th CMOS Congress & joint CGU Annual Meeting, Fredericton, NB.

CATALYST

Adams Sustainability Celebration is a tribute to the growing community of sustainability-minded students, faculty, and staff at the University of Toronto (U of T). The purpose of the event series is to celebrate successes, inspire new activities, build relationships, and collaboratively deepen campus engagement and involvement. We would like to acknowledge our future, and celebrate sustainability. This event was made possible by the Wendy Adams.

Events are not trivial, they are opportunities to nurture social capital, as well as exchange, interpret, integrate, and share knowledge across domains.

SIMPLE TRANSPARENCY ...

1. RESEARCH
2. CURRICULUM
3. KNOWLEDGE EVENTS

4. KNOWLEDGE APPLICATION
 - UTSC COOP Program
 - CECCS: Living Lab
 - UTSC Sustainability Office
 - UTSC Experiential Learning

Three typical functional categories for universities. There is also a fourth applied functional element that holds a special place in any environmental mandate¹.

Case Study: Environmental Science and Chemistry Building

Baffles increase heat transfer effectiveness – in this case the air exits the tubes cooler.

Case Study: Passive House

Case Study: Renewal for Carbon Reduction

The University of Toronto Scarborough is continuing to convert campus building heating systems from steam to hot water. Building on renovations on the original Science Wing building, UTSC will continue to convert heating systems in

the Humanities Wing, including the installation of high-efficiency boilers and ground source heat pumps. Combined with improved delivery and controls, the new system will result in better comfort and substantially lower GHG emissions.
