1. Chair’s Remarks

The Chairs welcomed the attendees to the meeting.

2. Report of the President

The President provided the Committee with an update on a series of matters.

Association of American Universities (AAU)

The President had attended the AAU Presidents’ meeting in Washington D.C. in April. Issues discussed included student mental health and the recent admissions scandal that had affected a number of elite universities in the United States.

Provincial Government Matters

Provincial Budget

The new provincial government had presented its first budget on April 11, 2019. There was a projected decrease in funding to Colleges and Universities over a 4-year period by approximately $1 billion; much of the decrease was due to the changes in the Ontario Student Assistance Program (OSAP) funding.

Performance-based funding

The Ministry of Training, Colleges and Universities (MTCU) had announced a new performance-based funding model for universities and colleges starting in 2020-21. Funding would be tied to 10 performance metrics (including: graduate earnings; experiential learning; skills and competencies; graduate employment outcomes; graduation rates; and other metrics). The metrics were aligned with two broad government priorities: skills and job outcomes, and economic and community impacts. Institutions would have the flexibility to weight the metrics in ways that would best reflect their differentiated strengths and strategic goals, and would be measured against their own targets relative to their historical performance (rather than being assessed in comparison to other universities in the system).

Other Funding Programs & Post-budget Reductions

The government would be introducing amendments to the MTCU Act related to ‘sustainability and employee renewal’. The MTCU had also cancelled capital funding for a graduate and medical enrolment expansion program first announced in 2005, and made changes to the funding for the Facilities Renewal Program. Grant funding for a number of university-related initiatives had either been eliminated or reduced.
Mental Health

The President reported that he had met with the Hon. Merrilee Fullerton, Minister of Training, Colleges and Universities and had discussed student mental health issues in the meeting. The Province had announced $174 million in funding to address critical gaps in Ontario’s mental healthcare and addiction care system – this was part of the government’s commitment to allocate $3.8 billion over the next ten years for mental health, addictions, and housing supports. President Gertler stated that The University continued to move forward on its four-point action plan to address issues around student mental health, in partnership with the broader community, and that the wellbeing of students remained the university’s highest priority.

At the invitation of the President, the Provost provided an update on the Student Choice Initiative and articulated some of the administrative steps in place in response to this requirement by the Provincial government. The Provost also informed the Committee of a new collaboration between the University and the Toronto District School Board (TDSB). Under this program, called Support, Engage, Experience U of T (SEE U of T), students from two schools – Downsview Secondary School and Runnymede Collegiate Institute – would attend the University for a semester-long course, co-op placements on campus and other experiential activities. This would earn the participating student a high school (4U) credit and a University of Toronto half-credit to put toward a university degree. The Provost noted that the program was an effort to provide a pathway for students who were under-represented on campus.

3. 2018 Performance Indicators for Governance

The Chair invited the Provost to introduce the 2018 Performance Indicators for Governance report. The Provost pointed to the Executive Summary to the Report, which focused on key University accomplishments and how the University of Toronto was doing with respect to key performance indicators. The 2018 Report included more than 110 measures and over 300 performance indicators that span the University’s teaching and research missions.

In the discussion that followed, the Provost added that the administration would look at including in future reports indices to monitor the progress made on mental health support initiatives.
