**ITEM IDENTIFICATION:**

Tuition Fee Schedules for Publicly-funded Programs, 2022-23

**JURISDICTIONAL INFORMATION:**

Pursuant to Section 5.11 (a) of its *Terms of Reference*, the Business Board recommends the schedule of tuition fees to Governing Council for approval.

**GOVERNANCE PATH:**

1. Business Board [for recommendation] (March 15, 2022)
2. **Executive Committee [for endorsement and forwarding] (March 22, 2022)**
3. Governing Council [for approval] (March 31, 2022)

**PREVIOUS ACTION TAKEN:**

The *Tuition Fee Schedules for Publicly-funded Programs 2021-22* was approved by the Governing Council at its April 6, 2021 meeting.

**HIGHLIGHTS:**

On January 17, 2019, the Ontario government announced a 10% cut to domestic tuition fees beginning in 2019-20, and a freeze at that level for 2020-21. The freeze was subsequently extended for an additional year to 2021-22 on April 30, 2021. The tuition fee reduction and freezes applied to all domestic students enrolled in programs that are funded via the provincial operating grant, including direct-entry undergraduate, second-entry and professional master's programs, and doctoral stream programs. At this time, no domestic fee framework has been announced for the 2022-23 fiscal

year. In the absence of a Provincial Framework, divisions have again been asked to consider a conservative budget scenario in which domestic tuition fees remain frozen for 2022-23. Tuition paid by international students is unregulated and will therefore be unaffected.

In 2021-22, the Government introduced a new policy allowing for differentiated fees for Out of Province domestic students. Fees for non-Ontario resident students, as defined under the OSAP definitions, could be increased by up to 3% while fees for Ontario residents would remain frozen. Given the lateness of the announcement of the fee framework, coming at the start of the Summer 2021 session, the University opted to not implement differentiated fees for 2021-22. However, if this policy continues for 2022-23, the University will proceed with establishing differential fees for Out of Province domestic students, with a 3% increase to fees for all undergraduate programs in 2022-23. The proposed undergraduate domestic tuition fee schedules for 2022-23 have been restructured and expanded accordingly.

Tuition revenue in for-credit programs of \$1.98 billion for 2022-23 represents approximately 61% of the University's total budgeted operating revenue of \$3.23 billion. With the continued freeze in operating grant revenue for 2022-23, new tuition revenues are critically necessary to maintain and fund investments in programs and services for students across academic and shared service divisions.

Tuition fees at the University of Toronto are determined in accordance with the University's Tuition Fee Policy, the Statement of Commitment Regarding International Students and the Provincial Government's Tuition Framework. The tuition fee policy speaks to five elements: advocacy, fee revenue, fee differentiation, fee level commitment and monitoring. In presenting this tuition schedule, the University reaffirms its commitment to student aid and its accessibility statement:

*"No student offered admission to a program at the University of Toronto should be unable to enter or complete the program due to lack of financial means."*

A full overview of financial assistance available to students is included in the 2020-21 Annual report on Student Financial Support, which accompanies this report through governance.

### **Domestic Tuition Fees**

As noted above, in the absence of a new Provincial tuition fee framework, Ontario resident domestic tuition fees are assumed to remain frozen for an additional year in 2022-23 while tuition fees for non-Ontario resident (ie. out of province) domestic students will be increased by 3 per cent. Full details on tuition in all programs are given in the restructured and expanded schedules that accompany this report.

There are some programs in which students move from a first-year general program to a more resource-intensive upper-year specialized program (Commerce, Business Administration, Management, Computer Science, Bioinformatics, Data Science, UTM Visual Studies, and Communication, Culture and Information Technology). Students pay the Arts and Science fee in first year and then a higher fee in the upper years of these programs. Tuition fees for 2023-24 for the second year of these programs would normally be submitted for approval in this year's Tuition Fee Schedules so as to provide advance notice to students entering first year of these programs in 2022-23. However, in the absence of a multi-year Provincial tuition fee framework, upper year domestic tuition fees for 2023-24 cannot be proposed for approval at this time. Consequently, domestic fees for 2023-24 for all programs and years of study will be submitted to Governing Council for approval in Spring 2023.

## **International Tuition Fees**

Tuition increases for students entering the tri-campus Arts & Science and Architecture programs will increase by 2% in 2022-23, which is a reduction from the 4% increase that was assumed in last year's tri-campus Arts & Science plans. Tuition increases for students entering and continuing in Applied Science and Engineering degree programs will also increase by 2%, which represents a reduction from the 3% increase that was assumed last year. Most other entering international fees will increase by 5% as assumed in last year's plan and reflecting their lower levels. The international fee for the Medicine MD program will remain at the current level in 2022-23 to be competitive with its top American peers. International fees for all of the conjoint programs with the Toronto School of Theology will also remain at their current levels for 2022-23. Consistent with the University's fee level commitment, tuition fee increases for continuing students will increase by no more than 5%.

Overall, undergraduate international tuition fees will increase by an average of 2.0% and graduate international tuition fees will increase by an average of 3.3%, excluding international PhD students paying domestic rates, and 2.0% when international PhD fees are included. In order to provide potential applicants with information for planning purposes, the attached schedules also include preliminary tuition fees for international students for 2023-24.

As of 2018-19, most international PhD students at the University of Toronto pay tuition fees equivalent to those of domestic students. The fee for international students that pay the standard domestic SGS fee is assumed to be frozen at \$6,210 for 2022-23.

International students registered in research-stream or professional Master's programs and professional doctoral programs do not follow the domestic tuition fee structure. Tuition fee increases for international students in research-stream master's, professional master's, and professional doctoral programs will range from 0% to 7% depending upon the resource requirements of the program and the level of the tuition fee relative to competing programs.

The University continues to monitor the impact of tuition fees to ensure that enrolment is unaffected, as required by the University's Fee Policy. In recent years, the University's Enrolment Reports have consistently shown that demand for University programs continues to be very strong and undergraduate entering averages continue to trend higher across all three campuses.

## **FINANCIAL IMPLICATIONS:**

Revenue projections for publicly-funded programs are included in the *Budget Report 2022-23 and Long Range Budget Guidelines 2022-23 to 2026-27*. Related information on student aid accompanies this report in the *Annual Report on Student Financial Support, 2020-21*.

## **RECOMMENDATION:**

Be it Resolved

THAT the following recommendation be endorsed and forwarded to the Governing Council

THAT the 2022-23 tuition fees as described in the *Tuition Fee Schedule for Publicly-Funded Programs 2022-23 (March 1, 2022)* be approved.

## Tuition Fees at the University of Toronto

Tuition fees at the University of Toronto are determined in accordance with the University's Tuition Fee Policy (Appendix A1), the Statement of Commitment Regarding International Students (Appendix A2) and the Provincial Government's Tuition Framework. In presenting this tuition schedule, the University reaffirms its commitment to student aid and its accessibility statement:

“No student offered admission to a program at the University of Toronto should be unable to enter or complete the program due to lack of financial means.”

## The Provincial Tuition Framework

On January 17, 2019, the Ontario government announced a 10% cut to domestic tuition fees beginning in 2019-20, and a freeze at that level for 2020-21. The freeze was subsequently extended for an additional year to 2021-22 on April 30, 2021. Under the Provincial Framework, the tuition fee reduction and freezes applied to all domestic students enrolled in programs that are funded via the provincial operating grant, including direct-entry undergraduate, second-entry and professional master's programs, and doctoral stream programs. Tuition paid by international students is unregulated and was therefore unaffected.

The compounding effect of this three-year framework has a long-lasting impact, and represents a reduction of \$139 million in domestic tuition revenue for 2022-23 relative to the prior long-range budget guidelines that assumed continuation of the previous framework of 3% annual average fee increases.

At this time, no domestic fee framework has been announced for the 2022-23 fiscal year. In the absence of a Provincial Framework, divisions have again been asked to consider a conservative budget scenario in which domestic tuition fees remain frozen for 2022-23. A one-year extension of the domestic tuition fee freeze would further reduce tuition fee revenue by \$28 million in 2022-23 relative to the University's previous long-range budget plans from prior to the 2019-20 Framework.

In 2021-22, the Government introduced a new policy allowing for differentiated fees for Out of Province domestic students. Fees for non-Ontario resident students, as defined under the OSAP definitions, could be increased by up to 3% while fees for Ontario residents would remain frozen. Given the lateness of the announcement of the fee framework, coming at the start of the Summer 2021 session, the University opted to not implement differentiated fees for 2021-22. However, if this policy continues for 2022-23, the University will proceed with establishing differential fees for Out of Province domestic students, with a 3% increase to fees for all undergraduate programs in 2022-23. The proposed undergraduate domestic tuition fee schedules for 2022-23 have been restructured and expanded accordingly.

## Tuition Revenue and Financial Aid

The proposed budget for 2022-23 includes incremental, for-credit tuition fee revenue of \$102 million. This reflects the net impact of updated international and domestic enrolment plans, an assumed one-year continuation of the freeze in domestic tuition fees, and a 2% average increase in international tuition fees. With the continued freeze in per-student operating grant revenue for 2022-23, new tuition revenues are critically

necessary to maintain and fund investments in programs and services for students across academic and shared service divisions.

The University continues to monitor the impact of tuition fees to ensure that enrolment is unaffected, as required by the University's Tuition Fee Policy. Demand for University programs from both domestic and international students continues to be very strong and undergraduate entering averages continue to trend higher across all three campuses.

Growth in international tuition revenues will continue to support a significant investment in services to ensure a high-quality experience and the success of our international students. Direct entry undergraduate divisions have committed to a significant investment in merit-based scholarships for international students from diverse global regions. Beginning with the incoming class in 2020-21, direct entry divisions are setting aside 6% of international undergraduate tuition revenue to create scholarships to attract top international students from around the world. Each division has designed its own award program based on diverse criteria including merit, financial need, priority regions for diversification, and intended program of study.

## **Financial Aid**

The University of Toronto's Policy on Student Financial Support sets out the principle that students should have access to the resources that will enable them to meet their financial needs, as determined through the same methodology used by the Ontario Student Assistance Program (OSAP), with appropriate modifications as determined by the University Registrar and the Vice-Provost, Strategic Enrolment Management in consultation with the academic divisions of the University.

Undergraduate and graduate students at the University of Toronto have access to a wide range of financial supports through the University, in addition to those available through OSAP and other government loan and grant programs. Some are based on need, and others on measures of merit, such as academic achievement or leadership. There are supports for international and Canadian students as well as dedicated supports for students with disabilities.

The University's primary mechanism for providing need-based aid to OSAP-eligible direct-entry undergraduate students is the University of Toronto Advance Planning for Students (known as UTAPS) program. Need-based aid for students in second entry and professional master's programs is administered in divisionally-run programs, allowing for a more individualized and nuanced approach to providing assistance. Divisional programs are supported where necessary by access to an institutionally-negotiated line of credit.

In 2019-20, when the Provincial Government announced the 10% reduction and freeze to domestic fees, it also introduced significant changes to need-based financial aid provided via OSAP. Changes to OSAP included a reduction in the income threshold under which students qualify for non-repayable aid (grants), an increase in the proportion of aid provided as loans, and increases in required parental and student contributions to the cost of education. The Government stated that they would target OSAP funds to students with the greatest financial need, distributing a larger proportion of grant funding to students with family incomes of less than \$50,000.

The changes to OSAP reduced the overall amount of financial aid payable to students, including the University's obligation to cover unmet financial need as defined by OSAP under the Student Access Guarantee. However, the University remains firm in its commitment to the principle of accessibility within the Policy on Student Financial Support – that financial circumstances should not stand in the way of a qualified student entering or completing

their degree – and has continued to provide significant additional financial support to students beyond the government requirements. In addition, the University has provided more than \$11 million in emergency bursary support to assist over 8,000 students in response to COVID-19 disruptions since spring 2020.

## University of Toronto Fee Level Commitment

The University's Tuition Fee Policy (Appendix A1) states that in establishing the tuition fee schedule, a commitment will be made to each student upon entry as to the level of fees to be charged over the normal course of the full-time program of study. Beginning in 1998-99, the University of Toronto made a commitment to students in its fee schedules that, unless otherwise noted, no student continuing in a program will be subject to a fee increase of more than 5% per year. This policy remains in effect regardless of the provincial tuition framework in place at any given point in time. For students in the doctoral stream, the commitment is in effect for two years at the Master's level and typically for four years at the doctoral level (with some exceptions for longer doctoral programs). For students who participate in a Professional Experience Year or in co-op programs as part of their undergraduate program, the normal length of full-time study increases by one year. For undergraduate students entering the University via an International Foundation Program, the normal length of study also increases by one year. The normal length of a program is confirmed each year and posted on the University's website.

## Tuition Fee Structures

### Program Fees and Course Fees

Full-time undergraduate student fees are levied in one of two ways: program fees or course fees. Under a program fee structure, students pay a single fee for study classified as full-time for fee purposes. Under a course fee structure, students pay a fee for each course in which they are registered. Most University of Toronto programs levy fees under the program fee model.

### Programs with higher fees in upper years

In some undergraduate programs, students are admitted after completing one or more years of study in arts and science courses. During the initial year(s), students pay general arts and science tuition; upon admission to the program, students pay a higher tuition fee in upper years. This structure reflects the move from a general program to an upper-year specialized program. These programs include: Commerce; Business Administration; Management; Computer Science; Bioinformatics; Data Science; UTM Visual Studies; Communication, Culture and Information Technology (CCIT); and the undergraduate program in Information.

Bachelor of Information (BI) students complete the equivalent of two years of full-time study at the undergraduate level in any discipline before transferring into the BI program. Once registered in the BI program, students pay the same tuition as Computer Science students.

### Programs with fees set at beginning of program (Cohort Fees)

There are a few programs in which tuition fees are normally set at the point of entry to the program and are held constant for students in the cohort as they progress through the program. These programs include the

MD/PhD, the Morning & Evening MBA (3-year), the MEng (extended full-time option), the MFC (extended full-time option), the MHI Executive Stream, and the Global Professional Master of Laws (extended full-time option).

### **Combined, Double Degree, and Dual Degree Program Fees**

The University has an increasing number of combined program offerings, and has begun to develop additional double degree and dual degree programs. Schedules B4, C4 & E5 provide detailed information on fees for these programs. The proposed fees by year of study for almost all cases are based on the fees for the constituent programs proposed in Schedules B1-B3, C1-C3, D & E4.

### **Partial Fees**

Many students at the University of Toronto are charged partial fees primarily based on the tuition fee for full-time study. The following formulas guide the derivation of partial fees:

1. When computing a partial fee, the respective fee for full-time study is the tuition fee for either domestic or international students, depending on the legal status of the student.
2. Part-time fees for undergraduate programs are equal to the full-time fees pro-rated on a per-course basis relative to full-time course load.
  - a. In programs for which tuition fees are levied on a course-by-course basis, the course tuition fee is the tuition fee for the program divided by the normal course load for full-time study.
  - b. Part-time domestic MD Extended Clerkship students will be charged a program fee of \$3,445 (Ontario resident) or \$3,545 (Ontario non-resident) per term in 2022-23. It is anticipated that most students will register in the Summer and Fall terms. No international students are expected.
  - c. Part-time domestic PharmD for Pharmacists students will be charged \$2,191.46 (Ontario resident) or \$2,257.20 (Ontario non-resident) per half course in 2022-23 while the part-time international rate will be \$5,710.66 per half course.
3. Part-time fees for graduate programs are normally set at 30% of the full-time annual fee with the following exceptions:
  - a. The Nursing Post-Masters Nurse Practitioner Diploma program is offered on a part-time basis over 20 consecutive months. Domestic students will pay \$8,580 and international students will pay \$24,970 in 2022-23.
  - b. The Medicine Graduate Diploma in Health Research is available to MD students. A domestic part-time per-term fee of \$1,582.50 will be charged during 2022-23 whenever such students are registered in the diploma program. The international part-time per-term fee will be \$5,179.50 for 2022-23.
  - c. The UTM Master of Forensic Accounting is only offered on a part-time basis. The proposed part-time program fee rates for 2022-23 are listed in Schedules D & E4.

4. Because of the minimum costs incurred for registration in any program, no tuition fee in 2022-23, after refunds in the case of full withdrawal from the University, shall be less than \$311.

### **Conjoint Programs with the Toronto School of Theology**

In accordance with the Memorandum of Agreement between the University of Toronto and the Toronto School of Theology (TST), proposed tuition fees for conjoint undergraduate and graduate programs are forwarded to the Business Board for review and approval annually.

Schedules B3, C3 and E3 include the proposed tuition fees for the conjoint programs with the Toronto School of Theology: basic degree programs, DMIN, ThD, ThM, PhD, and the MA in Theological Studies.

Note that tuition fees for TST's non-conjoint programs are not included as these are not University of Toronto programs. Approval for these fees is through the TST Board of Trustees.

## **Tuition Fees for Domestic Students**

The University's Tuition Fee Policy (Appendix A1) states that public funding should be supplemented as necessary to offer students an educational experience of a quality that ranks with that of the finest public research universities in the world. Furthermore, it calls for a differentiated fee structure in which tuition fees reflect individual program goals, resource requirements, program costs, etc.

Tuition fees therefore differ by program. Appendix B (Domestic Ontario Resident) and Appendix C (Domestic Non-Ontario Resident) list the proposed tuition fees for domestic students, by program, and by entering cohort where necessary. For the purposes of this report, direct-entry undergraduate programs are programs of study into which a student may be admitted directly from high school (e.g., Engineering, Arts and Sciences, Architecture, Music and Kinesiology) plus the Transitional Year Program (TYP). Second-entry undergraduate programs are programs of study that require a student to have some university preparation before admission to the program (e.g., Law JD, Medicine MD, Dentistry DDS, PharmD and Nursing).

As noted earlier in this report, in the absence of a Provincial tuition fee framework, divisions have been asked to consider a conservative budget scenario in which Ontario resident domestic tuition fees remain frozen for one additional year. Fees for Non-Ontario residents, as defined by the Government, will increase by 3 per cent in 2022-23, consistent with the increase under the 2021-22 Provincial Framework.

Undergraduate students entering first year in 2022-23 should note that tuition fees for upper year students in the Commerce, Business Administration, Management, Computer Science, Data Science, Information, Bioinformatics, Visual Studies, and Communication, Culture and Information Technology (CCIT) programs are provided separately in Schedules B2 and C2. Fees for the upper years of these programs in 2023-24 will be submitted to Governing Council for approval in Spring 2023 and will comply with the Provincial Tuition Framework in place at that time.

## Tuition Fees for International Students

The University of Toronto is committed to maintaining and strengthening its international enrolment as expressed in the Statement of Commitment Regarding International Students given in Appendix A2. The University has invested in, and will continue to invest in, services to enhance the experience and success of our international students. International fees (see Appendix C) are set at a level that takes into consideration the full cost of providing a program and with reference to fees at peer Canadian and US universities.

The international tuition fee for students entering the tri-campus Arts & Science and Architecture programs will increase by 2% in 2022-23, which is a reduction from the 4% increase that was assumed in last year's tri-campus Arts & Science plans and is currently posted on the University's website to assist students with planning for next year. Tuition for Applied Science & Engineering degree programs will also increase by 2%, which represents a reduction from the 3% increase assumed last year. Most other entering international fees will increase by 5%, consistent with the assumptions in last year's plan and reflecting their lower fee levels. The international fee for the Medicine MD program will remain at the current level in 2022-23 to be competitive with its top American peers. International fees for all of the conjoint programs with the Toronto School of Theology will also remain at their current levels for 2022-23. Consistent with the University's fee level commitment, tuition fee increases for continuing students will increase by no more than 5%. The weighted average undergraduate international tuition fee increase across all programs and years of study in 2022-23 will be 2.0%.

The tables in Appendix E also include an assumption of international tuition fee levels for 2023-24 for information only. For planning purposes, undergraduate arts & science fees are projected to increase by 2% in 2023-24 and 3% for undergraduate engineering programs, with variations in other programs to reflect competitive environments (lower rate of increase) or exceptional resource requirements (higher rate of increase).

Tuition fees for students entering second year of the Commerce, Business Administration, Management, Computer Science, Bioinformatics, Data Science, UTM Visual Studies, and Communication, Culture and Information Technology (CCIT) programs in 2022-23 will increase by 2%. Students in the 2022 entering cohort will be moving to second year of these programs in 2023-24. The assumed upper year fee in these programs for 2023-24 is 2% higher than the equivalent 2022-23 upper year fee level (Schedule E2). These 2023-24 fees are provided for information only and will be submitted to Governing Council for formal approval in Spring 2023. They are included in this report to provide potential applicants with information regarding preliminary tuition fee levels for planning purposes.

As of 2018-19, most international PhD students at the University of Toronto pay tuition fees equivalent to those of domestic students. The fee for international students that pay the standard domestic SGS fee is assumed to remain at \$6,210 for 2022-23.

Tuition fee increases for international students in research-stream master's, professional master's, and professional doctoral programs will range from 0% to 7% in 2022-23, depending upon the resource requirements of the program and the level of the tuition fee relative to competing programs. Tuition fees for students in the EdD, DMA and DN professional doctorate programs will increase by 5% for 2022-23. In response to competitive pressures from peer programs, the international fees for the Master of Biotechnology, Master of Accounting

and Finance, Master of Management and Professional Accounting, Master of Forensic Accounting and Master of Finance programs will remain at their current levels for 2022-23.

The weighted average tuition fee increase for international graduate students, excluding international PhD students paying domestic rates, in 2022-23 is 3.3%. When international PhD programs are included, the average increase in international graduate fees is 2.0%.

Schedule E5 includes the international fees for students in combined, double degree or dual degree programs. Most combined programs do not currently have international students enrolled. In the event that they do in future, international tuition fees would be charged following the same practices as outlined in the domestic Schedule B4.

## Appendix A1: Tuition Fee Policy

The University of Toronto's tuition fee policy should reflect its mission as an internationally significant, public research university with undergraduate, graduate and professional programs of excellent quality. Such a goal assumes an appropriate level of funding which, for a public university, means principal support from the Provincial and Federal Governments, and from endowment funds as well as tuition fees. It also assumes the existence of programs of student aid to maintain the accessibility of the University to students of varying financial means. The effect of this policy should be neutral with regard to enrolment levels, which will be determined from time to time through the University's planning processes. Our tuition fee policy has five elements:

1. **Advocacy.** In making the case for public policies strongly supportive of an accessible public system of university education, the University will continue to advocate ongoing and substantial public investment in the university sector.
2. **Fee Revenue.** The University of Toronto will continue to be a public university, for which ongoing and substantial support from government will always be essential. The basic principle of the tuition policy is that public funding should be supplemented as can be demonstrated to be necessary to offer students an educational experience of a quality that ranks with that of the finest public research universities in the world.
3. **Fee Differentiation.** The University should continue to move toward a more differentiated structure of fees across programs. In setting fees for each particular program, the following factors will be taken into account:
  - Fees should take into account the plans and aspirations of each academic division, and the level of resources necessary to achieve high program quality.
  - Program costs should be taken into account in setting fees.
  - Fees should be set at a level that is competitive with programs of similar quality in institutions with which we compete or expect to compete for students.
  - Fee levels should be relatively higher in programs for which the future income prospects of graduates are relatively higher.
  - Fee levels should reflect a justifiable balance across public and private sources of revenue per student.
  - Fee policy should allow for intentional, disproportionate public subsidies and intra-university cross-subsidies, where a case for cross-subsidization can be made.

In bringing forward the tuition fee schedule each time, the administration shall provide an explanation taking account of the above factors.

4. **Fee Level Commitment.** The tuition fee schedule will include a commitment to be made to each student upon entry as to the level of fees to be charged over the normal course of the full-time program of study.
5. **Monitoring.** In presenting the annual Report on Enrolment, the Vice-President and Provost shall include commentary regarding the effects, if any, of changes in tuition fees upon changes in enrolment.

## Appendix A2: Statement of Commitment Regarding International Students

### Preamble

International students are an essential feature of the University of Toronto's participation in international scholarship. They contribute to the international character of the University's research, and provide opportunities for the international exchange of knowledge through its teaching programs. The presence of outstanding students from all parts of the world in the University's undergraduate and graduate, professional, and research programs, helps to achieve the excellence the University seeks to assure for all its activities. On the University's campuses international students also make an important and positive contribution to the cultural life of the community and create lasting relationships of benefit to individuals as well as to the institution and the country generally. And finally, by enrolling international students, the University of Toronto, as an internationally significant university, has an opportunity to share its educational resources with other countries whose institutions are still evolving.

In light of these considerations, the Governing Council has adopted the Statement of Commitment Regarding International Students that commits the University to enrolling a broad mix of international students in its programs, and that articulates the basic principles that will guide their admission to the University, arrangements for their financial support, right of access to academic courses and programs, and the provision of services to address their particular needs.

This Statement of Commitment applies to University of Toronto students in university degree, diploma and certificate programs who are not Canadian citizens, permanent residents, or convention refugees.

### Statement of Principles

1. Within the Framework of divisional academic plans, the University of Toronto welcomes international students into all of its programs.
2. The admission of international students will be consistent with the Policies and Principles for Admission to the University of Toronto approved by the Governing Council in 1991.
3. The University will broaden and strengthen its recruiting efforts abroad.
4. Once admitted to the University, international students will have access to the same range of courses and support services on the same basis as other students.

### Financial Support

1. International students who are admitted and enrolled may encounter financial emergencies and the University will provide financial assistance as needed and where possible.
2. The University will develop a program of international admission scholarships using its own resources and support from external sources to be awarded on the basis of exceptional academic merit and financial need.
3. The Report of the Vice-Provost, Students on Student Financial Support, submitted annually to governance for information, will include data on the support provided to international students.

## Appendix B: Undergraduate Domestic (Ontario Resident) Tuition Fee Schedules

Table B1: Domestic (Ontario Resident) Tuition Fees for Undergraduate Direct-Entry Programs

		2021-22	2022-23 APPROVAL
<b>APPLIED SCIENCE &amp; ENGINEERING</b>			
	Bachelors	\$14,180	\$14,180
	Undergraduate Specials (AE NDEGP)	\$12,310	\$12,310

<b>TRANSITIONAL YEAR PROGRAMME</b>			
	TYP Regular Program	\$5,170	\$5,170
	TYP Extended Program	\$2,570	\$2,570
<b>Notes:</b>			
1)	Tuition fee increases for domestic students comply with both the Provincial Tuition Fee Framework, and the University's internal Fee Level Commitment to continuing students. The Fee Level Commitment ensures increases of no more than 5% annually for in-program students, guaranteed for the normal length of a full-time program. Students who exceed the normal length of their program are charged the same tuition as students in the final year of that program. The existing Provincial Tuition Fee Framework expires on April 30, 2022. Pending the announcement of a new Framework, these fee schedules assume that the domestic tuition fee freeze will remain in effect for 2022-23. The fee schedules will be revisited if the new Framework differs from this assumption.		
2)	Tuition fee rates for each year noted above are effective May 1st. For example, the tuition fees for 2022-23 commence in the Summer 2022 session.		

Table B2: Domestic (Ontario Resident) Tuition Fees for Undergraduate Programs with Higher Fees in Upper Years

Students entering these programs pay a general Arts & Science program fee in Year 1. They begin to pay a higher specialized program fee in either Year 2 or in Year3 for the Bachelor of Information only.

<b>TRANSITIONAL YEAR PROGRAMME</b>			
	TYP Regular Program	\$5,170	\$5,320
	TYP Extended Program	\$2,570	\$2,640
<b>Notes:</b>			
1)	Tuition fee increases for non-Ontario resident students comply with both the Provincial Tuition Fee Framework, and the University's internal Fee Level Commitment to continuing students. The 2021-22 Tuition Fee Framework introduced a new policy that permitted a 3% increase for non-Ontario resident students. This framework will be implemented in 2022-23 at the undergraduate level only. The Fee Level Commitment ensures increases of no more than 5% annually for in-program students, guaranteed for the normal length of a full-time program. Students who exceed the normal length of their program are charged the same tuition as students in the final year of that program. The existing Provincial Tuition Fee Framework expires on April 30, 2022. Pending the announcement of a new Framework, these fee assumptions for non-Ontario residents will remain in effect for 2022-23. The fee schedules will be revisited if the new Framework differs from this assumption.		
2)	Tuition fee rates for each year noted above are effective May 1st. For example, the tuition fees for 2022-23 commence in the Summer 2022 session.		

Table C2: Domestic (Non-Ontario Resident) Tuition Fees for Undergraduate Programs with Higher Fees in Upper Years

Students entering these programs pay a general Arts & Science program fee in Year 1. They begin to pay a higher specialized program fee in either Year 2 or in Year 3 for the Bachelor of Information only.

Students who exceed the normal length of their program are charged the same tuition as students in the final year of that program. The existing Provincial Tuition Fee Framework expires on April 30, 2022. Pending the announcement of a new Framework, these fee assumptions for non-Ontario residents will remain in effect for 2022-23. The fee schedules will be revisited if the new Framework differs from this assumption.			
2)	Tuition fee rates for each year noted above are effective May 1st. For example, the tuition fees for 2022-23 commence in the Summer 2022 session.			
3)	Bachelor of Information students will first complete at least the equivalent of two years of full-time study at the undergraduate level in any discipline. The lowest 3-campus A&S Year 1-2 fee rates are displayed above for demonstration purposes. BI students will then pay the same tuition as Computer Science students.			

Table C2: Domestic (Non-Ontario Resident) Tuition Fees for Undergraduate Programs with Higher Fees in Upper Years (continued)

Students entering these programs pay a general Arts & Science program fee in Year 1. They begin to pay a higher specialized program fee in either Year 2 or in Year3 for the Bachelor of Information only.				
Notes	Cohort	Program Fees - Domestic (Non-Ontario Resident)	2021-22	2022-23 APPROVAL
<b>Commerce, Business Administration</b>				
	2019	Commerce/Business Administration	\$15,900	\$16,370
	2020	Commerce/Business Administration	\$15,900	\$16,370
	2021	Commerce/Business Administration	\$6,100	\$16,370
	2022	Commerce/Business Administration	NA	\$6,280
<b>Management UTM</b>				
	2019	Management UTM	\$12,720	\$13,100
	2020	Management UTM	\$12,720	\$13,100
	2021	Management UTM	\$6,100	\$13,100
	2022	Management UTM	NA	\$6,280
<b>Notes:</b>				
1)	Tuition fee increases for non-Ontario resident students comply with both the Provincial Tuition Fee Framework, and the University's internal Fee Level Commitment to continuing students. The 2021-22 Tuition Fee Framework introduced a new policy that permitted a 3% increase for non-Ontario resident students. This framework will be implemented in 2022-23 at the undergraduate level only. The Fee Level Commitment ensures increases of no more than 5% annually for in-program students, guaranteed for the normal length of a full-time program. Students who exceed the normal length of their program are charged the same tuition as students in the final year of that program. The existing Provincial Tuition Fee Framework expires on April 30, 2022. Pending the announcement of a new Framework, these fee assumptions for non-Ontario residents will remain in effect for 2022-23. The fee schedules will be revisited if the new Framework differs from this assumption.			
2)	Tuition fee rates for each year noted above are effective May 1st, For example, the tuition fees for 2022-23 commence in the Summer 2022 session.			

Table C3: Domestic (Non-Ontario Resident) Tuition Fees for Second-Entry Undergraduate Programs

		2021-22	2022-23 APPROVAL
<b>ARTS &amp; SCIENCE incl. UTM &amp; UTSC</b>			
	WDW Certificate - Human Resource Management (CHRM)	\$6,100	\$6,280
	WDW Certificate - Teaching English to Speakers of Other Languages (TESOL)	\$4,880	\$5,024

Master of Management in Urban Innovation	\$16,880	\$16,880
Master of Science in Sustainability Management	\$16,880	\$16,880
Combined Bachelors / Master of Science in Sustainability Management Program	<b>SEE TABLES B4 &amp; C4</b>	
<b>Notes:</b>		
1)	Tuition fee increases for domestic students comply with both the Provincial Tuition Fee Framework, and the University's internal Fee Level Commitment to continuing students. The Fee Level Commitment ensures increases of no more than 5% annually for in-program students, guaranteed for the normal length of a full-time program. Students who exceed the normal length of their program are charged the same tuition as students in the final year of that program. The existing Provincial Tuition Fee Framework expires on April 30, 2022. Pending the announcement of a new Framework, these fee schedules assume that the domestic tuition fee freeze will remain in effect for 2022-23. Non-Ontario resident graduate students will not be subject to differentiated fees in 2022-23. The fee schedules will be revisited if the new Framework differs from this assumption.	
2)	Tuition fee rates for each year noted above are effective May 1st. For example, the tuition fees for 2022-23 commence in the Summer 2022 session.

	Graduate Non-Degree, GPLLM Half Course Fee	\$3,600	\$3,600
<b>Notes:</b>			
1)	Tuition fee increases for domestic students comply with both the Provincial Tuition Fee Framework, and the University's internal Fee Level Commitment to continuing students. The Fee Level Commitment ensures increases of no more than 5% annually for in-program students, guaranteed for the normal length of a full-time program. Students who exceed the normal length of their program are charged the same tuition as students in the final year of that program. The existing Provincial Tuition Fee Framework expires on April 30, 2022. Pending the announcement of a new Framework, these fee schedules assume that the domestic tuition fee freeze will remain in effect for 2022-23. Non-Ontario resident graduate students are not subject to differentiated fees in 2022-23. The fee schedules will be revisited if the new Framework differs from this assumption.		
2)	Tuition fee rates for each year noted above are effective May 1st. For example, the tuition fees for 2022-23 commence in the Summer 2022 session.		
4) &	Graduate Dentistry:		
5)	4) This field is for students enrolled in the MSc and PhD who are not also undertaking concurrent clinical specialty training.		
	5A) After minimum registration, in year 3 & onwards students are subject to the prevailing SGS doctoral stream tuition		
	5B) After minimum registration, in year 4 & onwards students are subject to the prevailing SGS doctoral stream tuition		
	5C) After minimum registration, in year 5 & onwards students are subject to the prevailing SGS doctoral stream tuition		
	5D) After minimum registration, in year 7 & onwards students are subject to the prevailing SGS doctoral stream tuition

Dual degree programs			
<b>Notes:</b>			
1)	Tuition fees for continuing full-time international students are limited to maximum 5% for the normal length of a full-time program. The normal length of program is two to six years. Students who exceed the normal length of their program will be charged the same tuition as students in the final year of that program.		
2)	Tuition fee rates for each year noted above are effective May 1st. For example, the tuition fees for 2022-23 commence in the Summer 2022 session.

11	Law LLM/Universidad Torcuato Di Tella LLB	NA	\$46,690	\$49,020
<b>Notes:</b>				
1)	Most of the combined programs do not currently have international student enrolment. In the event that they do in future, international tuition fees will be charged following the same applicable fee patterns as outlined in the domestic Ontario Resident Schedule B4.			
2)	Tuition fee rates for each year noted above are effective May 1st. For example, the tuition fees for 2022-23 commence in the Summer 2022 session.			
7)	Includes co-op and non co-op programs.			
8)	After Year 8, MD/PhD students will be subject to the prevailing doctoral stream tuition fee rates.			
9)	Each cohort will start in the prior Fall at the other institution and then register as MGA students at UoFt in the following Summer.			
10)	Each cohort will be subject to 50% of the UoFt annualized LLM fee rate in the Fall terms of two consecutive years. Students will pay fees to Tsinghua University in the Winter terms of the same years. UoFt fees will not be levied until Fall 2022 for the LLM/JM students.			
11)	The first cohort started in January 2018 at the Universidad Torcuato Di Tella in Argentina and then will register at UoFt after 4.5 years. UoFt fees will be levied for the first time in Fall 2022/Winter 2023.			
12)	Students from the South China University of Technology's (SCUT) School of Mechanical and Automotive Engineering (SMAE) will complete their fourth year of undergraduate studies by taking undergraduate MIE courses registered at UoFt as non-degree students. They will receive a conditional offer of admission from MIE into a MENG program for the following year.			

Table E5: International Tuition Fees for Combined, Double Degree and Dual Degree Programs  
(continued)

The tuition fees for the combined, double, and dual degree programs by cohort/year of study are based on the individual program fees proposed in Schedules E1, E2, E3 & E4.

<b>Notes:</b>				
2)	Tuition fee rates for each year noted above are effective May 1st. For example, the tuition fees for 2022-23 commence in the Summer 2022 session.			
13)	The first cohort started in Fall 2020 at the China Medical University and then registered as MEd students at UofT in Fall 2021. UofT fees were not levied until Fall 2021/Winter 2022. Each cohort will pay tuition at CMU in Year 1, tuition at UofT in Year 2. Students will only be registered at UofT in the Fall term of the third year of time so will be charged 50% of the prevailing MEd continuing student tuition fee rate.			
14)	The first cohort will start in Fall 2023 at the China Medical University and then be registered as MEd students at UofT in Fall 2024. UofT fees will not be levied until Fall 2024/Winter 2025. Each cohort will pay tuition at CMU in Year 1, tuition at UofT in Year 2. Students will only be registered at UofT in the Fall term of the third year of time so will be charged 50% of the prevailing MEd continuing student tuition fee rate.
