University of Toronto (Canada)

Update to credit analysis

Summary

The credit profile of the [University of Toronto](#) (U of T, Aa1 stable) reflects its global reputation and leading status in Canada, supporting strong student demand, research funding, and fundraising. Liquidity remains exceptional, with CAD8.9B in adjusted cash and investments which provide ample coverage for its debt obligations and operational expenses. Revenue diversification and a lower reliance on provincial grants than peer universities provides some protection against policy risks including provincial controls on domestic tuition fees. Although federal restrictions on international student admissions increases reputational risk of Canadian higher education institutions globally, demand from key markets remains very strong. U of T continues to manage costs and capital projects prudently, with debt well below limits and fundraising exceeding projections.

Exhibit 1

Growth in cash and investments ensures U of T maintains consistent and high coverages of debt and expenses

Years ending April 30

Sources: University of Toronto and Moody's Ratings

Credit strengths

- » Exceptional wealth and liquidity and low leverage
- » Global brand recognition and research strength along with consistent enrolment growth
- » Very strong governance and management which underpin reputation

Credit challenges

- » Federal policy changes dampen international student demand increase reputational risk
- » Weak EBIDA margins due to wage cost inflation and tuition freezes

Rating outlook

The stable outlook reflects our view that the university will be able to mitigate provincial funding and revenue constraints with continued very strong student demand, management's revenue raising and cost-cutting initiatives and exceptional wealth and reserve levels. At the same time, we do not expect to see significant debt accumulation, which will limit the rise in leverage.

Factors that could lead to an upgrade

The rating could be upgraded following a pronounced and sustained increase in operating margins, along with significant easing of provincial funding restrictions on tuition fees and an increase in provincial operating grants to the university.

Factors that could lead to a downgrade

The rating could be downgraded if there is an inability to substantially bolster EBIDA margins, which could stem from declining enrolment, including from international students, along with continued provincial tuition fee caps on domestic students, limited increases in operating grants to the university, or an inability to rein in expenditure growth. A material decline in cash and investment balances and investment returns, or a significant rise in leverage, would also contribute to downward rating pressure.

Sources: University of Toronto and Moody's Ratings

Profile

U of T is Canada's largest and top ranked public post-secondary institution and one of the top 25 global schools in international rankings, underpinning its international brand. The university operates through three campuses: its main campus in downtown Toronto (the St. George campus), Mississauga and Scarborough.

Detailed credit considerations

Baseline credit assessment

Although U of T's aa1 baseline credit assessment (BCA) already positions it above the [Province of Ontario's](#) (Aa3 stable) rating, we also assign a moderate likelihood of extraordinary support coming from the province in the event that the university faced acute liquidity stress.

Exceptional wealth and liquidity and low leverage

The university maintains exceptional levels of wealth and liquidity from continued growth in cash and investments. Adjusted total cash and investments, including endowments, stood at CAD8.9 billion at April 30, 2025, providing 8.2x coverage of total adjusted debt and 2.2x coverage of operating expenses, ratios which compare favourably against global peers. We expect that reserves will continue to be replenished from future operating surpluses and typically strong investment returns.

U of T's endowment portfolio is the largest among Canadian universities with a balance of CAD3.9 billion at April 30, 2025, a 9% growth year-over-year and a steady growth over the last five years. The endowment portfolio assets, along with the assets of a few

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the issuer/deal page on <https://ratings.moody's.com> for the most updated credit rating action information and rating history.

other long-term funds, are invested in a pooled vehicle (Long-Term Capital Appreciation Pool). Despite overall strong returns, the pool's returns have exhibited some annual volatility.

Overall leverage is low relative to peers, with very strong debt affordability that exceeds most peers. The university last issued debentures in 2011 and we do not anticipate new debt issues over the next three years, as the university will instead look to finance approved capital projects from non-debt sources, including operating reserves, provincial and federal funding, and donations. Debt affordability, measured as annual debt service coverage, stood at 3.6x at April 30, 2025. Although debt affordability has declined in recent years and we expect further modest declines given falling EBIDA levels, we view these levels as strong and in line with peers.

At the same time, pension-related pressures have significantly eased in the last three years. While U of T historically recorded large pension deficits with large unfunded pension liabilities, it transitioned to a jointly sponsored defined benefit pension plan (the University Pension Plan Ontario (UPP)) as of July 1, 2021, with several other universities. As of December 31, 2024, the UPP was in a surplus position of CAD247.1 million. Under the UPP, U of T is required to fund any future deficits on the assets and liabilities transferred into the plan for the first 10 years, which could create funding pressure on the university, however subsequently the costs will be gradually shared equally between participating employers and employees in the UPP. U of T also maintains a pension risk contingency of CAD250 million as of April 30, 2025, to mitigate potential future declines in the funded status.

Global brand recognition and research strength supports exceptional fundraising

U of T is Canada's largest and top ranked public post-secondary institution and one of the top 25 global schools globally. The strength of its reputation is supported by an ability to attract top talent for faculty, strong levels of selectivity of students, and exceptional research strength.

Along with its affiliations, including colleges and teaching hospitals, U of T has consistently been at the top of Canadian universities in securing federal government research funding from the three granting councils and from other federal programs. For the 2024-25 fiscal year, UofT received in government and other grants amounting to CAD641 million, reflecting its strong research capabilities and collaborative networks. U of T's research strength is also evident in the number of prestigious research chairs, including "Canada Research Chairs" and "Canada 150 Research Chairs" at the university.

U of T's excellent market profile and global recognition has contributed to very strong enrolment demand even in the face of provincial funding and enrolment constraints. The number of total full-time equivalent (FTE) students has grown consistently each year to 91,245 in 2024-25, up more than 10% over the last five years.

U of T's strengths are also evident in its highly effective fundraising activities, leveraging its brand name and reputation to maintain a competitive advantage in attracting donations relative to peers. The university launched the 'Defy Gravity' fundraising campaign in 2021 with a goal of reaching CAD4 billion in donations over 10 years, and has already reached over CAD2.3 billion as of April 2025. The university receives significant donations and gifts for research and capital projects, which demonstrate its ability to capitalize on its brand name and profile and to generate sizeable philanthropic interest and donations despite competition for fundraising dollars both domestically and internationally.

Very strong governance and management which underpin reputation

We view the university's management and governance characteristics as very strong. The success of U of T in maintaining a very strong balance sheet and balancing its core operational financial results while meeting academic goals is underpinned by developing and executing multi-year frameworks for academic and financial planning, along with an emphasis on a decentralized style of governance and decision making.

Each faculty is responsible for developing its own budget and for adhering to self-imposed revenue and expense targets. This allows the faculties to be more entrepreneurial in areas where they see greater demand and by extension generate positive operating results. At the same time, control over collective bargaining is done centrally, which takes a certain amount of expenditure control out of the hands of individual faculties.

The University of Toronto Asset Management Corporation (UTAM), a non-share capital corporation whose members are appointed by the university, manages the investment assets of the university's Long-Term Capital Appreciation Pool (which includes assets of the

endowment fund) and the Expendable Funds Investment Pool (including short- to medium-term funds). UTAM has also committed to sustainable initiatives to achieve net zero carbon emissions associated with the endowment portfolio by no later than 2050.

Federal policy changes dampen international student demand increase reputational risk

We expect that international student enrolment levels and associated revenue will decline modestly over the next two years, primarily due to the adverse reputational impact of recent changes in federal immigration policies which weakened the appeal of Canadian higher education institutions globally. The federal government capped new international undergraduate student permits at 35% below 2023–24 levels for 2024–25, with allocations based on provincial population share. In 2025–26, a further 10% reduction applies and now includes graduate students. In our view these changes, along with additional federal restrictions relating to work permits and spousal immigration eligibility have significantly weakened the appeal of Canadian higher education institutions globally which raises credit risk from lower student demand and associated tuition revenues.

Partly mitigating this risk is the weakened appeal of US universities given more restrictive US federal policies on international students, which would increase the relative attractiveness of non-US universities. In addition in June 2025, U of T announced a partnership with [Harvard University](#) (Aaa stable) that returning Harvard international students who are unable to re-enter the US could continue their studies at the U of T's Munk School of Global Affairs and Public Policy. To support diversification and maintain competitiveness, U of T's departments are also investing 6% of international undergraduate tuition revenue into merit-based scholarships, including the International Scholars and Pearson programs.

At the same time, a concentration in international students at around 30% total full-time equivalent (FTE) students exposes it to revenue concentration risks and geopolitical vulnerabilities. Historically, much of the growth has come from Asia, particularly China, which accounted for nearly half of the international student population in 2024-25. While student demand from China remains very strong, the university's recent efforts to diversify its student composition have also yielded some success, with notable increases from Bangladesh, Indonesia, Vietnam, Turkiye, and Brazil. Nevertheless, applications from India declined significantly in part due to geopolitical tensions with Canada, and emerging market student growth has not fully offset the decline.

Weak EBIDA margins due to wage cost inflation and tuition freezes

U of T currently faces a number of operating challenges as a result of operating and capital cost escalation, and constraints related to provincial actions which adversely impact the university's fiscal profile and contributed to a sustained period of weak EBIDA margins.

U of T's key expense pressure derives from cost escalation of operating expenses, including rising salaries and benefits which currently make up approximately 60% of total expenses, and capital expenses including higher construction, materials and labour costs. For 2024-25, the total cost of salaries and benefits increased 3% compared to 2023-24, which followed a court repeal in 2024 of a provincial cap of 1% salary increases for public sector workers between 2020 and 2022. The repeal already required U of T to negotiate higher salary increases and retroactive payments for its labour unions in 2023-24, including a 13% increase in salaries and benefits for 2023-24.

On the revenue side, limited growth in provincial operating grants, along with mandated freezes in domestic tuition rates over the last four years – which follows a mandated 10% reduction in 2019-20 - have resulted in modest shortfalls relative to budget forecasts. The mandated restrictions resulted in weaker tuition revenues for the university and weakened its ability to offset any international revenue pressure from domestic fees.

While higher than anticipated provincial grants and larger than average tuition fee increases in certain programs provide some offset, the combined impact of these challenges have contributed to a notable decline in EBIDA margins in recent years, falling to 4.7% in 2024-25 from 18.0% in 2021-22. We expect that EBIDA margins will be constrained over the next 2 years given our projection of slowing revenue growth and inflationary pressure on expenses.

Exhibit 3

The combination of rising wages and benefits and tuition freezes continue to dampen EBIDA margins

Fiscal year ending April 30

Sources: University of Toronto and Moody's Ratings

The province is transitioning the framework for operating grants to universities to reflect a gradually increasing emphasis on performance metrics (relative to grants based on enrolment), where universities are benchmarked against their own past performance based on a number of indicators. Although the change could create some volatility in the amount of grants for U of T, we expect that the university will overall benefit from the new framework given its demonstrated ability to exceed its performance benchmarks. At the same time, U of T's lower reliance on provincial funding than the majority of rated domestic peers provides it with greater autonomy and flexibility to manage its finances and academic programs from own-source revenues.

Extraordinary support considerations

Moody's assigns a moderate likelihood of extraordinary support coming from the Province of Ontario in the event that the university faced acute liquidity stress.

ESG considerations

University of Toronto's ESG credit impact score is CIS-2

Exhibit 4

ESG credit impact score

Source: Moody's Ratings

The **CIS-2** Credit Impact Score reflects a low impact of ESG considerations on U of T's ratings.

Exhibit 5

ESG issuer profile scores

Source: Moody's Ratings

Environmental

The **E-2** issuer profile score (IPS) reflects the university's low exposure to environmental risks as its infrastructure is built to withstand the typical range of weather patterns. While it owns land and buildings which may be subject to environmental risks (e.g., asbestos in older buildings or clean-up following construction), these risks are modest and the university proactively manages them through its operations and facilities maintenance.

Social

The **S-3** IPS reflects pressures from a decline in the university entrance-age population in Ontario and from tuition revenue declines given provincial funding policies designed to address affordability, both on tuition setting and support to students. U of T has a higher share of international students than most rated universities, which helps offset pressures from domestic tuition fees but exposes it to political and economic risk including immigration trends and changes in policies on immigration eligibility. These pressures are mitigated by strong selectivity ratios and solid enrolment demand.

Governance

The **G-2** IPS reflects management's credibility, track record and ability to anticipate and mitigate risks. A robust institutional framework and prudent financial planning also contributes to multi-year balanced budgets and strong operating results. The university puts strong emphasis on a decentralized style of governance and decision making, allowing for funding allocations between the university's departments. The organizational structure is typical of Canadian universities with strong oversight from the Governing Council and committees, although provincial representation on the board exposes the university to potential government intervention.
