

# Degrees Awarded Report 2023

February 2023

Planning & Budget Office

UNIVERSITY OF  
TORONTO

---

# Introduction

This report describes undergraduate and graduate degrees awarded in the 2023 calendar year.

The University of Toronto is Canada's top university and among the top ranked universities globally with almost 100,000 registered students enrolled across over 700 undergraduate programs and more than 200 graduate programs. The University continues to prioritize academic excellence and student access, diversity, and inclusion.

The University of Toronto awarded 21,791 undergraduate and graduate degrees in the 2023 calendar year, including 868 doctors, nurses, pharmacists, and dentists, 817 upskilled healthcare workers with professional master's degrees in public health, nursing and medicine, in addition to 726 teachers and social workers, and 1,085 doctorates. Upon graduation, U of T graduates become part of a large and diverse global network of over 680,000 alumni who are setting new standards of excellence and making invaluable contributions worldwide.

Across the University, 77% of undergraduate students graduate within six years of starting their program, with even higher rates among professional programs in the health sciences. This rate has grown steadily from 69% in 2011 and is now the same as the average for highly selective public schools in the United States and comparable with Canadian peers. The actual graduation rate of students is even higher as these figures exclude students who move on to second-entry professional programs prior to graduating from their original first-entry program.

The skills that students develop during their time at university play an important role in labour market outcomes, and their contributions to the economic and social fabric of Canada and the world. According to the prestigious Times Higher Education magazine, University of Toronto graduates are among the world's most desirable employees – ranked 1st among publicly funded universities in North America and 12th place globally.

Alumni active in the labour force enjoy a 97% employment rate, with a higher percentage of alumni participating in the knowledge-intensive economy compared to the national average, particularly in the educational, legal, health and government sectors. Overall, 89% of U of T graduates from undergraduate programs report being employed full-time in jobs related to their program two years after graduation, and these recent graduates averaged a salary of around \$62,900 according to Statistics Canada.
